The Evidence Is At Your Door.

McConnellsburg proof is what you want and the statement of this highly respected resident will banish all doubt.

Riley Peck, shoemaker, Pleasant St., McConnellsburg, says: "Some years ago I was troubled with my kidneys and soreness in my back. I was dizzy at times and it affected my eyes. I had to get up often at night on account of kidney secretions. I was tired out when I got up in the morning and I didn't feel like doing any work. I had a doctor at the time, but he only gave me a little relief. A friend insisted upon me taking Doan's Kidney Pills, as he was cured by them. I got two boxes at Trout's Drug Store and found great relief at once."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Peck had. Foster-Milburn Co. Props., Buffalo, N. Y.

WHY YOU ARE NERVOUS

The nervous system is the alarm system of the human body. In perfect health we hardly realize that we have a network of nerves, but when health is ebbing, when strength is declining, the same nervous system gives the alarm in headaches, tiredness, dreamless sleep, irritability and unless corrected, leads straight to a breakdown. To correct nervousness, Scott's Emulsion is exactly what you should take; its rich nutrient gets into the blood and rich blood feeds the tiny nerve-cells while the whole system responds to its refreshing tonic force. It is free from alcohol.

MUCH COAL LEAVES COUNTRY

Exports From the United States Are Rising Rapidly—Figures for Last Fiscal Year.

The United States, which produces 40 per cent of the world's coal, exports annually 27,500,000 tons, or about 5 per cent of the output. The total export for the fiscal year ending with June 30, 1914, was valued at \$86,000,000, or less than half the value of the coal exports of the United Kingdom and slightly less than those of Germany. Certainly not an accomplishment to deserve any comment, until we look back a few years and find that the exports of coal from this country have considerably more than doubled in the last ten years. The increase has been 8,500,000 tons in 1904 to 19,500,000 tons in 1914, the latter total being the largest with the one exception of the immediately preceding year, on record. Since the beginning of July and more especially from August on, the export coal situation has been uncertain, but on the whole encouraging. There have been large increases particularly in the South American and Mexican trade, and Italy has become a large market.

Wife—The new cook left. Hubby—Didn't she give notice? Wife—No, she couldn't. The gas stove blew her up.

GERMANY'S FORTRESSES.

Of the more important fortresses Mainz is regarded by those who know as the most strategic point in the west of Europe. Situated on the eastern front of the Rhine, which it dominates, it commands also the natural way to the Danube, and the routes leading to the Elbe valley, to Cassel and to the Black forest. Next comes Koenigsberg, on the Baltic, guarded on its eastern side by the Dieme canal.

Metz, the greatest stronghold in Alsace-Lorraine, is protected by eleven forts, and in peace time it is the center of the German army. Its sister fortress, Strassburg, designed by Moltke, was considered by him to be impregnable. It is protected by fifteen forts, connected by citadel railways, and from it armies can maneuver east or west of the Rhine without intervention.

DON'T ALL PAINT.

STRANGE SHOWER FROM SKY

Fall of What is Described as Meteoric Floss is Puzzling the Scientists.

A remarkable fall from the heavens of large quantities of what is described as meteoric floss took place at Healdsburg. The shower, which began between 7 and 8 a. m., and reached its maximum about ten o'clock, was seen by all the inhabitants of the town.

According to an eye witness, the material appeared high in the heavens, in a clear sky, as a mass of stars, lustrous metallic sheets and silvery ropes. It reached the earth in various shapes and sizes, ranging from minute particles to sheets twenty feet square. It fell in such quantities that long ropes and masses of it hung from the telephone and telegraph wires.

When the substance reached the warm earth it began at once to contract into fibrous masses, resembling flossy asbestos, though tests proved that it was not that mineral. Most of it soon disappeared, though samples were saved and sent to Director Campbell of the Lick observatory and to Prof. Tito Alippi, director of the observatory at Urbino, Italy.—San Francisco Chronicle.

IN A CITY UNDER FIRE.

Reims—It's curious being in a city under fire. You don't hear much and you don't see much. The sound—above the noise of the city—is exactly like the rattle and roar of a train on the elevated in New York, no louder, and when you hear the explosion and see the smoke and debris you think it must be blasting, and half expect to meet an Italian with a red flag, waving a placard marked "Danger." I looked up when I first heard the shell and saw a lot of signs on houses advertising the "Smith-Premier Typewriter" and the "Remington" and the "Underwood," and tripped over a pile of broken plaster and rocks, and I fancied I would say, "When will they finish the subway?" It might so well have been New York.—Gerald Morgan, in the Metropolitan Magazine.

