

VOU know there's a difference in coal. There's a difference in kerosene, too: The one kerosene that always gives a bright, clean, odorless mellow light or a steady, warming heat without smoke, sputter or charring of wicks is called Rayolight Oil. Why? To distinguish it from ordinary kerosenes. It's so highly refined and purified that it gives these perfect results yet costs no more than the other kinds.

Instead of just asking for kerosene, look for the dealer who has this sign on his store: "Atlantic Rayolight Oil for Sale Here." You'll find it a quality store—a good place to do most of your buying.

It's a scientific fact that, of any artificial light, a kero-

Snow Plows For State Roads.

The state highway department is cooperating with the federal Government in trying to avert a coal famine and to relieve the freight car shortage. State Highway Commissioner J. Denny O'Neil said: The department will endeavor to keep the war emergency roads open during the winter, especially the Lincoln Highway, and in order to do this has purchased fifteen snow plows. They will be attached to the fiveton trucks of the department.

It is essential that the main roads of the state be kept open, the commissioner said, for in every section of the commonwealth motor traffic has increased rapidly. Manufacturing and wholesale companies are now delivering their goods by trucks instead of freight, and many towns would now be suffering from a coal shortage were it not for the large amounts of coal hauled in motor trucks.

Commissioner O'Neil said that the new 1918 license plates are now ready and that it would be a big help if automobile owners, particularly truck owners, would apply for their licenses as early as possible. There will be no occasion this year for extending the use of 1917 license plates but unless applications are made early, there will be great congestion that will cause delay at the first of the year.

Up to November 19, there were 546,740 licenses of various classes issued for the year 1917.

Cause of Sugar Famine.

The present crisis in the sugar market is partly explained by the fact that more than twothirds of the source of Europe's sugar supply is within the present battle lines. This has resulted in reducing the production of sugar in Europe. England and France and other countries have been forced to go for sugar to

Formerly, nearly all of the Cuban raw sugar came to the United States and was refined here, chiefly for home use, but this is not the case now, which accounts to a great extent for the present situation.

The Horrors of War

Those who have not experienced the horrors of war only know of its terrors by "hear-say" but even then it's bad enough.

But terrible as death on the battlefield may be, it has no more terrors than some other things, a life of grinding, pinching poverty, for instance. Death amidst the roar and crash of battle is trightful but death is at least mercifully the end. But to live and struggle on from day to day in poverty, possibly under a load of debt, but little hope, just struggling along wearing the life away by inches, that takes courage and is enough to try the stoutest heart. The way to avoid this is by systematic saving. Our bank will do its best to save you from a fate worse than the horrors of war.
