

CURE THAT GOLD TODAY

"I would rather preserve the health of a nation than be its ruler."—MUNYON.

Thousands of people who are suffering with colds are about today. Tomorrow they may be prostrated with pneumonia. An ounce of prevention is worth a pound of cure. Get a 25 cent bottle of Munyon's Cold Cure at the nearest drug store. This bottle may be conveniently carried in the vest pocket. If you are not satisfied with the effects of the remedy, send us your empty bottle and we will refund your money. Munyon's Cold Cure will speedily break up all forms of colds and prevent grippe and pneumonia. It checks discharges of the nose and eyes, stops sneezing, allays inflammation and fever, and tones up the system. If you need Medical Advice, write to Munyon's Doctors. They will carefully diagnose your case and advise you by mail, absolutely free.

Prof. Munyon, 534 and 5/2 Jefferson streets, Philadelphia, Pa.

PISO'S is the name to remember when you need a remedy for COUGHS and COLDS.

PERFUME FAVORED BY QUEENS

Royal Family of England Remain Faithful to "Ess Bouquet"—Czarina Is Fond of White Violet.

Queen Mary is not a lover of perfume. She uses only deodorant occasionally, but avoids scents as much as possible. A west end chemist told the writer recently that neither is Queen Alexandra very fond of perfumes, although she remains faithful to the "Ess Bouquet," which has been in use by the royal family of England since 1822. This perfume is composed of amber mixed with the essence of roses, violets, jasmine, orange flowers and lavender.

On the other hand the zarina is passionately fond of perfume. Her apartments in the royal palace are daily sprayed with essences of lilac, jasmine, and white violet. Her majesty's favorite essence is violet, and for several weeks in the early spring hundreds of women and girls may be seen at Grasse gathering the blossoms from which the zarina's perfume is made. The finished product is tested, bottle by bottle, at the St. Petersburg Academy of Chemistry before being sent to the imperial store.

The Queen Mother of Spain uses as perfume eau d'espagne, manufactured in Madrid, and also obtains a perfume for her toilet from Paris. Its composition is a secret which the perfumer only half discloses. "It is made," he says, "of rosewater, coconut oil, and—the rest is a mystery."

The young queen of Holland is a great believer in the virtues of eau de cologne; while "Carmen Sylva," queen of Roumania, uses a special perfume made from the finest herbs, which she says "is the best tonic for the skin she has yet discovered."

Why Do They?

Why women like the baldheaded man it is somewhat difficult to define. It may be because he appears to be: Thoughtful and kind. Trustworthy and confident. Whimsical. Past the follies and frivolities of youth.

Usually successful. A man of property.

Opinions why women like the baldheaded man obtained by the Daily Mirror are as follows:

He is not silly like young men. He accepts refusals of marriage so nicely that one is sorry one did not accept him.

The bald patch looks so clean and nice. One would like to kiss it. A doctor welcomes baldness when it comes to him, as it is a sign of so-called dignified learning, which invariably increases his practice.

His Means.

"You are charged with vagrancy, prisoner at the bar."

"What's dat, judge?"

"Vagrancy? Why, you have no visible means of support."

"Huh! Heah's mah wife, judge; Mary, is you visible?"

Fulfillment.

"Two great desires of my life have been gratified. One was to go up in an airship."

"And the other?"

"To get safely back to earth."

HEAD OF A. A. U. IS RE-ELECTED

Everett C. Brown, of the Central Association of Chicago, was re-elected president of the Amateur Athletic Union at the annual election of that body, held in New York the other day. Cleveland will be the scene of the Olympic games of 1916. The election of Cleveland will now be placed before the international body, which has final action on the location of the games. It is not thought, however, that there will be any dispute as to Cleveland.

RYAN WAS FIRST CHAMPION

Syracuse Fighter Gives Interesting Statement as to How He Won Title From Needham.

Tommy Ryan was asked for a statement regarding the first welterweight champion. Boston papers put forth the claim, recently, of Paddy Duffy for this honor and others said Ryan was entitled to it. Ryan claims to be the first welterweight champion of the world, but gives to Duffy the honor of being the first welter champion of America.

Here is Ryan's statements as made to a newspaper correspondent of Syracuse, N. Y.

"Paddy Duffy of Boston was recognized as the first welterweight champion. He dropped out of the game—just how I do not recollect, and then

Patsy Carrigan of Boston and Denny Needham of Minneapolis fought 106 rounds to a draw in California for the title.

"Needham claimed the title, for Patsy did not stay in the game much longer. Needham was generally recognized as the champion and I was matched with him for a finish match for the honors.

"Let me say right here that in those days champions had to make weight at the ringside, with their fighting togs and gloves on. There was no such thing as weighing in at 3 o'clock in the afternoon and fighting six hours later.

"For five hours and five minutes Needham and I fought. The bout, which took place in 1891, went 76 rounds and I won on a knockout. I was then recognized as the champion of America.

"Tom Williams came over from Australia about that time. He was recognized as the welter champion of the land of the kangaroo, having beaten George Dawson for the Australian title.

"William's first fight in this country was with mysterious Billy Smith and Smith knocked him out in three rounds at Coney Island. Smith then challenged me to fight for the world's championship. He had the Australian title while I held that of America.

"We fought in Minneapolis and I won in twenty rounds, making me the undisputed welterweight champion of the world.

"My next fight for the title took place in The Alhambra here in 1897. Tommy Tracy had come over from Australia and claimed the championship of that country. He challenged me, and when we met I knocked him out in nine rounds.

"Right now it is pretty hard to say who is the legitimate welterweight champion. I doubt if there is a real welterweight champion at the present day. By that I mean a man who can make weight, 142 pounds, at the ringside, as all the old-time fighters had to do."

