MILLIONS OF LIVES.

An Awful Toll Collected by Consumption, Many Unnecessary Deaths.

If people could only understand that systemic catarrh is an internal disease that external applications cannot cure, they would not need to be warned so often about this malady...

The only way to successfully treat catarrh is by employing a medicine which is absorbed and carried by the blood to all parts of the system...

We have a remedy prepared from the prescription of a physician who for thirty years studied and made catarrh a specialty, and whose record was a patient restored to health in every case where his treatment was followed as prescribed.

We want you to try Rexall Mucu-Tone on our recommendation and guarantee. We are right here where you live, and you do not contract any obligation or risk when you try Rexall Mucu-Tone on our guarantee.

How's This.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & Co., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligations made by him.

After-Dinner Mints.

If he is in perfect health, even the blind man may look well.

We generally have a short acquaintance with a fellow who is broke.

It seems that even when he is at home the weather man is generally away off.

A Creed For 1911.

The following is taken from an article in "The Herald of Gospel Liberty," and was written by Rev. S. L. Baugher, of Conshohocken, Pa., but a few years ago, pastor of several of the Christian churches in this county.

"My beloved readers, do not back-bite your fellow man. Do not profess a religion that will allow you to lie and find fault. Never try to hurt a brother's influence because of prejudice in the heart by slandering him, or saying mean things about him.

Remember that religion is love. And perfect love, or sanctification (you may call it by either name if you so desire) will bring to the heart cleansing from all sin. Then there will be no hatred, or prejudice in the heart. Man meets crosses and temptations. He come into the world without his consent and goes out of it against his will, and the trip between the two is exceedingly rocky.

Do not delay any longer the job of culling out the poor stock. It is a mistake to keep even a single unprofitable fowl. Have the stock up in quality rather than in quantity.

It is a good rule to keep the fowl indoors during rainy, snowy or windy weather. While the rains during the summer will do no harm to the fowls, the cold rains of winter are injurious.

On any map of the entire world it is impossible to indicate all the unknown regions, since many of them are comparatively small. A map showing every section of the earth's surface as yet unmapped would be dotted with thousands of such areas.

"I fear I am not worthy of you," "Never mind about that," responded the young lady with the square jaw.

THE POULTRY YARD.

Some Hints and Ideas for the Farmer And the City Man.

Keep the dust box supplied with nice clean dust, and see that the grit box is never empty.

Keeping many breeds is a poor way to succeed. Get down to one or two varieties and give them the best of care.

As the new corn gets dry and hard it is safe to feed more than when it was soft and green. It is more easily digested and gives better results.

Never feed meat scraps that were made of rotten meat. Good, pure feed is the only thing that ever ought to be fed to a fowl of any kind.

During winter the drinking vessels must be emptied each evening; it is much easier to do that than it is to break a solid cake of ice in them the next morning.

If it possibly can be done, clean up the droppings each day. It is work that well repays one. Never allow this cleaning to be delayed longer than a week.

Leaving the birds to fight their own battles against lice and other enemies may save some work, but it will cost some eggs, and eggs are worth money these days.

Do not delay any longer the job of culling out the poor stock. It is a mistake to keep even a single unprofitable fowl. Have the stock up in quality rather than in quantity.

As the winter grows colder, increase the supply of corn. It is a heating food. But never feed it alone. A good grain mixture for winter in two parts whole corn, one part each wheat and oats; all well mixed.

It is a good rule to keep the fowl indoors during rainy, snowy or windy weather. While the rains during the summer will do no harm to the fowls, the cold rains of winter are injurious.

At this time of the year colds may develop in the flock. It is always best to nip these in the bud. In the first stages a one grain quinine pill each night for a week will be found effective.

Remove the fowls to separate and dry quarters. Generally in a week the cold will have disappeared. Colds are caused by exposure or by closely built houses, or by overcrowded flocks, making the fowls sweat at night while on the roosts and chill when they leave their perch the next morning.
