

# Grow Grain in Western Canada, Make Profits, and Show Greater Patriotism.

The nation-wide cry of "More Effidency" has now reached even the most remote agricultural sections and there is a general interest amongst the farmers to increase their products and to reduce their expenses. The need of foodstuffs is greater than the world has ever before known, and every effort is being used to meet the world's food requirements, becoming more apparent every day. While it is true that this desire is attested by a general patriotism, there is an underlying factor in this extension work to secure some of the benefits that are being offered by a ready market at maximum prices. Wide-spread attention has been given to the opportunity in this respect in Western Canada, where fortunes are being made in a few crops out of grain at present prices.

It has been found that the open, level prairie can be cultivated for wheat and other small grains at a minimum price, and during the past few years the yields have been more than satisfactory. Wheat crops of forty hushel to the acre have been common in Western Canada in the last three or four years, and with a present available price of over \$2.00 per bushel this means a return on investment and labor that cannot be duplicated elsewhere. This is made possible by the low priced lands that can be secured for grain growing. The range in price runs from \$15 to \$25 per acre, according to location and other local conditions. In this period of "more agricultural efficiency" it is apparent at a glance that the farmer on low priced but high grade lands, growing his grain at a minimum cost, is reaping a golden harvest with the highest percentage of profit.

The cultivator of high priced farm lands has a big handlcap to overcome in computing his profits on a \$200 an acre farm as compared with the agriculturist reaping as great, if not greater return from \$25 an acre land. It therefore becomes a question for the farmer himself to answer, whether he is doing himself and his country the best service, by devoting all his energles to working high priced land that yields no better return than land that can be secured at one-eighth the price. It is a case of getting either minimum or maximum quantity. Many have already decided on the alternative, and with their spare money invested in and now working Western Canada lands, they are allowed to speak for themselves. Apparently they are satisfied, for we learn of cases where on a \$4,000 investment, in one year they have had their money back, with a profit of from 50% to 100%. Such is one of the steps in progressiveeffort to create greater efficiency. The Canadian Government is using every effort to bring these conditions to the attention of the agricultural world, in order to secure the necessary increased grain production so greatly needed. The farmer in Western Canada is exempt from all personal taxes. His buildings, stock and implements are not assessed; and every encouragement is given to farmers to improve and increase their farm output. Reduced railway rates are being offered to new settlers to look over the country and to size up an unprecedented opportunity in farming. - Advertise-

seized with a fatal paralytic stroke. From Masterman's body Paget secures documents bearing upon the discovery and proceeds to the home of the scientist. Paget proceeds to sea on his submarine, the F55, and encounters a German cruiser. He sinks the enemy, which had destroyed the Beotla, on which Ida Kennedy, his finncee, was a passenger. The girl escapes in a small boat. He rescues her, but finds himself unable to take the skiff to the submarine because of invisible forces, Paget, Ida, Midshipman Davies and Seaman Sam Clouts barely escape death. Clouts plays the mouthorgan.

able commercially.

CHAPTER VI-Continued.

Donald heard him leap into the torpedo room below. A moment later his voice came up the funnel. "I'm ready for the lady, sir I" he called.

Donald raised Ida in his arms and owered her through the tube. "After you, sir," said Davies.

"I have assumed command, Davies," Donald replied. ensities. "Very well, sir," said the middy qui-He was a thief. etly, and descended. Donald followed

events of this past guarter have reference to Judah alone from the days of Hezeklah, B. C. 722, to the time of the destruction of the city and the temple being destroyed 586 B. C. and lastly we have the period of the exile from the first captivity in 605 B. C. to the restoration and the new temple being erected 516 B. C. This was a period of great discipline and sifting as like unto wheat or of a purifying fire.

through the work of Elljah and Elisha

the prophets. The final period of

The return from exile and the new spiritual nation, dates from about 530 to the close of Bible history, say 400 years before the coming of Christ. A map should be used, and the scholars ought to be familiar with the contem poraneous secular history. There are several particular lessons we ought for learn from this history.

First: Every failure, every moral wrong, every fall into idolatry, every diminution of power for good is the result of a separation from God,-a departure from the ways of God and righteousness. It also shows us that God's constant solicitude that the Jew should be kept separate from heathen ism and idolatry, had in it the best interests of his own people and could only lead to those blessings which he had prepared for his particular people

Secondly: The overthrow of Israel is directly attributed to its complete abandonment to idolatry. Beginning with false worship and a dependence upon men, there was the introduction of idolatry and a development of evil which led to a rapid decline, the in troduction of nevolutions and the final extinguishment of the kingdom.

As to Judah, it finally was brought into captivity because that was the only way that God could purge the nation from the sin of idolatry. They must be taught that there is but one God, that the word of God must be obeyed, and that their safety lay ir the fait, which they placed in his promises. The leaders of this period were Zerubbabel, Ezra and Nehemiah herole men, men of great consecratior and power ; also, Esther, the heroine The prophets of this period are Dan tel, Isniah, Haggal, Zechariah, Malachi Notice how each and every one aided the cause of righteousness, stood for ourity of thought and action. During the time of the restoration the temple was completed, worship was restored separation from heathenism became permanent, the Sabbath was kept ; the Bible was studied and impressed upor the people; there was a clearer visiot of their mission in the world the ideals and hopes toward which they should strive clearly stated (see the prophetical writings); and a pure righteousness established.

There are two great heroes of th return, Ezra and Nehemiah. Take up the actions of each and show how he proved his heroism. A good method of receiving the past quarter will be to summarize the teachings which cen ter about these two great men. Th period of the return is the one that we should emphasize, showing how a return to God and an opedience of his law is the paramount need of the pres ent day in which we live, these days of darkness and evil upon which the world has fallen.
