Dogs and Kerosene

You've seen a stray dog—thin, scary and half-starved. Let some one take him home and give him real food—he's likely to turn out to be an excellent watchdog and a fine companion for the children. Good food makes the difference.

It's the same with your lamp and oil stove. If they're smelly, smoky and bothersome—if you get hazy light and unreliable heat—you're using the wrong kind of kerosene. Give them

ATLANTIC Rayolight OIL

and you'll enjoy the fine, clear, brilliant light and the steady, radiant heat you've always wished for. Good kerosene makes the difference.

Atlantic Rayolight Oil is refined to the nth degree, from the highest grade crude petroleum obtainable. Always ask for it by name.

It doesn't smoke, smell or char the wick. It burns slowly—therefore is most economical. If you believe in preparedness, you'll load up a barrel of Atlantic Rayolight Oil. Be sure to look for the brand name on the barrel.

Trespass notices for sale at the NEWS office—6 for a quarter. Sent prepaid by mail if cash accompanies the order.

Instead of writing to all your relatives "out west," write the items on a postal card, mail it to this office, and we will tell the whole bunch of them at no more cost or trouble to you—they all get the NEWS. Try it a few times this fall and winter.

Rev. Charles Seville, who resigned the pastorate of the Minneapolis St. Paul's Lutheran church last spring to go to Gypsum, Colorado, on account of his health, has been re-elected pastor of the Minneapolis church and he has accepted the call and recently returned to that place.

T. E. Jackson, of Breezewood, brought his mother, Mrs. J. R. Jackson, of Akersville, and his brother-in-law and sister, Mr. and Mrs. E. R. Akers, of Crystal Springs, to see his brother, Attorney John R. Jackson and his family, a few days ago. They traveled in T. E. Jackson's car.

Wm. Bishop, who owns the Pott's Mill farm in Ayr township brought to our office last Friday morning potato tops that measured seven feet in length. The potatoes are of the Vulcan variety. And his crop were not all tops. He planted one bushel from which he had a crop of 36 bushels—all large enough for table use.

Before arranging to attend fairs this fall, it might be well to note that an epidemic of typhoid fever is raging in many places. Refraining from drinking water will not save you. The disease is being spread in milk, cream, and other ways, so that the "beer" theory of safety is not a good excuse any longer. You will have to eat something that contains the germs. Dauphin county is said to have nearly 600 cases.

Dr. Dixon's health letter this week is timely, in view of the epidemic of typhoid fever sweeping parts of the State, and if any of our readers should be unfortunate enough to be visited by the scourge, let them see to it that all germs passing from the patient's body are destroyed. Ask the Doctor how to do it. Ice cream shipped from one factory in Harrisburg has spread the disease in about a dozen counties, reaching as far as West Virginia.

Grafting Tomato and Potato.
State College, Pa., Oct. 10.—Eleven fully matured tomatoes and as many lifesized potatoes growing on a single plant in the vegetable gardens of the Pennsylvania State College marks the advent of the newest of the freak plants in the vegetable world. If

further experimentation proves its commercial value, the latest creation in plant life is expected to revolutionize vegetable growing by combining economy of space in the vegetable grower's garden with efficiency in plant growth.

The experiment was conceived and carried to completion by C. E. Myers, professor of experimental vegetable growing at the college. A potato was planted and on the stalk produced there was grafted a young tomato shoot. The union was protected with wax and bound with raffia, exactly as is done in the ordinary

grafting of fruit trees. A luxuriant growth of vine resulted. On the vine there were many tomato blossoms, and these developed into normal tomatoes. Under ground, at the same time the potatoes thrived as if they were growing under the stimulus of their own tops.

Piedmonts pay no duty
—no ocean freight
—no marine insurance

All the value of Piedmonts is in the cigarette itself—where it should be.

The reason is that Piedmonts, being made of Virginia tobacco, pay no duty. They're ALL Virginia tobacco—mild, and mellowed by Virginia's golden sunshine.

If you ask a tobacco expert, he will tell you that Virginia is the best cigarette tobacco on earth.

"A package of Piedmonts, please."

Liggitt & Myers Tobacco Co.

An ALL Virginia Cigarette—

Piedmont
The Cigarette of Quality

NOTE:—It is impossible to sell a package of 10 cigarettes of all Turkish tobacco for 5c. Not that this Turkish tobacco costs more than Virginia, but because duty, ocean freight, marine insurance, and expensive handling charges must be added to the cost of all Turkish tobacco. But Piedmonts, made of highest-grade Virginia tobacco, have none of these valueless expenses. All their value is in each cigarette.
