Candidates' Announcements.

FOR ASSOCIATE JUDGE.

I hereby announce myself to the voters of Fulton County as a candidate on the Non-Partisan ticket for the office of Associate Judge, subject to the decision of the voters at the Primary Election to be held Tuesday, September 18, 1917.

I pledge myself that if nominated and elected, I will discharge the duties of the office fearlessly, honestly, and to the very best of my ability. I respectfully solicit the vote and influence of all who deem me worthy of support.

DAVID A. BLACK,
 Taylor township.

FOR ASSOCIATE JUDGE.

I hereby announce myself as a candidate on the Non-Partisan ticket for the office of Associate Judge. I pledge myself to abide by the decision of the voters at the Primary Election to be held September 18, 1917, and if nominated and elected, to discharge the duties of the office to the best of my ability, fearlessly and honestly.

FRANK MASON,
 Todd township.

FOR ASSOCIATE JUDGE.

I hereby announce myself as a candidate on the Non-Partisan ticket for the office of Associate Judge, subject to the decision of the voters at the primary election to be held Tuesday, September 18, 1917.

If nominated and elected, I pledge myself to discharge my duty fearlessly and honestly. Your vote and influence respectfully solicited.

GEO. B. MCKE,
 Todd township.

FOR ASSOCIATE JUDGE.

I hereby announce myself as a candidate on the Non-Partisan ticket for the office of Associate Judge, subject to the decision of the voters of Fulton county at the primary election to be held Tuesday, September 18, 1917.

If nominated and elected, I pledge myself to discharge the duties of the office fearlessly, honestly and to the very best of my ability and judgment, and respectfully solicit your vote and influence.

J. CLAYTON HIXSON,
 Union township.

OAK GROVE.

March 5.—Mr. Harry Benson, son of Mr. and Mrs. James Benson, of Oak Grove and Rhoda Rupert daughter of Mr. and Mrs. Wm. Rupert were united in marriage February 22nd at Huntingdon. May their sailing through life's sea be smooth!

Lydia Heefner has returned home after having been employed at G. N. Barnett's for a couple of weeks. We are glad to note that Mrs. Barnett is better at this writing.

Charles Lamberson helped to move Mrs. Joe Laidig and family of Broadtop City to their farm at the State Road.

Mr. and Mrs. Meade Bollinger visited at the former's parents Daniel Bollinger's recently.

Mrs. Bruce Shore and daughter Mae visited at James Benson's last Sunday afternoon.

Dawson Strat, of Gracey visited his sister Mrs. Alice McClain recently.

Preston Taylor assisted David Gladfelter to deliver some cattle to Three Springs last week.

O. L. Wible and family visited at Harry Bollinger's last Sunday.

HIDES.—Frank B. Sipes pays the highest market price for beef hides at their butcher shop in McConnellsburg, also highest price paid for calf skins sheepskins and tallow.

Advertisement.

Help a good thing along, go to see The Old New-Hampshire Home at the Auditorium next Monday night.

No Rest—No Peace

There's no peace and little rest for the one who suffers from a bad back, and distressing urinary disorders. McConnellsburg people recommend Doan's Kidney Pills. Be guided by their experience.

Riley Peck, shoemaker, McConnellsburg, says: "I was troubled with my kidneys and had soreness in my back. I was dizzy at times and it affected my eyes. I had to get up often at night on account of the kidney secretions and I was tired out in the morning. The doctor gave me only a little relief. Two boxes of Doan's Kidney Pills, procured at Tront's Drug Store, gave me great relief."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Peck had Foster-Milburn Co. Props., Buffalo, N. Y.

MULE HAS LOST PRIVILEGE

Southern Pacific Refuses to Furnish Private Car to Animal Who Used to Travel in Luxury.

A bas le mule!

The Southern Pacific says so. No more, says the San Francisco Chronicle, shall one mule arrogate to himself the daily use of a private car, thereby contributing to the car shortage.

