One hundred and forty-seven estimates on average values of horses show that they increase in value until between six and seven years old. After that time the values decrease. A horse worth \$39 dollars at birth is worth \$250 in its sixth year, and \$101 when it is sixteen years old. It must be remembered that these are only averages.

**WHAT CATARRH IS**

It has been said that every third person has catarrh in some form.

Science has shown that nasal catarrh often indicates a general weakness of the body, and local treatments in the form of snuffs and vapors do little, if any good.

To correct catarrh you should treat its cause by enriching your blood with the cod-liver oil in Scott's Emulsion which is a medicinal food and a building-tonic, free from alcohol or any harmful drugs. Try it.
