How Joe Melius Applies Lime.

Joe and Philip Melius, of Taylor township, dropped in to see us, Tuesday, and Joe gave us his method of preparing lime to be spread with a grain drill.

Before seeding his wheat field last fall a year ago, he purchased 100 bushels of stone lime, and began by placing a bushel of it on the ground and wetting with two buckets of water. He then covered the bushel of hot lime with two bushels of sawdust, and repeated the bushel of lime and two of sawdust until the 100 bushels of lime were mixed with 200 bushels of sawdust, and the lime soon slacked, and the whole pile in condition to drill.

Instead of harrowing the field, he set the drill to drill 7 1-2 bushels to the acre and went over the field; he then cross-drilled in 10 bushels.

He then set the drill for 7 1-2 bushels, opened the phosphate compartment, added the seed, and drilled the third time. The result, he said, was a good crop of wheat, and a fine stand of clover, and the time and cost of harrowing saved.

On last Tuesday, 10,000 residents of Washington county, Pa., met in squads all over that county and repaired the public highways in such manner that, in some instances, it is hoped the Highway Department will keep hands off.

It was a great day for Washington county. Men in all walks of life joined in the work. The women met at school houses and churches and prepared great dinners for the workers. We hear that the County is now as proud of its roads as a boy with new boots. In addition to getting good roads, all were fully paid for their day's work in fun and good fellowship. Lawn Mowers.

This week we want to tell you that we have just received a large quantity of Lawn Mowers and Garden Plows, and can sell them to you at a price that will save you good money. The garden Plow that we have sold so many of at \$2.25 during the last five years, we are going to sell this spring at \$1.98. We can let you have a 12-inch lawn mower at \$2.50, and a 14-inch at \$2.65. We have been selling these mowers for eight years and know what we are talking when we say they are good ones. Having brass bearings and being self-sharpening, they are always on the job.

Steel garden rakes, 25 cents; Hoes, 16, 20, 25, 38, and 40 cents. Steel shovels—no rivets in the blade—55 cents.

Fencing.

Say! Don't you want a nice lawn fence in front of your house or lawn? We have it at 10 cents a foot. Also, we have some Field and Poultry fence on hand yet, that we are selling at the old prices. Screen wire at 8, 9, 10, 11, and 12 cents a yard.

Paint! Paint!

Are you going to paint your house or barn this spring? If so, why don't you let us figure on it. We will not charge you anything for the figuring; and if we can't prove to you that we can save you money, then, we will not feel sore if you buy some place else.

Come Quick.

We have bought from a manufacturer 6 cases of Berlin kettles—3 cases of 6-quart, and 3 cases of 8-quart—all with tin lids, and they go at 23 and 33 cents. These goods sell regularly at 35 and 50 cents. Step along lively if you want some of them; for at these prices, they will disappear like a snowball in harvest.

We have sold more shoes this spring than any spring since we have been in business. We have all kinds and are selling them at factory prices. See our white shoes for children, misses, and women; also, our Oxfords. We want everybody to try our shoes; for this is a line upon which we can especially save you money. And, we had almost forgotten to say that if you want a nice hat and suit to match your shoes, we have them too.

One force behind your telephone

In many of the school physiologies to-day, man's brain is compared to the telephone switchboard which is the force back of the talk nerves of the country.

The first switchboards were crude indeed, but those of to-day are the most intricate, ingenious and fascinating things ever created by man.

They are a vast monument to the brainy telephone engineers and experts who worked out the many problems of linking together first a few telephones, then a few thousands and to-day over 8,000,000, so that any two telephones can be joined together.

If the switchboards of the Bell System were placed in a single row, they would stretch 36 miles—an imposing illustration of the force back of the Bell Telephone, which brings you the most efficient telephone service in the world.

When you telephone, smile!
