# The Fulton Jounty News PRESIDENT TAFT McConnellsburg, Pa.

# MAN WITHOUT A PAIN.

Hurrah for the man without a pain! If he is not the salt of the earth, then the earth must surely remain unsalted. He feels no inward burning necessity of breaking into newspapers with constant declarations as to the badness of men and things. He is not full of suppressed resolutions as to the wickedness of everybody else, says the Chicago Inter-Ocean. He has no special yearning to ascend Chautauqua platforms and feed full the listening throngs with all the horrors of existence. In private life he is the citizen who looks after his family, who is regarded as a good neighbor and who gains and deserves the respect of all those who know him. In the business world he is the man who does his work without a lot of noise and wasted motion and thereby earns the gratitude of his associates or employers. In public life he is the man who sees that the business of government gets attended to and leaves to louder statesmen the honors of big headlines and Chautaugun lectureships. After hearing or reading the studied and laborious complainings of the other variety, the thought of him is like the murmur of pleasant waters. It cools, refreshes and strengthens the jaded spirit. It reminds one that everything is far from being lost, that the world's work is still being efficiently done, that the republic is safe, and that the sun is still shining.

A Boston restaurant keeper kept a green turtle on its back in his window and was tried on a charge of cruelty to animals. A Harvard university professor testified that the turtle was more nearly related to the birds than the fishes, but the defense took the ground that it was not an animal, but a fish, and the judge instructed the jury to bring in a verdict of not guilty. Whatever intellectual Boston may hold as to the status of the reptiles, there is no good reason why the laws forbidding crueity to animals should not be broad enough to cover more than warm-blooded animals.

An Oak Park professor is advocating the establishment of a school in which the art and science of courtship may be taught. Good heaven! Has the man no knowledge of human nature? As soon as courtship is made a thing that people will have to study and work at nobody will wish to indulge in it. The way to make courtship popular-which seems to the Oak Park professor's object-is to enact a Senator Simmons of North Carolaw prohibiting It.

The sick friend is serving useful purposes. He has long served as an has been sitting by his bedside. Now he is coming in handy for the speeding motorist who is hastening to his dying bed. It would be a great shock to his loving friends if by some mischance this convenient scapegoat should suddenly recover.

# TAFT SPEAKS ON THE TARIFF.

Adresses Auslence at Providence, Say-Ing That Before an Industry Heceives Protection Now it Must Demonstrate Need of It.

Providence, R. L-President Taft told an audience in Providence with regard to the tariff and reciprocity that "the time for the Chinese wall is gone."

The President followed his trend of thought first expressed at Springfield, Ill., in January last, when he sounded a retreat from the Payne-Aldrich tariff, but he went further this time and in plainer terms.

'We must recognize," said the President, "that the time for the Chinese wall is gone. Before an industry receives protection now it must demonstrate the need of that protection and it must not ask for more protection than it needs"

Going from his views upon tariff generally, he considered the need of a tariff with regard to Canada. He cited the industries in the East and the farms of the West and concluded:

"I do not think any industry needs protection against Canada. My TO PREVENT FALSE CLAIMS. heart is full of reciprocity and I wanted to talk."

Visits Textile Exhibit. Visits Textile Exhibit.

In Fall River the President visited the Textile Centennial Exhibition, walked up or down every aisle of one of the municipal textile schools which Fall River maintains for the training of its future workmen, motored where he was cheered wildly, and ended with a little chat to 100,000 people out of doors.

# WILL PROTECT THE VOTERS MORSE RENEWS HIS Representative Boshne Proposes to Make it a Crime to Threaten.

Washington .--- Corporations which shut down their plants in order to influence voters or attempt to dictate legislations by such underhand methods are to be amenable to punishment hereafter, if a bill which Representative Boehne, of Indiana, has introduced in the House becomes a law. Representative Boehne would also

make it a crime for any corporation to display on its factory walls placards and signs "hinting" that employes shall vote such and such a ticket if they wish to retain their positions.

During the debate on the Free List Bill Representative Un.ªerwood, of Alabama, startled the House by a statement that the Steel Trust had attempted to dictate what stand he should take on tariff revision. The bill put woven wire on the free list, and just before the bill came to a vote in the House Representative Underwood received notice by telegraph that the Steel Trust had ordered the work stopped on an immense new plant in the course of construction in the Alabama representative's district. It was declared that the action of the corporation was because of Mr. Underwood's tariff views as a member and chairman c \* the all-powerful House Committee on Ways and Means. Representative Underwood recognized this as a direct effort to influence legislation and flung a de-

flance in the direction of the Steel Trust and declared amid the applause of his colleagues in the House that he would not change his views. The Boehne Bill is believed to have grown out of this incident.
