W ITH the history of the world's workers on Poliomyelitis and the results of our own work before us we have to acknowledge that THE GERM OF THIS DISEASE HAS NOT BEEN FOUND, and further, that we do not know how the disease is communicated from one person to another.

There is no medicine or specific that will prevent it or cure it. DON'T LOSE YOUR HEAD! Avoid patent medicines-they do harm. Call in your family physician if you get sick; he will not tell you he has a remedy that is a sure cure, and any one who does, lies. Long attentive treatment under a good doctor of medicine, and helped if possible by a good nurse, will in many cases bring the child back to health.

There is not as much paralysis as commonly believed. The reports of the outbreak in New York seem to establish this. On the 13th of July New York reported 1,600 cases of Poliomyelitis, bat only 403 of paralysis. Until we know more about that which produces the disease and how it is communicated from one person to another we, with our present knowledge, STRENUOUSLY RECOM-MEND the following precautions:

All excepting the doctor and the one nursing the person sick of the disease must keep out of the room set aside for the patient. If possible keep children out of the neighborhood in which the disease prevails.

Keep all insects out of houses, particularly flies. GUARD FOOD STUFFS FROM FLIES. Flies may carry the disease.

Feed children on cooked food as much as possible.

See that the outside of bread or biscuits is kept clean and away from flies. Wagons, trucks, etc., carrying bread should not be kept in horse stables.

Screen your houses and baby coaches or cribs or beds when the house is not fully screened.

The Department has literature on this subject which you can get upon written request.

THIS DEPARTMENT IS IN CONSTANT WARFARE TO PROTECT OUR FEOPLE FROM DISEASE. TO ACCOMPLISH THE BEST RESULTS WE MUST NOT ONLY HAVE THE CON-FIDENCE OF OUR PEOPLE BUT INDIVIDUAL AND PUBLIC CO-OPERATION.

Received Compensation.

Samuel Shimer, of McConnellsburg, was the first resident of this place to receive benefits from the workmen's Compensation Act. Mr. Shimer was in the employ

of W. H. Greathead in the heating and plumbing business, but on April 20th, Shimer was working in the Presbyterian Parsonage lot where Mr. Greathead lives. He pricked one of his fingers on a rose bush thorn, but, thought nothing of it at the time. Ten days later, on May 1st. the finger became so sore that he was disabled from working. It grew worse until he suffered greatly from a very sore hand. Mr. Greathead carries workmen's insurance, and the Fidelity and Casualty Company of New York promptly paid the Doctor's bill and half Mr. Shimer's accus-

tomed wages for the last thirtysix days of his disability period which was fifty days.

What makes the case interesting is, the injury was not reported for ten days after its occurence, as it seemed to be of a too minor nature; but when actual disability resulted, the Insurance Company recognized the facts as entitling Mr. Shimer to compensation, although the rule is that medical aid must be secured at the time of the injury. As the injury seemed too trifling this was not done until inflammation had set in. This will be of great interest to employers, as it proves a mooted question, namely, that their workmen are fully protected at whatever work engaged in for them. Mr. Shimer was not doing heating and plumbing work -his regular employment with Mr. Greathead-at the time of the injury, but was gardening.

Philadelphia may be increased in such amount that the total city debt of said city shall not exceed ten per centum" (10) upon the assessed value of the taxable property therein, nor shall any such municipality or district incur any new debt, or increase its indebtodness to an amount exceeding two (2) per centum upon such assessed valuation of property, without the consent of the electors thereof at a public election in such manner as shall be provided by law.
