A McCONNELLSBURG WOMAN'S EXPERIENCE.

Results Tell The Tale.

Can you doubt the evidence of this McConnellsburg citizen? You can verify McConnellsburg endorsement.

Read this: Mrs. D. Keyser, Main St. McConnellsburg, says: "My back had been causing me a lot of trouble for a long time. It ached constantly and the pains in my loins were so severe that it was almost impossible for me to bend over. I had but little strength and my housework became a burden. I heard so much about Doan's Kidney Pills that I finally got a supply at Trout's Drug Store. I had only taken one box when I was completely cured. It is nearly three years since I have taken any kidney remedy and I know my cure has been permanent." Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Keyser had. Foster-Milburn Co. Props., Buffalo, N. Y.

patch on your pantaloons, so herewith I enclose some boodle to place to my credit on the NEWS which is a welcome visitor to our home here, although we feel somewhat disappointed when we do not find news from the northern end of the County. We trust that some one in, or around, New Grenada, may come out of his hiding place before the eel-toads begin to squeak, or the Father-ooms or Bloodenouns sing their bass solos along the banks of old Sideling Hill creek, and "go to it" and send a weekly letter to the people who have gone out from New Grenada and vicinity and are depending upon the NEWS for that "Letter from home."

From the fact that I am always interested in the descriptions of places given by writers in different parts of the country, I have been led to believe that many of the NEWS readers would be interested in learning more about this hustling "Rubber City." During the past four years I have been in Akron "tinkering around" Neal's Millinery store, owned and conducted by my son-in-law Ellis W. Neal. During this time, I have had an opportunity to learn much of the city and its industries. I am not the only one here from Fulton county, and there are many residents here that were born in the old Keystone state.

Last Sunday afternoon when more than 9,000 men were in attendance at the Scoville tabernacle, those from the Keystone state were asked to stand, and to my surprise, fully one-third of the great audience arose. There are a number of persons here from Wells Valley and adjacent territory. Those whose names I readily recall are Miss Bessie Willett, teacher in the public schools; Miss Mabel Edwards, music teacher; Bruce Willett, carpenter; Mrs. Belle Markley Davis, Miss Jessie Mason, teacher, of McConnellsburg; Miss Stella Gracey, Mt. Union, soon to graduate from the Actual Business College; Mr. and Mrs. Howard Satterfield, Sixmile Run—Mrs. Satterfield was Susan Ramsey, formerly of New Grenada. Mr. Satterfield clerks in an Acme store, and Mary and Susan, in a Department store. Miss Alma McClain, of New Grenada, is here at this time. It is very pleasant to meet these friends. There may be many more from our part of Pennsylvania, but, as the population of Akron is 100,000, it would only be chance that I should meet all of them.

Akron, sometimes called the Rubber City, because of its manufacture of rubber goods—especially automobile tires—is situated in the northeastern part of Ohio, and is not without historic interest.

Rubber City? yes,—twenty-three or more rubber factories making almost anything imaginable in hard and soft rubber. One factory alone has the output of 10,000 automobile tires in a single day.

There are two large Quaker Oats plants, where flour, feed, and cereals are manufactured in immense quantities. The International Harvester works, Whitman & Barns Co., large pottery and sewerpipe works, machine shops, planing mills, concrete, salt, and ice plants, iron foundries, and many other works go to make up the city's industries.

Three trunkline railroads—the Pennsylvania, the Baltimore and Ohio, and the Erie—and good electric lines furnish transportation. 24 graded schools, 66 churches, one each Masonic and Odd Fellows' temples, 130 miles electric lighted streets, 15 parks, 20 lakes bordered with summer cottages, and on which there is good boating and fishing, gives a fair description of the city and nearby country. When I say good fishing, I think of my old friend John A. Henry, of Clear Ridge, and it would make him anxious to start this way with his fish pole. All right, brother, come, and while I neither fish nor know how to fish, I would be glad to go fishing with you, and carry the fish—that is—if you caught any. See?

We have the "jitney" system of auto travel on our streets, and it is growing rapidly in popularity. I have learned by age and

What Could Be Done with the \$2,000,000 Which the Full Crew Laws Arbitrarily Take From the Railroads

Increased Railroad facilities, better service, greater safety and convenience, business expansion and the employment of a great number of men now idle would follow the repeal of the wasteful Pennsylvania and New Jersey Full Crew Laws.

Facts—Not Theories

- \$2,000,000 would buy 200 steel coaches.
- It would pay for 80 locomotives.
- It would purchase 67,000 tons of rails.
- It would return 5 per cent. on \$40,000,000.
- It would block-signal 1000 miles of track.
- It would eliminate 65 grade crossings.
- It would pay for 2000 freight cars.
- It would build 200 new stations at \$10,000.
- It would provide additional freight terminal facilities.
- It would buy 2,500,000 railroad ties.
- It would pay for 2,000,000 tons of coal.
- The iron and steel industry would be stimulated, furnishing steel for new cars, rails, bridges, buildings, etc.
- Miners and coke oven operatives would get increased work as industry expanded.
- New construction would mean busy times for the Lehigh region cement plants and their workmen.
- Thousands of architects, contractors, building trades workers, electrical concerns and electricians, skilled mechanics, carpenters, miners, and day laborers would so get work.

With these incontestible facts thus clearly set forth, the twenty-one railroads of Pennsylvania and New Jersey feel it their duty to place the fate of the Full Crew Laws in the hands of the people. They are convinced the people prefer that employment be given to thousands for whom there actually is work to knowing that \$2,000,000 a year is being paid in mandatory wages for extra men for whom there exists no essential service to perform and whose presence, it has been conclusively shown, increases—rather than decreases—the hazards of railroad operation.
