URGES ENFORCING OF HOUSING LAWS

State Conference Plans to Show Conditions in Cities.

PUBLIC APPROPRIATIONS.

Bureau Would Have Been Organized Long Ago Had An Adequate Sum Been Available in the Appropriation.

(Harrisburg Correspondence.)

Harrisburg. — Pennsylvania's first housing conference ended after taking action to further a propaganda to educate the public to the conditions prevailing in many of the cities and expressing the hope that State and municipal laws governing housing would be enforced. It is probable that as a result of the conference the Bureau of Housing in the Department of Health will be put into operation for a limited period in order to demonstrate what could be done if sufficient funds were voted by the Legislature. This Bureau would have been organized long ago had an adequate sum been available in the appropriation to the State Health Department. One of the practical talks given attracted much attention from the delegates. It was by August Hiller, statistician of the Pittsburgh Board of Education who pointed out that many persons who desired to improve housing conditions were unable to do so because of lack of funds and suggested that the subject of public appropriations to inaugurate better conditions be seriously considered.

AN INSULT TO THE U. S. NAVY

Gunboat Dolphin's Men Arrested at Tampico.

RELEASED ON MAYO'S DEMAND

Apology Acknowledged By Mexico City Is Apprehensive About Admiral's Insistence Upon Salutation Of the Flag.

Mexico City.—The paymaster and a detachment of marine from the United States gunboat Dolphin were arrested by a Mexican officer at Tampico, marched through the streets and, after being held for a time, were released on the demand of Rear-Admiral Mayo.

A launch from the Dolphin, carrying the paymaster and a small detachment of marines, put in at Iturbide bridge, at Tampico. The Americans were after a supply of gasoline. They were in uniform, but unarmed. The launch flew the American flag. Colonel Hinojosa, commanding a detachment of Mexican Federals, placed the paymaster and his men under arrest, and paraded them through the streets.

Release followed on vigorous representations to the authorities by Admiral Mayo. Gen. Ignacio Zaragoza expressed his regret to the Admiral. Although President Huerta, in an official statement to Nelson O'Shaughnessy, the American Charge d'Affaires, has apologized for the unusual zealousness of the Mexican commander at Tampico, there exists here great uneasiness because Admiral Mayo is reported to have demanded that the Government authorities at Tampico salute the American colors.

President Huerta's statement was as follows: "In view of the fact that the Charge d'Affaires of the United States bears that the whaleboat carrying the American sailors was flying the flag of his country, an investigation will be made to establish the responsibility of Colonel Hinojosa. In accord with the line of conduct which the Government of Mexico always has followed in fulfillment of its duties of an international character regarding all nations, it deprecates what has occurred.

Called Mistake Of Subordinates.

"This case has grown out of nothing more than a mistake of subordinate officials, since the superior in rank of this same official, General Zaragoza, at once proceeded to point out that what had happened was unintentional, and imposed upon Colonel Hinojosa disciplinary punishment, within the faculty of said General Zaragoza.

Asked Disavowal and Apology.

In view of the publicity, Rear-Admiral Mayo asked for a disavowal and apology, and also that the officer in charge of the Mexican squad should be punished, and that the American flag should be saluted immediately.

THE CALL

AUTO PLUNGES INTO ELIZABETH RIVER

Two Men Drowned and Five Are Rescued.

SAILORS FORM HUMAN CHAIN

Car was On Way From Portsmouth Jail When It Leaped Through An Open Draw—Chauffeur Goes Down With Car.

Norfolk, Va.—Two men were drowned, and four others had a narrow escape here when an automobile, bearing five of the Jamestown bookmakers who were released from the Portsmouth jail, plunged through an open draw into the Elizabeth River. The four who were rescued from the icy waters are at St. Vincent's Hospital here.

So sudden was the accident that none of the occupants had an opportunity to leap for their lives, and they sank into the river before the eyes of a score of witnesses. Only quick action on the part of a number of sailors who were standing nearby, the first to regain their presence of mind, saved the four, who were struggling against a strong tide.

Four of those in the machine were bookmakers, who were among the 13 arrested at Jamestown several days ago, charged with bookmaking. They had been in the Portsmouth jail, which is not far distant from Norfolk, and an automobile had been employed to take them from the jail to this city after the necessary papers for their release had been procured.

Six In Machine.

Six persons were in the machine, counting the chauffeur. The trip to this city was made without a mishap until the Elizabeth River draw bridge was reached, which leads directly into the city. A ferry had already blown for the draw to open, but those in the machine apparently did not hear it in time to stop. With the draw wide open they continued across the bridge, while a score of terrified persons looked on.

