**RHEUMATISM ARRESTED**

Many people suffer the tortures of lame muscles and stiffened joints because of impurities in the blood, and each succeeding attack seems more acute until rheumatism has invaded the whole system. To arrest rheumatism it is quite as important to improve your general health as to purify your blood, and the cod liver oil makes a valuable nature's agent blood-maker, while its medicinal nourishment strengthens the organs to expel the impurities and rebuild your strength. Scott's Emulsion is helping thousands every day who could not find other relief. Refuse the alcoholic substitutes.

A home-made lock-stitch awl is shown in October number of Popular Mechanics. A common darning needle is seated in an awl handle, the eye end sharpened, and the instrument used in same manner as those advertised for a dollar.

It is not necessary that you should be a Democrat to enjoy the healthful benefits of grape juice. Preserve the juice exactly as you would can or bottle the whole grape, and next winter, when some one is sick, you will have a nutritious drink "for their stomachs' sake."

At about 12:30 o'clock last Saturday night, a stone was hurled through one of the plate glass windows in the Daniel Grissinger building on north First Street. George W. Smith, who occupies the storeroom, said that he missed nothing from the window and that robbery could not have been the motive.

Agriculturist Frank Ranck, of Bethel township, has added to his barn until it is now as complete and up-to-date as, perhaps, any barn in the State. Briefly, he has added a covered barnyard which gives him mows and barn floors 100 feet long. The covered yard will be used as a night enclosure for the cattle, doing away with the necessity of tying up stock at night, and greatly lessening the work of cleaning out the stables.

**Horses and Kerosene**

You wouldn't expect your horse to work without good substantial feed, would you? He couldn't pull a load uphill or take a rig skimming over the road without the right kind of hay and grain.

It's the same with your lamp and oil stove. You can't expect a good, brilliant light and steady heat from inferior kerosene. Give them

of the three foregoing places, and requested to be put on the mailing list for the excellent free literature sent out from time to time. Some valuable information may be picked up this winter if this literature be permitted to find its way to the reading table.
