THE INDIAN'S WAY.

The Almighty has not freighted the foot with a single superfluous part. Every inch of every foot is No. 23-109 acres meant for use. When a man walks No. 25-106 acres in the right way, speaking literally, the back of the heel strikes the ground first. Then the rest of the heel comes down, after which the outer edge of the foot takes the bulk of the burden until the forward movement shifts the weight to the ball of the foot and finally to the toes. The ideal step is a slightly rocking motion. At no time should the entire foot be pressed against No. 29-126 acres the ground. Heel to toe is the move- No. 53-203 acres ment. Try it and see how much No. 83-137 acres farther and more easily you can walk. No. 96-66 acres It's the Indian's way, and what poor No. 97-62 acres Lo doesn't know about footwork can go into the discard.

IT WASN'T RIGHT.

An old man (if being ninety-three is old) walked along Kearny street somewhat laboriously. Although feeble physically, there was an air of prosperity about him. That was what attracted the attention of a "touch" artist.

"Say, mister," said the tramp, coming up, "could you help a poor fellow to get a meal?"

The old man looked him over and then exclaimed: "You ought to be ashamed of yourself, coming to me for help! Evidently you don't know that I am an orphan."-San Francisco Chronicle.

ARCHITECTURALLY SPEAKING.

"I am the architect of my own fortune," said Mr. Dustin Stax. "Well," replied Mr. Holden Howes, "by being your own architect you're liable to get some curious effects, but you do save a lot of money on plans and specifications."-Washington Star.

THAT'S THE MAN.

When you see a man on the street swelling his chest, talking excitedly and making motions toward his arms and legs, it's a safe bet he's telling his friend he wears the same kind all year .- New York Telegram.