COME IN HANDY.

Mrs. Bacon—I understand your neighbor has bought his wife a double mirror. Mrs. Egbert—Yes, she's two-faced, you know.

ITS KIND.

"I understand your son is in difficulties about his aviation business." "Yes; he is in what you might call soar trouble."

UNDUE HASTE.

"Here's a bride sues for divorce three days after marriage." "Gee, it's tough to start a guy paying alimony the first week."

ESCAPED.

Miss Howler—The house wouldn't hold the audience when I sang. Miss Caustic—Yes, I understand the doors weren't locked.

DIDN'T MEAN THAT.

Patience—Don't you think she gets easily frightened? Patience—Why, no. I talked to her for half an hour.

THE DIFFICULTY.

"My friend, always be open with your wife." "How can I be when she is always shutting me up?"

TOO MUCH OF ONE.

He—You do not seem to be so anxious for a flat now. She—How can I be? Didn't I marry you?

Political Announcements.

For President Judge of the Court of Common Pleas of the 51st Judicial District.

DONALD P. McPHERSON, Gettysburg. Subject to the Non-Partisan Primary.

In announcing my candidacy for President Judge of the Court of Common Pleas of the 51st Judicial District, I wish to thank my friends who, without regard to Party, have so generously expressed their approval of it and to assure every voter of Adams and Fulton Counties that I shall appreciate his suffrage and support.

The Judgeship is now non-partisan—made so specifically by Act of Assembly—and if nominated and elected to that high office it will be my endeavor to observe the spirit of that act and to administer the duties of the office with fidelity and impartiality, to the end that the law may be enforced and justice done.

DONALD P. McPHERSON. July 1, 1915.

J. L. BUTT, Gettysburg, Pa.

To the Voters of Adams and Fulton Counties:

In announcing my candidacy for the nomination for President Judge of the Fifty-first Judicial District I desire to state that I consented to become a candidate because of the number of members of the bar who urged me to do so and pledged me their support, and while I had the matter under consideration, assurance of support and approval came from voters all over the county and district urging the step, and confiding in these assurances, I consented. The office of President Judge is the highest honor in the gift of the people of this district and carries with it the gravest responsibilities. A Judge must not only know the law and be a student of the law, but must be without prejudice and bias in the administration of the law, the rights of the humblest citizen must be as sacredly maintained as those of the most exalted or of the great corporations. He must weigh all matters carefully so that only justice and righteousness is done. The non-partisan law aimed at the highest judicial ideal in the separation of the Bench from politics and party organizations I pledge myself to the highest ideals of justice and right in the discharge of every duty if nominated and elected to preside over the Courts of this district, and as an assurance of such pledge let the life I have lived in your midst speak for itself. I will highly appreciate all support.

Most respectfully yours, J. L. BUTT. July 8.

I hereby announce myself as candidate for nomination for the office of County Treasurer of Fulton county, to be voted for by the voters of the Democratic party at the primary election to be held Tuesday, September 21, 1915, and I pledge myself to support the ticket nominated as I always have been loyal to the support of the Democratic ticket. Your vote and influence are solicited.

DAVID GREGORY, Thompson township.

County Commissioner.

I hereby announce myself as a candidate for the nomination for the office of County Commissioner of Fulton County, subject to the decision of the voters of the Republican Party, at the primary to be held Tuesday, September 21st, 1915, and pledge my support to the ticket then nominated. —Roasting to Death Over a Red-Hot Stove

What's the use of getting "all het up" when you're cooking a meal from a stove that's like a small furnace. Why don't you go today to your local dealer and

Get a

NEW PERFECTION OIL COOK STOVE

—the stove that heats when heat is wanted and don't spread it all over the room so that you're fairly suffocated. Think what it means on a sizzling hot day to simply shut the heat off as soon as the meal is cooked, but still have a stove that is ready for instant use when the next mealtime comes around.

The New Perfection Oil Cook Stove saves time, money and labor. It lights and regulates like a gas stove and, with the separate oven and fireless cooker, is equal to it in cooking power. You can broil, roast, bake, boil and fry; heat water for wash day and irons for ironing day—in fact, do anything any other stove will do. The combustion chimneys prevent all smoke and smell and the improved wick outlasts the ordinary kind. It will certainly pay you to go today and get acquainted with a New Perfection.

How many of us will be taking a trip of 26 miles over three mountains and many hills when 93 years of age?