While all the world has been shouting for cars, it seems that one Fresno farmer has hit upon a scheme to keep a freight car continuously at his disposal. Every morning he shipped a carload of hay from Fresno to Floyd, nine miles distant. Every evening the car came back to Fresno to be ready for the morning load of fodder.

How did he do it, when other shippers were plastering that car with requisitions?

It was easy. Every morning, after the hay was loaded, the farmer trotted his mule down to Floyd, loaded him into the car and shipped him back to Fresno. Thus the car was always his.

The scheme worked for ten days and ten trips for the mule in the private car. But it is no more.

Southern Pacific headquarters found it out. From the Flood building went forth an order that the hay car should continue its journey after reaching Floyd, in order to give some other shipper a chance. And if the mule is offered as freight back to Fresno, ran the order, put him in a car with tinware or crockery.

No more private cars for mules.

DOESN'T KNOW HIS BUSINESS

Punster—What in the world is the matter with the managing editor?
 Jester—He's worried because he isn't quite sure that he ought to cut down football space to make room for politics, or vice versa.

SAFETY FOR DRIVERS.

The bureau of standards has been experimenting to secure a means of overcoming the fogged glass which obscures the vision of a chauffeur or motorman in rainy weather. Glycerin properly used will overcome this difficulty. It has been used by locomotive engineers for years, but the bureau has thoroughly tested its efficacy with a view to recommending its wider use. The glass should be thoroughly cleaned and then rubbed with a cloth wet with glycerin. When the drops of water strike the coated glass they coalesce, forming a smooth, transparent film, which is no obstruction to vision. The uncoated glass becomes covered with separated drops, which completely befog the surface.

DOING, NOT TALKING.

That we can prove our faith by our works is no new thought, but at this season of the year when, having turned a fresh page in our lives we point with pride to the many things we intend to do during this year that is just beginning. It is well to keep in mind the fact that we can accomplish far more by doing than by saying, says Charleston News and Courier. So many of us for one reason and another procrastinate entering upon the actual accomplishment of whatever tasks we assume, but this procrastination does not prevent us from noising abroad the news of what we mean to do. We

are quite likely on occasion to tell anybody we may chance to meet the plans we have made for the future; we talk about what we are going to do with as much confidence and even with as much pride as though we already had achieved successful results. And then, because life is so uncertain and because we do not make allowance for our plans going astray, we awaken suddenly to the fact that we have only been talking and not doing, and that because we missed the golden moment when it was in our minds we have made our faith but idle words. If we mean to do something real and earnest in life, something that we hope will prove our worth and our ability, we shall stand a far better chance of success if we simply go to work without advertising the fact far and wide.

WEARING WRIST WATCH.

You may weigh 200, your name may be Bill, and you may have a voice like a tuba, but you can wear a wrist watch without fear of any person properly addressing you as Reginald or Percy. In short: the wrist watch is no longer a sign of effeminacy when worn by men, says Washington Post. Some of the huskiest Americans of the day wear a timepiece strapped to the wrist when riding or playing golf. Becoming accustomed to crooking the elbow to mark the time of day when occupied in sport, they find it easy to continue the wearing of the wrist watch when going about some serious affairs. The development of golf, more than any other one thing, has been responsible for the adoption of the wrist watch by men not in military service. The golfer who has his eye on the ball wants to be diverted from the job as little as possible; yet he has to keep in mind the time that he is due home for dinner. The easiest way to do it is to wear a wrist watch. Such a watch may be bought for as little as \$2.50, strap and all.

There are tendencies of the age that every true man should resist; not to overwhelm them, perhaps, but to confine them to their proper sphere. For instance, the tendency toward amusements has gone mad. It is all right within reason, but it goes beyond reason and holds itself out as the main purpose in life. Many people are not happy unless they are amused. They scarcely have room for a serious thought. The reality of the ideal is not inside their comprehension. They abuse sports, shows, dances, cards, etc., by making them the end of life. Such a course destroys personality and the public spirit. No man or woman who believes in true progress or has a respect for religion will train in that habit. They will be positive for the right, the good and the pure. The sin of the age is the lack of noble ideals and the fear of standing up for them.

