Gravity Water System.

"The number of farms in Pennsylvania that could put in a good gravity water system is almost without number," says Charles G. McLain, water supply and drainage engineer of the Pennsylvania Department of Agriculture. "There are about 220,000 farms and many thousands of them could have a good water system without any very great cost.

"If one only stops to consider the amount of labor saved the farm women, the cost of a water system would not seem at all exorbitant. The farmer does not usually hesitate very long when it comes to buying some labor saving machinery for use in the fields, so why should not the good housewife have some conveniences for her use? Think of the energy required to pump and carry the amount of water used in the house during the day, and also the number of extra steps required if the water must be carried from a spring at some distance from the house.

"The water system will not only be for the house, but for all the farm buildings as well: the barn, pigpen, chicken coop and any other buildings in which you may want water.

"If this system is put in, think of the many conveniences that can be put in use. Hot and cold water in all parts of the house, bathroom and inside toilets. The pleasure of the bath alone is one great factor in favor of water in the house. After a hard day in the field, or at any labor about the farm, a nice refreshing bath is surely something pleasant to look forward to.

"It will behoove the farmer to look over the good springs that he may have and begin to think of something of this kind.

"The cost is not so great in most cases and the pleasures of one year will convince the owner that he would not dispense with it for many times the cost.

Wooing The Women.

What women are our statesmen making the greatest effort to win over to their side? The women who have only indirect influence? No: the women who have votes. More endeavor is being put forth to persuade women in twelve enfranchised States than in all the rest of the country. The political leaders care comparatively little what the women think elsewhere; but they are acutely anxious as to what the women think in those twelve States. It is an object lesson on the fact that power always commands respect.

Supervisors' Meeting.

The annual meeting of the Fulton County Supervisors Association will be held in McConnellsburg on Wednesday, November 22nd at 10 o'clock Mr. G. L. Sollenberger will address the meeting. It is the duty of all supervisors to attend these meetings.—J. W. Truxel, President.

He holds a good position with a railroad company as foreman of construction, and at the same time manages a good farm that he owns in the Sunflower State.

The second local institute of Ayr township was held at Laurel Ridge, October 27th. Prof. Thomas was present and assisted in the discussion of the questions: 1. District Examinations, 2. Grammar, How Taught? All the teachers of the township were present; also Miss Wallace, of Belfast, and Misses Truax and Winters, of Thompson. The literary exercises of the school were enjoyed. The first local institute, of Wells township, held at No. 2 School Friday evening, October 27th, was called to order by the teacher, Miss Eleanor Sipe. A literary program was well rendered. The questions for discussion were: 1. Opening exercises. 2. Alternation. 3. Co-operation. Opening exercises should be brief and interesting as a good day depends upon a good beginning for "well begun is half done." Physiology and Civics may be successfully alternated by completing Physiology and then taking up civics as interest is, in this way, better obtained. Agriculture and Reading may be alternated in the same manner. The directors, patrons and teachers should all work together. The teacher knows what pupils try to please and help along with the work, but he or she should try to help each pupil, individually,

as much as possible without showing partiality. A number of patrons, two directors, and all the teachers of the township were present. The next local institute will be held November 10th at Pine Grove No. 1. Questions for discussion: 1. Importance of home study. 2. Reviews. 3. Tardiness.—Araminta Duvall, Secretary, Pro. Tem.

The excellent program which had been prepared

gave much credit to both teacher and pupils. The next institute will be held at Cedar Lane November 17th; Etta Waltz, Acting Sec'y. The first local institute of Taylor township was held at Waterfall, October 20, 1916. Owing to the inclement weather there were only two teachers present—Miss Beatrice Mellott and Thad Winegardner.
