For sixteen years Mike Flynn had cleaned out the town hall after shows, lectures, political meetings, Decoration day exercises and other doings, and never a complaint did he make. Recently, however, he fancted he had a kick coming, and he went into the mayor's office to register it. "What is it, Mike?" asked the mayor. "It's about the hall, yer honor. The byes stand up in the rear, they do, an' they chew an' spit durin' the intire performance, An' not a wurrud would Oi say, yer honor, if they would spit out on the flure where Oi could git at it, but -the varmints-they would spit all ever the legs of the chairs in the back row, an' on the places where the chairs do be fastened to the flure, an' hard work it is fer a man of me age to stoop down an' scrub it off. There's a favor Ol would be askin' of yer honor this mornin' in rispict to it." "What is that, Mike?" "Indade, OI would ask yer honor fer permission and authority to do away with the back row of seats entirely. Nobody likes to sit in the back row anyway, yer honor, an' sinceless it is to have one in the ball at all."-Kansas City.

CURE THAT SORE THROAT

Sore throat is inflammation of the mucous membrane of the throat, and if this membrane happens to be at all sensitive a predisposition to sore throat will exist.

Paxtine Toilet Antiseptic is both a preventative and a cure for sore throat because it possesses extraordinary cleansing, healing and germicidal qualities. Just a little in a glass of water, used as a gargle, will quickly relieve all soreness and strengthen and thus overcome all tendency to

Paxtine is far superior to liquid antisepties or Peroxide for all toilet and hygienie uses;

Paxtine may be obtained at any drug store, 25 and 50c a box, or sent postpaid upon receipt of price by The Paxton Toilet Co., Boston, Mass. Send for a free sample.

Rifle for Under Water Use.

When he is working in water infested by sharks and other sea moneters likely to do him harm, the diver has at present to rely for his safety on the use of the knife or, failing that, on a quick return to the surface. Now comes the invention of Captain Grobl, a German diving instructor, who has constructed a rifle which can be fired under water, and is designed for the better arming of the diver. The most remarkable thing about this is that it fires not bullets, but water, which is propelled with such farce that it has an extraordinary power of penetration. indeed, the inventor himself has pleaced armor plate of medium thickhers with the water jet from his wonyon. The rifle has a stout barrel and a leaded with a cartridge cased in India rubber.

So Declares Olive Schreiner in Her New Book-Hard Work Would Make Women Much Happier.

Cambridge, Mass .- "One child is enough for the Twentieth century family," says Olive Schreiner in her new book, "Woman and Labor."

The woman who doesn't earn her own fiving is therefore a parasite, except for that small portion of her she should be paid.

"Wherever in the history of a nation great numbers of its women have become parasitic, that nation is on the road to downfall and decay. America is, therefore, on the road to degeneration, unless its women of leisure can be allowed-or induced-to exchange their vanities for hard labor.

"The human female parasite," the book states further, "whether in modern Paris or New York, or in ancient Greece, Rome or Assyria, is the womled are the result of light absorption an who, relieved of manual labor by the prosperity of her class or nation, are not caused by the pigment cells or or by the invention of labor-saving hard bump in a Muhlenberg football any means that the amateur naturalist machinery, will trade on her unused potentialities of motherhood for her support. Disguise Themselves as "Poor Musicians" and Go on Tour-Friends Drive Them Away.

London.-An escapade in which figere a well-known baronet, his wife, a cavalry officer, the heir of another baronet and a street organ is reported from Warwickshire.

The incident, which took place a few miles from Nuncaton, has caused much amusement among those connected with the Atherstone hunt,

Having hired a plano-organ from some traveling foreigners, the baronet and his wife disguised themselves as Italian musicians. The former wore a slouch hat and old clothes which had done duty in amateur theatrical performances; the latter were old garments and bound her head with a colored silk handkerchief.

Accompanied by a kinsman of the baronet, they set out to the neighboring mansion occupied by the son of a baronet well known in London. No sooner had they begun to reel off

popular music hall airs than the gentieman appeared upon the scene and, in a peremptory manner, ordered their instant withdrawal under threat of calling in the police. When, after a time, they made

themselves known, he joined them in a peregrination of the village, and eventually the "adventurers" reached the seat of a country magnate, a leading justice of the peace. Here the butler was sent to tell

them to leave the grounds immediately, and it was not until the trate squire the quartet retired.

The climax was reached when the party arrived at another country resi-"The woman of leigure today," she dence. The family were away from

lack of honorable activity, would be days later details of the "joke" leaked where the escapade was planned.

CAUSE OF DELUSIONS

New Disease Mixes Sounds, Colors, Odors and Tastes.

Physicians Now Recognize Condition Which Probably Accounts for Hallucinations of Insane-It Is

Called Synesthesia.

New York.-Physicians now recognize a condition which probably accounts for the hallucinations and delusions of the insane. It is called synesthesia, and those afflicted with it are known as synesthesics. It is that peculiar condition in which sounds create the idea of colors, and vice versa, or in which colors, tastes, sounds and odors are confused.

"Synesthesia is not a matter of much practical importance," says American Medicine, "but it is highly interesting to say the least. It is that curious phenomenon of the overflow of sensations so that air waves, for instance, give a sensation of color as well as sound. It seems that through some defect of development the cortical centers (of the brain) are not insulated from each other completely, so that a stimulus received from the retina say, is not confined to the visual centers, but affects adjoining ganglia.

