DAIRYMAID CREAM SEPARATORS

ARE MONEY MAKERS

The farmer who realizes how carefully Dairymaid cream separators are designed, out of what materials they are built, the simplicity and strength of all their parts, and, at the last, the minute and thorough tests each machine must pass, knows that the machine he wants is a Dairymaid.

The extra profits the Dairymaid means for your dairy are due to the features in its construction. To appreciate them you must study the Dairymaid yourself. You must see the easy running accessible gears; the phosphor bronze bushings; the splash oiling system; the convenient height for operating; the clarifying chamber that takes out all impurities before separation; the skimming devices that make for extra close skimming; etc. It will interest you to see these and other points. Call at the Dairymaid dealer and study them. If you write us we will send you catalogues.
