SAW COMING STAR IN CALVE IN SUCH PAIN

Al Hayman First to Recognize Singer's Great Powers, and Henry E. Abbey Did the Rest.

Several years ago Al Hayman, who was in London, met the late Henry E. Abbey, who was then our greatest impresario. Mr. Abbey was presenting opera at the Metropolitan and was searching Europe for new singers. As they sat over their coffee after a comfortable dinner in their club Mr. Hayman described the trip he had just taken through provincial France, "And, by the way," said he, "I heard a most remarkable young woman sing Carmen at some little out-of-the-way

place." Searching through his pockets he finally came upon her name in his note book and gave it to Abbey, who seized his hat and called a cab. 'Where are you going?" said Hayman "I'm going to Paris immediately and find where she is and go to hear her." replied the impulsive Abbey. He found her in a dingy little opera house in a small provincial town and heard her sing Carmen. That night he had her signature to a contract, and that is how New York came to hear and acclaim the great Calve before ever Paris had heard of her.

BAD CASE OF DANDRUFF

Bissell, Ala .- "I had a very bad case of dandruff on my head. I was tormented by itching and my hair began to come out by the combfuls. I almost became frantic, fearful that I would lose all of my hair which was my pride. There were some pimples on my scalp and I scratched them until they made sores. My hair was dry and lifeless.

"I saw the advertisement of Cuticura Soap and Ointment and sent to my druggist for three cakes of Cuticura Soap and a box of Cutieura Ointment. I washed my scalp with warm water strong with the Cuticura Soap and dried, afterwards applying the Cuticura Ointment, working it in the scalp slowly with my fingers. After using them for several days my hair began to stop coming out. The dandruff all disappeared and in less than four weeks a cure was accomplished permanently." (Signed) Miss Lucy May. Cuticura Soap and Ointment sold throughout the world. Sample of each

Appliances for Measuring Time. Mechanical appliances for measuring time were in use from the earliest ages and clocks of one kind or another were made in Europe before the discovery of America. Brass wheel clocks with weights, standing six feet high, such as are now called grandfather clocks, were common in England and Germany long before the revolutionary war. The first clockmaker in the United States was Eli Terry, who made his first clock with woodwheels in 1792, and afterward made a great many, and they were good timekeepers. In 1807 he contracted to deliver 4,000 wooden wheel movements to a certain firm, and it took him three years to fill the order. Seth Thomas, once a well known Yankee clockmaker, learned his trade with Ell Terry. Brass wheel clocks were "Nor Eght with your little brother?" first made in the United States in 1837.