"The commonest form is colored hearing, and most of the cases of synesthesia investigated up to a few years ago were of this type. No two could by striking it with his paint were alike, that is, the same sound would cause different colors or shadas skillful as a boxer, and finally lngs in the different cases; a locomoreached him; but, fortunately, its live whistle would be yellow to one,

"Moreover, in some cases only a few of a piano from black in the bass to white in the upper keys with a spectrum in between. In other cases every

glaring colors being loud, literally as into incurable mental disease.

well as figuratively, and, of course, there must be an infinite variety or mixtures of the other sensations,

The most distressing cases are those in which there is no actual confusion of sensations, so that odors and tustes and sounds are not differentiated. No doubt these abnormalities are at the basts of many delusions and hallucinations of the insane.

"The nervous instability of synesthesice is the practical side of this subject. Without an exception, the cases present evidences indicating considerable nervous involvement in the may of absormal development. Some if not most of them are highly intelligent, though incapable of that hard work necessary for success, and all are very sensitive to irritations which the average man ignores.

"Perhaps the condition is far from ommon than we imagine, and it would be well to keep it in mind in the trentment of neurasthenics. We might find that they are great sufferers from jarring sensations, not in the way usually thought of, but in these overflows to other centers. A normal woman may be made actually ill by garish colors or coarsely arranged music, and we all know the bad effects of certain tastes and colors; how much more suffering these must be in synesthesics where the irritant affects more than one center.

"Of course the cases are so few in number that the general practitioner rarely if ever sees them, but he is itable to have milder borderland types in which a little attention to aesthetics may make all the difference between success and failure in treatment."

Seek to Prevent Insanity.

The Fountain Head of Life Is The Stomach

A man who has a weak and impaired stomach and who does not properly digest his food will soon find that his blood has become weak and impoverished, and that his whole body is improperly and iosufficiently nourished.

Dr. PIERCE'S GOLDEN MEDICAL DISCOVERY makes the stomach strong, promotes the flow of digestive juices, restores the lost appetite, makes assimilation perfect, invigorates the liver and purifies and enriches the blood. It is the great blood-maker, flesh-builder and restorative nerve tonic. It makes men strong in body, active in mind and cool in judgement.

This "Discovery" is a pure, g'yeeric extract of American medical roots, absolutely free from alcohol and all injurious, habit-forming drugs. All its ingredients are printed on it: wrappers. It has no relationship with secret nostrums. Its every ingredient is endorsed by the leaders in all the schools of medicine. Don't accept a secret nostrum as a substitute for this time-proven remedy of known composition. Ask your neighborhood. They must know of many cures made by it during past 40 years, right in your own neighborhood. World's Dispensary Medical Association, Dr. R.V. Pierce, Pres., Buffalo, N.Y.

ITS STRONG POINT.

Orville Blunt-Yes, it's great. The further away you stand from it the better it looks!

Seventy-One Years in a Shoe Shop. Charles H. Wilson of Troy, N. Y., occupies the unique position of having been in business in one building for 71 years; at least he will have completed 71 years in the shoe business at 242-244 River street August 12 next. This record, it is believed, can be equaled by few if any shoe retailers in this country. Mr. Wilson has also been in business for himself for more than 50 years. Mr. Wilson is today just as much in active business as he was almost three-quarters of a century ago. when as a thirteen-year-old lad he entered the employ of John Leonard Williams of Troy. To be exact, that was August 12, 1840. Mr. Williams kept a shoe store at 242-244 River street in a building which had been erected in 1803, and so the building now occupied by Mr. Wilson for his retail shoe business is one of the oldest buildings in Troy.

Work for Extinction of Tuberculosis. Exhibitions showing in graphic form the prevention of consumption have been shown in every state in the United States, except Nevada, Arizona. New Mexico and Wyoming, and also in most of the Canadian provinces and in Mexico, Porto Rico and Cuba, according to a statement made by the National Association for the Study and Prevention of Tuberculosis. There are now 25 states and 16 cities havtional association itself, and the total number of similar displays is over 200, including about 150 small school exhibits. The first tuberculosis exhibit in America was shown by the Maryland Tuberculosis commission in January, 1904. In 1906 there were four such exhibits.

Small Boat to Sail Far. - ne yawl yacht Recluta, 36 tons, has set out on a voyage of 6,000 miles, from Gesport to Buenos Aires, the headquarters of her new owner. The little vessel carries a crew of four, and is commanded by Capt. Harry Williams, who recently took the 20ton cutter Moyana to Odessa. All the members of the Recluta's crew are Hampshire men. She will go to Madefra, Cape Verde, Pernambuco and Montevideo. The longest sea run will ne a distance of about 2,000 miles, between Cape Verde and Pernambuco .-London Standard.

FALSE HUNGER A Symptom of Stomach Trouble Corrected by Good Food.

There is, with some forms of stomach trouble, an abnormal craving for food which is frequently mistaken for a "good appetite." A lady teacher writes from Carthage, Mo., to explain how with good food she dealt with this sort of hurtful hunger.

"I have taught school for fifteen years, and up to nine years ago had good, average health. Nine years ago, however, my health began to fall, and continued to grow worse steadily, in spite of doctor's prescriptions, and everything I could do. During all this time my appetite continued good, only the more I ate the more ! wanted to eat-1 was always bungry. "The first symptoms of my break-

down were a distressing nervousness and a loss of flesh. The nervousness grew so bad that finally it amounted to actual prestration. Then came stomach troubles, which were very painful, constipation which brought on piles, dyspepsia and severe nervous headaches.

help me, said I was overworked, and at last urged me to give up teaching, if I wished to save my life.

"But this I could not do. I kept on at it as well as I could, each day growing more wretched, my will-power alone keeping me up, till at last a good angel suggested that I try a diet of Grape-Nuts food, and from that day to this I have found it delicious

always appetizing and satisfying. "I owe my restoration to health to Grape-Nuts. My weight has returned and for more than two years I have been free from the nervousness, constipation, piles, headaches, and all the allments that used to punish me so, and have been able to work freely and easily." Name given by Postum Co., Battle Creek, Mich.
