If possible, a room with windows on two sides is much to be preferred to one which can be opened only to one point of the compass. By a system of screening, it can always be managed that a direct current of very cold air shall not blow right on the bed, but the air of the room should be constantly renewed and always cool.

Of all "cranks" the "fresh aircrank" is the sanest, and his reward in the pneumonia sick room is a rich one.
