#### THE DANGEROUS HOUL ! FLY.

The city department of public health gives a timely and needed warning to those leaving the city for their vacations to avoid places where there are many files. Those who follow this advice will avoid places which are uncleanly, which allow food and garbage to be so exposed as to attract and feed the flies, says the Philladelphia Press. They will avoid places where stables and dwellings are in near vicinity, as the exposed manure is the choice breeding place of thousands and even millions of flies. In other words, to avoid disease-conveying files avoid places where they permit files to breed and feed. Formerly the conditions which multiply flies and the files themselves were considered objectionable but endurable. Now the patient toleration of files is known to be a heedless trifling with the health and life of human beings. Disease germs are for the most part innocuous to man, antil through some convenient medium they are conveyed to his system. This purveyor of disease is the fly. His guilt has been proved to a demonstration. His capacity for car-Tying on his feet from foul and putrencent sources the bacteria of disease has been recorded by gelatin plates on which he has been made to alight and have proven his guilt.

The raisin growers of Fresno county, California, are trying to promote the consumption of raisins by estab lishing "raisin day," on which all patriots who believe in patronizing home enterprise and consuming home productions are expected to indulge in raisin cakes and puddings, raisin bread, etc. The boys and girls will fall in line for this, and us they are the best consumers of things sweet, it would seem to be good policy to awaken the enthusiasm of young enters. Parents are now busy striving to get enough of things more staple than raisins, which would be adopted generally if they could be made to take the place of meat, eggs and other products. Moreover, it is suspected that if all were to do as the raisin growers desire there would be a boom in the price as a result of the boom in the demand.

Smokers who are going to France should know that, now the French duties on tobacco and cigars have been increased, travelers entering France are allowed to bring into the country free of duty only ten cigars, 20 cigarettes, or 1% ounces of tobacco, and this must be on their person, or in their hand luggage examined at the frontier. The customs officials are fully entitled to confiscate or tax any quantity of tobacco or cigars however small which may be found in the heavy luggage of passengers sent under seal to a terminal station (St. Lazare or Gare du Nord) and examined there, and just now they are very strict.