The great American peanut is broadening its empire. The crop grows even faster than the peanut-esters multiply. The demand which bulges at county fairs and baseball games and jogs along steadily in every town and hamlet all the year through is not equal to the increased supply. But the peanut does not suffer. The oil industry balances the score, says Cleveland Leader. The nuts the millions of peanut-eaters don't eat can be swallowed easily by the mills which make peanut oil and peanut meal. The oil is a welcome and very good addition to the food supply of the country. The meal gets the same end less directly. Cattle and swine eat it and then they are eaten in turn. This year Texas alone expects to make about 60,000 barrels of peanut oil. There will be 40,000 tons of peanut meal as a side product. These figures will doubtless be far surpassed before long. Ultimately a great deal of soap may be made in the United States, as it is in France and other countries of Europe, with peanut oil as one of its ingredients. So the peanut is not only holding its own, but widening its field of usefulness. It is one of the products of American agriculture which are as promising as they are popular.

An official report upon the rise of prices in the various countries since the outbreak of the war, issued in London, shows that in England it has been 68 per cent in the cost of food alone, for rents, which enter into the cost of living to a very large degree, have not risen. In Berlin the rise has been about 158 per cent. In Austria 178 per cent. In the Scandinavian states about 54 per cent. In Australia 30.5 per cent. In New Zealand 19.3 per cent. While in Canada the rise has been only 18 per cent. The very great rise in Germany and Austria is attributed to flooding the country with a vast amount of paper money. There was no report on the rise in prices in the United States, remarks Omaha World-Herald, but the ordinary wage-worker is inclined to insist that it is about 500 per cent.

News comes from London that city-bred girls enlisted in the back-to-the-soil movement have proved failures. They liked the romance of the country, but balked at the work. This is where the adaptability of the American girls would prove them superior in the like experiment. The latter would enjoy the romance the more for the pluck with which they refuse to be daunted by the work.

The considerably elevated financial schedule required in connection with the maintenance of human life in this, and other sections of the planet, has struck the Texas Jack-rabbit, hitherto hunted only spasmodically, but who now is to be manufactured, in large numbers, into sausage.

NEVER HARD TO FIND FAULT

But No One Who Has the Unfortunate Habit Ever Found Himself Extremely Popular.

It is much easier to pick fault with others than to correct yourself. It is better to be forbearing. No one likes others to be exacting of him about every little mistake or folly. Be not so to others. Be ready to overlook small things, to make allowances. Because you can do this or that or live so or so, it is not to be expected that everyone can do or be the same. Though you may think your way the best, someone else may have just as good ideas—or better. Who made you judge that you can make laws for all? Do you want to toe the mark of another's making? If not, do not expect others to come up to your line. Live your own life the best you can and while you try to help, leave the lives of others to their creator for judgment. A habit of dictating grows on one. It is better to watch out and stop yourself before you begin. If it is part of your business to direct others, do so in the right spirit, with a respect to their rights and your own self-respect. Nagging is belittling to yourself and does harm, not good. It improves or reforms no one. A habit of finding fault renders one disagreeable. Make criticisms and suggestions with great care. Seek what you can commend and emphasize that.—Milwaukee Journal.

HAVE SENSE OF DIRECTION

Feathered Creatures' Ability to Know Their Whereabouts Given an Explanation.

Prof. K. S. Lashley has completed an investigation of the sense of direction in birds. This is called the problem of "orientation." To "orient" means in straight English to know where you are.

Doctor Lashley used the wild bird of the Florida keys, known as nobby and sooty terns, in experiments. In their recognition of their nests, it was found that their eyes as well as their muscles are concerned, says Popular Science. The birds showed no evidence of any special sense of locality such as a "magnetic sense" or a "second sight." Birds are no more "mind readers" than men are.

Nor do they have any ability to retrace their paths of flight by memory. They recognize their nests and their own young by muscle habits and eyesight.