Too late to stop, the chauffeur saw the open space with the icy waters below. He had a frantic effort to stop, but the machine shot clear across the open space, and to those looking on, seemed to plunge straight down into the water. With a sickening hiss, caused by the hot engine coming in contact with the water, it sank beneath the surface, carrying with it its human burden.

Burton, non-partisan candidate, who ran on a platform favoring commission government. TO PAY COLOMBIA FOR CANAL ZONE

Treaty Signed at Bogota Agreeing on \$25,000,000.

CLAIM IS OF LONG STANDING

The Colombian Congress Will Be Called Into Special Session To Ratify It—Contains No Rights For a New Canal.

Washington, D. C.—Undisguised gratification is felt by administration officials here at the prospect of finally healing the breach between the United States and Colombia through the treaty just signed at Bogota. If this convention is ratified by the Senates of the two countries, as the officials are confident it will be, it will close amicably a bitter controversy, brought on by the secession of Panama in 1903 and the granting to the United States the Canal Zone and which has cast a blight upon the relations between the United States and all Latin America.

The principal article of the treaty provides for the payment to Colombia of \$25,000,000 six months after ratification has been exchanged between the two countries, as indemnity for the losses she has sustained. This is granted in a lump sum, and the treaty does not attempt to specify how much of this amount is in reparation for the loss of Panama or how much for the loss of the Panama Railway rights.

Colombia is granted the right to ship coal, salt and petroleum from her Atlantic to her Pacific ports, either through the canal or across the Panama Railway, without any charge other than the cost of freight, no duty being assessed. These articles are not produced along the Pacific side of the country and there is no easy communication over land through Colombia on account of the high Andes Mountains.

Fixes Boundary Line.

A third article fixes the boundary line between Colombia and Panama and restores to the latter a strip of territory which has been claimed by Panama. This line is the same as that which was provided in the Cortes-Arosemena treaty between Colombia and Panama, one of the tripartite treaties never ratified by Colombia, except that it fixes definitely the point on the Pacific Coast where the boundary terminates, which is to be midway between Points Coccolita and Arditia. The former treaty left this point to be settled by a tribunal of arbitration to be appointed. Even after the approval of the present treaty by the Colombian and American Senates, a treaty between Colombia and Panama will be necessary before this boundary settlement is final. The United States agrees to use its good offices with Panama in the matter.

Another article expresses the hope that friendly relations between the United States and Colombia may continue from this time forward.

No rights for a new inter-oceanic canal across Colombia by the Atrato River route, and no coaling privileges on San Andreas and Providencia Islands, off the Colombian coast, it was added, were contained in the treaty.

While the Colombian minister, Senor Betancourt, received a cable from his foreign office, informing him of the signing of the agreement, the State Department was still awaiting word from Mr. Thompson.

The Colombian Congress will be called in special session to pass on the treaty before it is submitted to the Senate here.

PROTEST MADE TO GEN. CARRANZA

Washington Views With Grave Concern New Crisis.

EXPULSION ORDER THE CAUSE

Determined Representations To Be Made—Spanish Interests in Torreon Districts Large.

Washington, D. C.—Vigorous representation went from the American Government to General Carranza, Constitutional chief, urging that he modify the order of General Villa compelling Spaniards from Torreon. This situation is giving grave concern to authorities here. The United States has undertaken to extend Spaniards in Mexico the same position it affords American residents there, and Ambassador Blain has assured that nothing will be left undone to secure for the unfortunate Torreon every right to which they are entitled under international law and usage.

That Spain proposes to exhaust every resource to protect her people in the revolution-torn republic was explained, when Rear-Admiral Mayo, Tampico, called the Navy Department that the commanding officer of the British cruiser Hermione had been entrusted to care for Spaniards in the besieged Federal port. Officially he did not comment on this development.

Lack Of Data Embarrassing.

The State Department, as well as the Spanish Embassy here, is embarrassed in dealing with the situation. Torreon by a lack of exact information as to the extent of the demerit, expulsion and how far it has been executed. It is understood that in a public speech he told the Spaniards of Torreon that they were to be deported en masse; that a commission would be appointed to examine each individual case, and that such men as could establish the fact that they have rendered no aid to the Huerta cause would be permitted to return to Torreon.

The gravity of the problem has been increased by unofficial but credible information that this policy of expulsion of the Spaniards is to be of general application; that as rapidly as the constitutionalists by force of arms get their control over such cities as Aguascalientes and Monterey and other places within the Federal line they intend to drive out the Spaniards and seize their property.

Violates Treaty Rights.

An attempt to carry out such a policy would meet with determined opposition from the United States Government. Officials say the Spaniards in Mexico under the provisions of the treaty conferring the right of free trade, travel and other things under these circumstances would be in violation of the principles of international law and would form a subject of resentment by the State Government even to extent of host measures if need be.
