RUSSELL SIPES.

The Country Editor.

The editor of a rural newspaper occupies a unique position in the fields of journalism, his rival, the city editor, may have more responsibilities and a large scope of action, but he is seldom known to the public. The country editor is however known to everybody and his personality is familiar to all. He may exert a powerful influence on the community through this close personal contact. The country editor, remarks the Spantansburg (Pa.) Sentinel, ushers the newly born citizen into the world, watches its progress to manhood and womanhood, rejoices at the happy marriages and notes with appropriate solemnity the exit of the person from the plane of life's activity. Thus the country editor is known to all and everybody knows him. The village newspaper is the record of community joys and sorrows alike receive the editor's sympathy; he admonishes when necessary, gives praise when it is due. He is our advisor and guide of public opinion. This close companionship should work for good. The field of the rural newspaper is equaled by none. Let us assist the country editor in his work and his building up a higher social organization.

On a recent trip to Hustontown we met our old friends Jere Laidig and Davy Lamberson. Mr. Lamberson is almost as young looking as when we first knew him. Mr. Laidig is much crippled with rheumatism.

Hazel Garland in Wreck.
Miss Hazel Garland, daughter of Mr. and Mrs. J. L. Garland, of Ayr township, left Hancock last Saturday over the B. & O. railroad to visit her sister Pearl, Mrs. Weisel in Pittsburg. On a curve two miles east of Garrett, the train on which Miss Hazel was traveling, was derailed and three passengers and the mail clerk were injured. The whole train left the rails except the pony wheels of the engine. After some delay the uninjured passengers were taken on their respective journeys, and the injured were taken to a hospital. Miss Hazel escaped with nothing worse than a bad fright.

No Sex in Eggs.
There is no possible way of determining the sex of eggs. An eminent poultry authority says that the best way to determine whether an egg contains a rooster or a pullet is to hatch and watch the chick grow for about four months. If the chick crows, it is a rooster. If it lays an egg, it is a pullet. The American breeder in years past has been inclined to worry himself to an unnecessary degree in an effort to determine a method of controlling or determining the sex of the unborn. This is a matter entirely too delicate and too mysterious to be handled by man, and he will probably never know any more about such things than he knows now.—Farmers Home Journal.

Coal Oil for Mites.
Clean the roosts often enough to keep mites, that stay on the roosts in daytime, from multiplying. If they have a start, treat the roosts every other day till two or three treatments have been given. Coal oil will kill them if no other remedy is at hand. Apply it early in the day and do not use an excessive amount.

Lost Valuable Horse.

Samuel A. Hess, candidate for the nomination for County Treasurer, lost a valuable horse last week. His hired man was in the field harrowing when the horse became tangled up in some manner, fell, and rolled over two or three times in the struggle. So severely injured was the animal that it died a few days later. Up on examination it was discovered that one of the horse's kidneys was almost torn asunder. Samuel has been having some tough luck recently, he having fallen to the barn floor a distance of twelve feet, and almost broke himself to pieces. He is just able to be out again.

CREMATIONS IN ENGLAND.

There Were 855 Last Year—The Number Steadily Increasing.
The movement in favor of cremation in England continues to make slow but steady progress, writes the London correspondent of the New York Medical Journal. During 1909 the number of cremations carried out in Great Britain was 855, an advance of sixty as compared with 1908.

The first crematorium in England was opened at Woking in 1885 and the total number of cremations since that time is 8,121. There are now altogether thirteen crematoria in Great Britain and this number will probably soon be increased. The Cremation Society of England has been very active in its propaganda work and public interest is slowly being aroused.

Recently a cremation society was formed in Edinburgh. The object of the society is to promote the practice of cremation and burial reform by means of meetings, lectures and publications or otherwise. There are already about 180 members, including many well known persons.

Little Worlds.
The discovery of asteroids or minor planets, continues to be made with the aid afforded by celestial photography. Among a vast multitude of stars crowding a photographic plate, one, perhaps, will be seen to have drawn a short, thin line on the plate during its hours of continuous exposure. The astronomer knows at once that it is either an asteroid or a comet. Subsequent observations soon decide the point. Only the more interesting ones are afterward observed with attention; but, once discovered, they cannot be ignored, and the rapid growth of the flock becomes an embarrassment. Eros, which at times approaches the earth nearer than any other regular member of the solar system except the moon, and Asteroid No. 568, which at aphelion is more distant than Jupiter, remain, as far as their orbits are concerned, the most interesting members of the entire group, and are kept under constant observation whenever circumstances permit.

Hikers Through Here.

On Friday morning two young ladies on a "hiking" tour across the continent, passed through McConnellsburg, and on over this direct route to Pittsburgh. They are Miss Mary Dougan and Miss Daisy Myers, of 24 and 34 Seventh Avenue, New York City.

They left the metropolis Sunday, August 6th, and were four days walking from Philadelphia to Harrisburg, spending a few days in each of those places. They seem to have an abundant supply of courage, for when night overtakes them, they hunt the cosy corner of a fence, slightly off from the road, and rolling up in their puchos, sleep the sleep of the innocent. They carry no tents or other cumbersome equipment and have already acquired the long steady stride that counts up many miles in a day's time.

There are no rules governing this tour, but the young ladies expect to arrive at San Francisco, their destination, about April 1st. They will walk all the way to St. Louis, where they will spend some time with friends, and then buy ponies making the remainder of the distance over the southern route (for it will then be winter) via the broncho line.

The young ladies are very interesting conversationalists, and say that they are having the time of their lives.

Attack Like Tigers.

In fighting to keep the blood pure the white corpuscles attack disease germs like tigers. But often germs multiply so fast the little fighters are overcome. Then septicemias, boils, eczema, salt rheum and sores multiply and strength and appetite fail. This condition demands Electric Bitters to regulate stomach, liver and kidneys and to expel poisons from the blood. "They are the best blood purifier," writes C. T. Budahn, of Tracy, Calif., "I have ever found." They make rich, red blood, strong nerves and build up your health. Try them. 50c at Trout's Drug Store.
