

# Charred WICKS

**Why?** You have an old pair of scissors handy. You keep snipping a little here, a little there, trying to keep the flame even. The same thing every evening; but don't blame it all on the wick. If you use

ATLANTIC  
**Rayolight**  
OIL

Instead of ordinary kerosene, you won't have charred wicks. There's a great difference in kerosenes. Rayolight Oil is so perfectly refined and scientifically purified that it always gives a sure, true light and an even, steady heat without smoking, sputtering or any nasty burry odors. Results like that are worth being particular about. Insist on getting Rayolight Oil. You'll always find it at stores that display the sign: "Atlantic Rayolight Oil for Sale Here." That store is a good place to deal regularly, too.

It's a scientific fact that, of any artificial light, a kerosene lamp is the most restful and pleasing to the eyes.

#### Traveling in Comfort.

All the conveniences of a sea-going pleasure yacht have been provided for in a one-ton truck which started on a journey from Boston to Seattle a few weeks ago and which is described and illustrated in the December Popular Mechanics Magazine. Immediately back of the driver's seat is a steel framework supporting three spring beds, one above the other. To the rear of the beds the body of the car takes on the aspect of a kitchen and dining room combined. On one side is a gas stove, a set of drawers, a sink, and a cupboard. On the opposite side is a bureau with eight drawers, and an ice box with a capacity for 50 lbs. of ice.

#### Notice.

I feel that God is calling me to evangelistic work. I am only an old Methodist class leader, and I have a license as an exhorter. God has shown me some wonderful things on the prairies of North Dakota, and I believe He wants me to help spread scripture holiness. If any one needs, or desires, my help, write me. I would like to mention here that I am Mattie Foreman's husband, and I would like to get acquainted with the Pennsylvania folks.

Hot chocolate—10 cents. THE KNITTING COMMITTEE.

## Good Citizenship

A bank account makes a good citizen. That's a broad assertion but it is universally true.

A good citizen is one who is independent, self supporting, and who does things conducive to the best interest of the community. The man who has a bank account is independent, he is able to pay his way and he contributes to the general wealth of his community. His funds are in circulation. He pays taxes and helps to make things go. Likewise a man who has money and property in a community is anxious to see that the community prospers. We pull for the man with a bank account.

#### Thanksgiving.

President Wilson in his Thanksgiving Proclamation makes no attempt to recount the specific things for which the Nation at this time has cause to be grateful. Had he particularized doubtless he would have given the result of the Second Liberty Loan a prominent place among those things for which the Nation should be thankful.

For the great result of the Second Liberty Loan campaign, with nearly 19,000,000 Americans rallying to the financial support of the Nation and subscribing over four and a half billion dollars for the purchase of Liberty Loan Bonds, is a cause for deep thanksgiving in the heart of every loyal American.

President Wilson says the Nation should be thankful that we have been given the opportunity to serve mankind as we once served ourselves in the great day of our Declaration of Independence by taking up arms against the tyranny that threatened to master and debase men everywhere.

So, too, can all subscribers to the Liberty Loan be thankful that they have been given an opportunity to aid in this great mission of America and have done their part toward giving to the world liberty and justice and security from the tyranny that threatens to master and debase all nations and all men.

Every purchaser of a Liberty Loan Bond has struck a blow for human liberty and for civilization and humanity. Let them remember this on Thursday, the 29th day of November, and be thankful.

#### The Wagon Wheel Paradox.

A very interesting paradox is the one concerning an ordinary wagon wheel, which is solid and rigid, yet, when fastened on its axle on a wagon, when the wagon moves part of the circumference of the wheel which is in contact with the ground is for an instant at absolute rest, while the point directly perpendicular to it is flying along at a high rate of speed. The two points horizontal with the center of the wheel are traveling pretty fast, but only half as fast as the top-most point increases in speed the downgoing one slows up until it is at rest for a moment when in contact with the ground. Yet the wheel is one solid piece and there are only two points going at the same rate of speed at the same time. Yet if the wheel is taken off the axle and rolled down an incline every point of the circumference moves at the same rate of speed.

#### Does This Apply to You?

It is peculiar that a man who owns a bunch of cattle will go out to look at them every few days, but not once in the whole year will you catch him at the school house where his children are getting their education. Yet it will always be a fact that the intelligent interest in school will be a fundamental necessity in their education—C. G. Sargent.

#### Recommend Mince Pie.

Food conservationists have decided that the American mince pie comes as near providing a wide range of conservation substitutes as the National Food Conservation Commission will be able to suggest.

According to statistics just issued the mince pie with the official indorsement of the conservationists offers no less than 354 calories per ounce twenty-four hours after baking. If kept for two weeks its food value materially increases. Two average size pieces of mince pie, it is said, if eaten with a glass of standard milk, will afford the equivalent of two eggs, two scruples of butter, one ounce of baked beans,

one quarter ounce of lean and three ounces of corn. Since mince pie has been covered to be a valuable iute in the food conservation programme, Food Director will be petitioned to permit use of sugar, lard, suet in their making until Thanksgiving.

Mrs. Jennie Houck, wife of the late Ephraim Houck, left for her home in Ohio last week after having spent about two months visiting her Pennsylvania friends. She was accompanied to Chambersburg by Miss Lizzie Foltz, who spent two days among the friends of the late Mrs. Houck.
