PRIVATE SCHOOLS.

One of the pro-saloon arguments in high license states is that the liquor traffic helps maintain the public schools. A Nebraskan newspaper fittingly replies thus: "Yes, that is true, but it does more than that. It maintains a school system of its own. While the little boys are being gathered into the public schools where they are trained to read, to write and to think, the young men are being gathered into the private schools of the liquor traffic, the saloons, where they are trained to swear, to tell lewd stories and to drink.

"The public school takes the boy, builds up his intellect and trends him towards high character and good habits. The private school of the liquor traffic, the saloon, takes that boy when he is a little older, debauches his intellect and trends him toward low character and bad habits,'

A NATION'S RIGHT.

Professor Guglielmo, the noted Italian historian, predicts a "world-wide temperance movement as an outcome of the great world war." He says that hereafter no nation can afford to consider the prosperity of distillers and brewers above the welfare of the people. "Pas not the state," he inquires, "the right and the duty to ask each citizen to sacrifice his goods and his life to save his nation from a foreign aggression against its glory, power, liberty or riches? And has it not the right to demand the renunciation of a few minutes of unhealthy, torpid joy to regenerate the citizen's health and save himself and future generations all the misfortunes of which drunkenness is the mother?"

ABOUT ALCOHOL.

This from the Technical World: Emperors, business men, social reformers, are all agreed upon one thing: Alcoholic drinks work positive harm. A single glass of beer lessens a man's efficiency 7 per cent, Imagine then what larger quantities of wine, gin or whisky will do. The upto-date employer will not keep men who drink even in moderation. The secretary of the navy will not allow them on our warships. "Every commander in the field today in Europe is leading a sober army. Everywhere the brains of the world recognize that alcoholic liquors weaken both muscle and mind power."

MADNESS AND SANITY.

"In years to come, when we read the history of this decade," says the Kansas City Star, "the red streak caused by the upheaval in Europe may be no broader than the white one which will represent the world's severing of polite relations with John Barleycorn. If the military madness of Europe does result in the liquor sanity of the world, the war may be hailed as the greatest blessing to mankind since the advent of Christianity."

BAD MIXTURE.

"I know from experience that whisky and ammunition mixed make trouble," said ex-Governor Oswald West of Oregon in explanation of his action in closing the Copperfield saloons more than a year ago. "I learned that a large number of persons in Copperfield were going armed. I did not want to take any chances of anybody getting killed, so I put the town under martial law and confiscated the whisky."

ALCOHOL AND ACCIDENTS. From 7 to 43 per cent of accidents are due directly or indirectly to drink, according to estimates of medical directors of three United States life insurance companies. Railroad accidents, 7 per cent; street cars, 8 per cent: automobile, 10 per cent; vehicles and horses, 8 per cent; heat and sunstroke, 43 per cent; machinery, 7 per cent; mines and quarries, 8 per cent; drowning, 13 per cent; gunshot, 10 per cent.

ESSENTIAL FOR SAFE CONDUCT.

The Boston Elevated Railway company, which was the recipient of a gold medal this year from the American Museum of Safety for the excellency of the methods used by it in promoting the safety and health of all employees, requires that "all men engaged in the car and train service must be free from the liquor habit as absolutely essential for the safe conduct of the business."

DEPRESSES INTELLECT.

One-half of one bottle of wine or two to four glasses of beer a day depress every form of intellectual activity.--Prof. J. J. Abel, Johns Hopkins University, Baltimore.

GOING TO CLOSE THEM.

Dr. William G. Shaw, general secretary of the United Society for Christian Endeavor, had just finished an appeal for missions at one of the meetings of the great convention in Chicago, when a white-faced woman in the audience arose and, pointing a shaking finger at the chairman, cried:

"Close the saloons and I'll have some money to give."
"Amen!" shouted Doctor Shaw.

We'll close the saloons; we're going to close the doors of every grogshop in Christendom." LIQUOR WORKS RUINATION.

"I know that liquor ruins a man." said General Villa, after placing an

embargo on all liquor sales in those Mexican towns wherein he maintains troops. .. "Here I have 30,000 armed men and there is no disorder. I do not drink or smoke, and I hope some day to have nation-wide prohibition
