

# Pictures of World Events for News Readers

In This Department Our Readers in Fulton County and Elsewhere May Journey Around the World With the Camera on the Trail of History Making Happenings.

TYPICAL MEXICAN OUTLAWS

VILLA'S BANDITS ON THE UNITED STATES BORDER

AN AMERICAN TOWN ON MEXICAN BORDER

LAUNCHING OF DESTROYER SAMPSON

In the presence of a limited number of invited guests the United States torpedo-boat destroyer Sampson was launched at Quincy, Mass. Miss Marjorie Sampson Smith (at left), a granddaughter of Admiral W. T. Sampson, the hero of the battle of Santiago acted as sponsor. The shipbuilding company expects to deliver the Sampson to the United States government April 1. This will be seven months ahead of the time allowed in the contract. Her contract speed is 29 1/2 knots. She has a displacement of 1,126 tons and will cost \$795,000. She is to be equipped with four 21-inch "W. T.'s" and four 4-inch rapid-fire guns.

PRINCE JOACHIM AND HIS BRIDE-TO-BE

The wedding of Prince Joachim, the youngest son of the Kaiser, to Princess Marie Auguste of Anhalt will take place at Potsdam, Germany, on March 11. Princess Marie, whose photograph is shown at the left, is a favorite at court. Prince Joachim has actively followed all moves of the war on the eastern front, where it was reported he had been wounded. He is shown in the photograph at the right, seated directly behind the driver. He was about to make a tour of inspection of the snow-covered lines in Poland in a motor sled.

SUCCESSFULLY RUNS BRITISH BLOCKADE

The German raider Moewe after raiding the enemy's commerce for months put into her home port with her prisoners and spoils of war. The Moewe captured 15 ships, 33 British naval officers, 165 members of crews and 1,000,000 marks in gold. The Kaiser personally conferred upon the commander the Order Pour le Merite.

BEAUTIFUL MODEL INDICTED

Miss Anna F. Holch, reputed to be the most beautiful model in the country, indicted by the government for failure to declare valuables photographed with her Russian wolfhound, Scapa. She is alleged to have failed to declare certain goods when she arrived in this country from Europe last year. Her employer, Herman P. Tappe, a millinery importer, is also under indictment for alleged false declarations.

FRANCISCO VILLA

NEVER LEARNED THE TRUTH

Callow Youngsters Might Have Repented of Their Condemnation If They Had but Known.

Youth and presumably innocence were waiting at a French goods counter while the clerk wrapped up jars of pink stuff which they didn't need. Each was audacious in the matter of short skirts, and both wore chewing gum.

On a stool at the same counter sat another customer, a woman just facing the agony line which separates beauty from vandals. And Youth and Innocence felt called on to dissect her. They bandied impressions as to the woman's looks, and giggled over her desperate attempts to retain her complexion and age. Their sharp young eyes took in the nobby dress that was almost shabby, and their sharp young voices would have stabbed her to the quick except that she seemed to be walled in by some concentrated thought that cloistered her from their blows.

"I betshees bad," the gum-stuck verdict came from Innocence, whose lawful place at that minute should have been in some eighth-grade schoolroom.

"Ucourse, Anybody'n tell that. Who'djespose would lookatarole mut like her?"

Then Youth and Innocence, without explaining how they came to be so sordidly enlightened at their callow years, suddenly switched interest to their wrapped-up stuff, and— That was all there was to it.

Except that the woman, having bought and paid for her own little bit of something, got up and hurried to the store entrance, where another woman stopped to congratulate her on some appointment obtained by her son:

"Isn't it splendid? Papa and I are so proud of him—I'm especially glad for papa, because he has been so depressed ever since his last attack—Ned's going to send him to Atlantic City right away— Imagine! After all these poverty-pinched days—"

"Well, you surely deserve all the good luck that's coming to you— Don't see how on earth you keep your color after all the nursing you've had to do—"

"Rouge, my dear. Papa'd be too wretched for words if he knew my complexion had gone yellow—but Ned says I shan't need it after this—"

This isn't much of a yarn, of course, but we have Plutarch's word for it that truth is always worth considering. And this is true.—Washington Star.

Scientists Study "Flying Sickness."

"Flying sickness" in its more essential particulars is deserving of careful and scientific investigation, according to the London Lancet. It raises matters of interest in connection with so-called mountain sickness. Edward Whymper states from his own experience of this condition that the abiding symptoms are profound lassitude, intense headache, feverishness, accelerated respiration and occasional spasmodic gasping of air, "just like the fishes when taken out of water," palpitation and tinnitus. The latter two symptoms, so doubt, occur also with great frequency at relatively low levels.

"It is clear," says the Lancet, "that flying sickness is not comparable in the strict sense with mountain sickness, in spite of the fact that some of the symptoms are more or less identical. Hitherto we have had little direct evidence of what occurs as a result of rapid transference from high to low altitudes, for the laborious ascent of the mountaineer into rarified air is very different from a speedy return to normal pressures, while the climb of a flying machine is hardly so rapid as to cause any ill effect. The pilot who is lifted from his machine, after a fast volplane, in a semi-conscious condition, falling thereafter into a deep sleep, shows a phenomenon not met with either in mountain sickness or in caisson disease."

To Promote Safety.

The newest museum in New York is called the American Museum of Safety. It contains collections of models, charts and photographs, actual machines safeguarded in full size, together with models of safety devices and sanitary appliances. The museum is free to the public. By special arrangement it is open in the evenings to classes and societies. The activities of the museum of safety are devoted to the safety, health and welfare of industrial workers and the advancement of the science of industry. The society gives yearly medals to those which make notable achievements in devices for the security of human life and to firms that make notable progress in the promotion of hygiene and the mitigation of occupational disease in their industry, a to railroads that promote safety for the traveling public.

Japanese Turn to Dye Making.

The Japanese are apparently going to take up dye making, now that German products cannot be obtained and the plan has been taken up by private enterprise, assisted by government. A number of business men were invited to the department of agriculture and commerce one day lately and shown the draft law for the encouragement of the manufacture of drugs and dyestuffs. The vice-minister of agriculture and commerce reported particulars regarding the encouragement law, and invited those present to give their views, without reserve, regarding the establishment of a company. It was subsequently decided that those present should consider the matter, and give their views later.

Treatment of Walls.

If a molding is liked from which to hang the pictures that do so much to make our rooms homelike, the best height for the molding is in line with the top of the doors. The modern idea seems to be to bring the window woodwork to the floor by using a paneling beneath the sill, and to carry the tops of doors and windows to a fixed line—the molding line. Thus the walls are divided into rectangular spaces, and the decorative effect of a room is enhanced. A plain paper has the dignity of a panel when so used.

MAJOR GENERAL FUNSTON

COL. H. J. SLOCUM

Henry at Columbus, N. M., who sent soldiers across the border in pursuit of Villa and his bandits.

Two Kinds of Eggs. There are only two recognized brands of eggs—eating and throwing.

Nothing Doing. Lady of the House—Will you chuck that cord of wood in the cellar? The Tramp (thoughtfully)—Matam, I may be a beast, but I aint no wood chuck.
