Making Farming a Business.

"Too many farmers in America today are merely giving themselves hired men's jobs. What the farmers need is not only large production but profitable production," says Carl S. Vrooman, assistant secretary U. S. Department of Agriculture, recently. "Farming is a business just as much as running a steel plant, a bank or a saw mill, but few farmers have attained the ambition of the business man who expects to make interest on his investment, wages for his time and a profit besides. From the standpoint of pure agronomy, they say our average yield per acre of wheat, for example, can be doubled. In the meantime, we need have no fear of over-production."

Worth Careful Thought

Do you read the label to know whether your baking powder is made from cream of tartar or, on the other hand, from alum or phosphate?

Royal Baking Powder is made from cream of tartar, derived from grapes, and adds to the food only wholesome qualities.

Other baking powders contain alum or phosphate, both of mineral origin, and used as substitutes for cream of tartar because of their cheapness.

Never sacrifice quality and healthfulness for low price.

Springtime on the Farm.

Are you ready for spring? The common question among farmers in the fall is "are you ready for winter?" Robins are back, the green is getting into the trees, the wild flowers are here again, and the season of 1916 is under way. Among the things that you were going to do last winter were the following: Oiling and repairing the harness; repairing machinery, making improvements in the barn, stables, and other buildings; ordering your fertilizers, seeds, trees and plants; testing the seed corn; trimming fruit trees and spraying for scale; repairing and building new fences, walks and gates. Some have been done and others remain undone. Why not continue to get ready now for the harvest season by utilizing your spare time to best advantage?

Spending More Economically.

How could you spend \$100 to best advantage on your farm? Do you believe in the adage that "a stitch in time saves nine?" They who neglect the repairs on your buildings, the up-keeping of your fences, the improvement of your soils by proper drainage, the use of lime and fertilizers? How many hundred dollars more profits could you make this year if you spent some money this spring in improvements—in making your farm more productive and more efficient as a business concern?
