HOW FAR IS KNOBSVILLE?

Not So Far That the Statements of Its Readers Cannot Be Verified.

Rather an interesting case has been developed in Knobsville. Being so near by, it is well worth publishing here. The statement is sincere—the proof convincing: J. C. Fore, Knobsville, Pa., says: "A severe cold settled in the small of my back. My kidneys troubled me badly at times and the kidney secretions were painful in passage. I was lame and stiff from rheumatic twinges and my wrists became swollen. I got no relief from the doctor's treatment. Finally, I used Doan's Kidney Pills and after one box, I felt relief. Whenever I take cold now and am troubled by my kidneys Doan's Kidney Pills always help me."

Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Fore uses Foster-Milburn Co., Props., Buffalo, N. Y.

Mrs. Geo. W. Hays and Mrs. J. M. Spangler and baby went to Everett on Tuesday to remain several days.

Apple Crop.

While the apple crop in this section of the state is perhaps little more than half what it was last year, the quality is fine, and apples growers will realize handsomely. Monday, the Cumberland Valley Fruit Growers' Association made their first shipment. They were of the yellow transparent variety.

The Mount Alto Orchard Company forwarded its shipment of early peaches to the eastern markets. The products are handled by the Cumberland Valley Fruit Growers' Association. Although the first shipment is not a large one it will shortly be followed by others.

While the apple crop is estimated at from 50 to 60 per cent. of last year's crop, growers are already making preparations to handle the out-put. J. Mac. Flickinger of near Fannettsburg has laid in a supply of 2500 barrels for his present crop and the Eagle Mountain Orchard Company, near Scotland, has placed an order for 4,000. The crop of the Mount Alto Orchard Company estimated at from 4,000 to 5,000 barrels.

Swine Experiments Started.

The Pennsylvania State College school of agriculture and experiment station has started an experiment to compare self-feeding and hand-feeding of pigs. The object of the experiment is to determine the economy and rapidity of grains in producing hogs for the market when the self-feeder is used in comparison with hand-feeding on forage crops; to determine the profit from hogs fed by these two methods; to observe the lasting qualities of mixed forage as an all-summer crop for growing or fattening swine; and to observe the development of breeding animals under the two systems of feeding. Two lots of twenty-five pigs each are to be used in the experiment. The results will be tabulated and published upon completion of the test.

SHOES! SHOES!

We have sold more shoes in one month this year than in last two years. Why? because we had them on hand and didn't advance the price and we are still doing the same thing.

The same is true of our clothing. We have a nice line at old prices and will sell that way until all sold.