Owens World's Champions.

"Uncle" Ben Shibe, seventy-four, owner of the Athletics, manufactures all of the baseballs used in both big leagues. They come out of the same factory. The only difference is that the National league balls are stitched with pink yarn and the American white.

LUCK IS BIGGEST ELEMENT

So Says Mike Mitchell, Outfielder and Heavy Hitter of Cincinnati National League Team.

BY MIKE MITCHELL.

(Copyright, by Joseph B. Bowles.)

Luck I think is the biggest element in winning baseball games, and in the success of any individual player. I have known many good ball players who were sent back to the minor leagues and have never arisen again because luck broke against them during their early careers and they never were lucky enough to get another chance.

Scoring runs wins, hitting scores runs and luck is the best part of hitting, which is why I reason that luck wins. There are mysteries in batting that even the batters do not understand. I see each season good hard hitters standing up well, hitting the ball hard and squarely, who, to watch them hit you would think were in the 300 class, and yet they are standing away down in the averages. Hitting runs in streaks, too. Often a man will hit hard and steadily without getting safe hits for weeks and then suddenly the luck will turn and everything he hits will go safe.

There is no way for a man to learn to bat. I take that back. I think left handed batters who are extremely fast actually can be taught to bat whether they are natural hitters or not. They can learn to poke and push the ball, and chop at it, mixing it up with their swings and by practice become pretty good hitters whether they were so at the start or not. But with the great majority hitting the ball is natural and is the result of a quick eye and steady drive at the ball. Boys just starting the game, however, can cultivate their natural ability to bat. They ought to study themselves to observe how they stand at the plate, how they hold their bats and how they move when the ball is pitched. They may be natural hitters who have not learned to handle themselves. Try to keep a steady footing, both feet on the ground, but with the body balanced on the balls of the feet. Never hit flatfooted. Swing so as to get the force of the body behind the bat, and try to meet the ball squarely instead of trying to hit it out

of the lot. A great many young players make the mistake of swinging too hard. Notice how many batters have two strikes called and then hit the third solidly.

Then begin the study of pitchers. No man ought to go into a game without some knowledge of the style of the opposing pitcher, whether he is slow or fast, straight or curve or spit ball, and the more he knows about the other pitchers the better he ought to hit. If a batter knows what the pitcher is likely to do, he is much more likely to hit. The fact is that a majority of hits made in the finished game are made when the pitcher is in the hole and the batter is almost certain what is to be pitched.

It is a question for each batter to study out for himself, but perhaps a hint or two may help. Keep cool, watch closely and study all the time and you may hit—if you are lucky.

GOSSIP OF SPORTDOM

Notre Dame Regains Championship. A special from Washington State college, at Pullman, says the faculty athletic committee has formally declared Sprinter Jack Nelson to have been ineligible when he competed under the W. S. C. colors at the western college conference meet at Urbana, Ill., last June, renounced claim to the ten points won by Nelson in 190 and 220 yard dashes, and notified President E. A. Bryan, now in Spokane, of their action that Mr. Bryan might, in turn, notify the western conference authorities.

As Wason of Notre Dame was second to Nelson in both dashes, that will give Notre Dame four more points than Stanford, and the honors of the meet are still with the Catholic college.

Baseball Controls Over 7,000 Players.

It is estimated that organized clubs in the major and minor leagues this year controlled over 7,000 players. In the major leagues 16 clubs paid nearly \$1,000,000 in salaries, it is said, while the Class A league pay roll reached \$500,000, it is figured. The other minor leagues paid over \$700,000.

Trying to Organize Polo League.

New York Athletic club swimmers are trying to effect the organization of an intercity water polo league, to include Chicago, New York, Philadelphia, Boston, Pittsburgh, and possibly St. Louis. The idea is to have play during the winter season.

COMMERCIAL

Weekly Review of Trade and Market Reports.

Bradstreet's says:

The approach of the holiday season, seasonably cold weather throughout a wide area of the country and good prices for cotton at the South are the stimulating features in general trade at present. With few exceptions jobbing trade in holiday goods is reported good, while staple lines continue to record only fair results from current demand. At some leading markets trade, aside from the exceptions noted, is rather spotted. In most sections the dry weather ruling is a bar to fullest activity in heavy footwear and rubber goods which would be benefited by snow or rainy conditions. Relative best reports as to current trade come from parts of the West and the South where past free-cotton marketing has liberated a considerable amount of money. Collections, which rule from slow to good, are relatively best at the South for the above reason. In industrial lines the changes noted are few.

Wholesale Markets

NEW YORK.—Wheat spot firm; No. 2 red, 97 3/4 c. elevator and 97 3/4 f. o. b. afloat; No. 1 Northern Duluth, 118 1/2 f. o. b. afloat.

Russia's Growing Population.

This year's census of the Russian Empire adds another five millions to the population as enumerated in 1908. The czar's subjects now number 160,000,000 and increase every year by 2,500,000 despite wars, epidemics and internal disturbances. As there is no lack of cultivated soil in Russia there seems no reason why this big annual increase should not continue.

Chambermaid Reparte.

First Chambermaid—Look! You let your pillow slip.

Second Chambermaid—No; the coverlet it—Exchange.

For COLDS and GRIP.

Dr. Pierce's CAPSULES is the best remedy—relieves the aching and feverishness—cures the cold and restores normal conditions. It is liquid—effects immediately. 10c., 25c., and 50c. At drug stores.

A Woman's Privilege.

"What is the latest thing in weddings?"

"Generally, it is the bride."

Dr. Pierce's Pellets, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels and cure constipation.

Truth has a shining seric, regardless of the frank person.
