# The **Fulton** County News McConnellsburg, Pa. SCHOOLS IN PUBLIC PARKS.

Boston's finance commission has placed itself upon record as favoring the building of one of the public schools in one of Boston's public parks. If the suggestion should be acted upon by the Boston city government it would probably involve a unique experiment. A schoolhouse is to be built in a portion of the city where property is high-priced, and even at a high price it is difficult to ret a suitable site. In Washington mark the city has an area of 396,125 uquare feet in such location as to make an ideal site, says the St. Paul Dispatch. The commission argues that the school building will occupy but 12,000 square feet of this space, and that the curtailing of the breathing urea will, therefore, not be serious. On the other hand, the fact of having a school in the park will attract to it a maximum number of children and promote the object of the park.

While the finance commission does not wish to make its recommendation a precedent, it has in it a enggestion of value. The plan might be worked both ways, locating schools where convenient in public parks so as to give the children a maximum of ground for recreation, and turning the grounds about such buildings into breathing spots for the use of the neighborboods, especially in vacation times.

A Brooklyn woman lately wrote to the marriage license bureau of that city to know if she could be supplied with a good, honest, sober husband. "The clerk in charge explained that, while he had a few model men on hand, they were all married and the supply was entirely too limited for the demand. The fact that the matrimonial market is understocked with honest, sober husbands may be one reason why the divorce courts are overcrowded.

The pessimist can always find food for gloomy thought. The facts that the census shows a big increase in population while the death rate is decreasing will prove to that individual, who, like the proverbial Scotchman, is mever happy unless he is miserable. that the nation is going to be overcrowded until somebody has to be shoved off the earth to make room for the rest.

Those who have been wondering as to whether America would produce a new race have their answer. The hobble skirt race has been inaugurated on Long Island. It was won in seven falls.

That marriage is the worst kind of a failure is the opinion of a Gotham broker who is paying his first wife \$240 a month alimony and whose secand wife wants alimony to the tune of \$500 more