Dr. F. A. McDermoth, another investigator, has observed the oddities in the behavior of houseflies. They have a strong tendency to go with air currents between 80 and 100 degrees. This explains why flies are so bad in hot weather, when it is about to rain. The heat usually ranges toward 100, and the air travels along too slowly to cause the vapor in it to evaporate. The heat, humidity and slow movement of the air give the housefly its "fly time." As pests, they are then in their glory.

OXYGEN FOR WOUNDS.

One of the newest therapeutic measures developed in the European war hospitals is the healing of deep and obstinate wounds by oxygen. It is introduced into an electrical machine, which converts it into ozone. A fine tube running from the machine to the wound conducts a continuous flow into the most remote crevice of the wound. The ozone not only heals the wound quickly but eliminates the use of bandages and surgical dressings, which frequently cause the greatest pain. Obstinate wounds which have refused to heal for months have been quickly improved by the introduction of ozone.

OH, OF COURSE.

"White," remarked the temperance worker, "is the emblem of purity and innocence."
 "That explains it," said the matter-of-fact co-worker.
 "Explains what?" asked the first worker.
 "Why bartenders always wear white coats," replied worker No. 2.

COMPARATIVE METHODS.

First Boy—My dog licks everything with his tongue.
 Second Ditto—Mine licks everything with his teeth.

COMPENSATIONS.

"I am sorry your wife has such a bad cold."
 "I'm not. She can't speak above whisper."

WHEN PROPERLY DRIVEN.

Knicker—The camel cannot pass through the needle's eye.
 Bocker—But the reindeer have no trouble getting through.

FATHER'S CHRISTMAS.

"Well, what did you get on Christmas?"
 "A notice from the bank that my account was overdrawn."

DELCO-LIGHT
 ELECTRICITY FOR EVERY FARM

DELCO-LIGHT MAKES ELECTRICITY UNIVERSAL

For the first time electric light and power are available to anyone—anywhere. Heretofore, the benefits of electricity have been confined to those who live in the larger towns and cities. Now Delco-Light makes electric current universally available.

Delco-Light is today furnishing thousands of farm homes with brilliant, convenient, safe and economical light. It is furnishing power to operate pumps, washing machines, churns, cream separators, milking machines, vacuum cleaners, etc. It is lighting country churches, stores and public halls. It is furnishing light and power to summer homes and camps, to houseboats and yachts, etc.

It is lighting rural railway stations and construction camps. It is lighting the camps of United States troops on the Mexican border and it is disclosing heretofore undreamed-of beauties in the depths of Mammoth Cave, Kentucky. (Altogether, over 15,000 Delco-Light plants are in operation, and Delco-Light offices are to be found in almost every part of the world.)

Delco-Light is a complete electric plant—the engine and dynamo in one compact unit combined with a set of specially built and wonderfully efficient batteries for the storing of current. The plant is so simple a child can care for it, and so economical that it actually pays for itself in time and labor saved. It operates on either kerosene, gasoline or natural gas.

UNITED STATES DESTROYER JACOB JONES

MERELY GOOD BUSINESS.

"Are you a philanthropist, sir?" asked an old gentleman of a young man, who was distributing a quantity of butterscotch to some children. "Am I a what?" said the young man; "a philanthropist? No, sir, I am a dentist!"—Irish World.

NOT ALWAYS GOOD.

"Don't you admire a high brow?" "Yes; unless the expanse of brow is due mainly to a condition of swelled head."

HE DIDN'T CARE.

Passenger—Conductor, an old man has fallen off the car!
 Conductor—That's all right; he paid his fare!

A FAILURE.

"Did you get acclimated when you went to Cuba?" "Yes, and by the best doctor I could find, but it didn't take."

RUBBER.

Bright—There is one thing I don't like about you.
 Dull—What's that?
 Bright—My raincoat.

HOW BROWN HAS FARED.

Chubbs—Have you heard Brown's latest joke?
 Dubbe—Yes, it's rather worse than the other one he had.—Judge.
