Suddenly Davies' voice came up in getful of Clouts' mouth organ, began agitated tones. "Donald !" he cried. to draw toward the submarine again. "It looks as if the monsters are fol-Iowing MacBeard after all ! Don't you see, they are with him, not us?"

"They wouldn't keep us in the center necessarily," said Donald. "Yesterday ship and seemed to fill the universe. we nearly lost them."

"But then-do you suppose they are leading us somewhere?" "I don't know," Donald answered,

"Full speed !" Donald, hazarding rocks, drove the

F55 hard between the mighty walls of granite. In front of him he saw an open body of water, ringed with faraway hills. He was in Skjold fjord. But not a vestige of the monsters was before it. In an instant the steering to be seen.

Once through that gateway he lashed the wheel and went on deck. The quarry had disappeared. A glance assured him of that. The limpid water of the fjord lay motionless before him. Behind him the passage seemed to have closed.

He rushed back into the conning tower.

"Shut down !" he yelled to Davies. "Tell Clouts to let the anchor go. Mac-Beard has beaten us."

Davies, released from duty, rushed up, to find his chief standing at the entrance to the conning tower, a prey to abject despair.

"It's finished, Davies," he said wearfly. "We're beaten. There's a missing factor in-that-damned equation of yours."

And he toppled over into Davies' arms, insensible from want of sleep. The tension of his nerves was broken. Davies and Clouts carried him to his cabin and laid him down. They re-

turned to the reck, almost equally despairing. "The herd has left us, Clouts," said

the middy. "I don't know-I can't understand it. Clouts," he continued, with a sudden inspiration, "do you think that you could induce the queen to sound that call again?"

"What, me, sir?" inquired Clouts, starting back. "Why-she's not a woman, sir, she's a devil incarnate! The won't eat, sir." His voice fell to A husky whisper. "And she won't wear the captain's blankets, sir." "Perhaps she doesn't like them, Clouts. However-what are we to do?"

"I say, make for home, sir," said Clouts. "I never took no stock in the whole thing, Mr. Davies."

"What are you talking about, Clouts?"

By such man rose from his apelike MacBeard had seen them. He was working frantically at the engine. The ancestry. By such, some day, wars and all wrongs will cease. inland sea still heaved, but it was be-Donald tore the coat from his ginning to subside as the monsters, for-

LESSON FOR MARCH 3

JESUS BRINGING PEACE.

LESSON TEXT-Mark 4:35-6:20, GOLDEN TEXT-Jehovah hath done great things for us whereof we are glad. 1261-9 DEVOTIONAL READING-Ps. 147:1-5.

14-18. ADDITIONAL MATERIAL FOR ADDITIONAL MATERIAL FOR TEACHERS-Matt. 8:22-34; Luke 8:22-39; Matt. 14:22-33; Luke 9:37-43A. PRIMARY LESSON MATERIAL-Mark 4:35-41

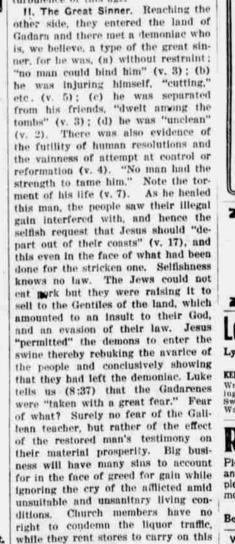

MEMORY VERSE-Even the wind and the sea obey him.-Mark 4:41. INTERMEDIATE TOPIC-Telling the MEMORY VERSE-Mark 5:19.

This lesson is a most dramatic one. Surprise and revelation, rebuke and encouragement are rapidly interchanged. Leaving the multitude to whom he had been preaching, Jesus asks the disciples to pass over with him to the other side of the lake (v. 35). "Let us pass over;" Jesus never asks his disciples to go where he will not go. How vivid is the touch in v. 36: "They took him as he was." He was tired and weary, he whose invitation is to "all who are weary and heavy laden." He who "had not where to lay his head," is carried by loving hands into the boat, and is soon lost in restful slumber. Both Master and

friends are soon to meet a great sinner but first they must encountered a great storm. I. The Great Storm. The Master of forces sleeps calmly on. Why not? Who else could afford to be so appar-

ently indifferent! Not so these disciples. They have yet to know him perfectly, and hence it is natural that in their alarm they should awaken him as they view the rapidly filling boat, and exclaim, "Master, carest thou not that we perish?" Weary and unconcerned as he appears to have been. he arose and rebuked the wind and the waves. Wind and waves are material things and therefore not susceptible to rebuke. Jesus fronted the intangible cause; he rebuked the devil who was responsible for this turbulence; and the calm was commensurate with the storm. The Psalmist says, "Great peace have they that love thy law." Individuals and nations are now in the midst of a "great storm," a day of crime, stress, distress and tragedy; struggle, temptation, grief and loss, and the cry "Lord save us !" is growing louder and more insistent.

Some of us look for the early return of the king, but all should listen for his words "Peace be still" for it is the peace which he alone can give that has power to calm the growing turbulence of this age.

Our boys are defending this country on the high seas and on the land. Our own defense against a common energy is to keep the system clean by ridding the body of the toxins, or poisons, which are bred in the intestines. When you feel tired, sleepy, headachy, when your breath is offensive, or pimples appear on the face and neck, it is time to recognize the danger and protect your bodily health by taking something for the liver such as Dr. Pierce's Pleasant Pellets. The machinery of the body needs to be oiled, kept in good condition, just as the guns or machinery of a ship. Why should a human person neglect his own machinery more than that of his auto-

mobile or his guns? Yet most people do neglect themselves. Their tongue has a dark brown color, skin sallow, breath bad, yet they fall to see that their machinery needs attention. Dr. Pierce's Pleasant Pellets have been known for nearly half a century.

They are made of May-apple, leaves of aloe and jalap, made into a tiny pelle and coated with sugar. They are stand ard and efficacious. You can obtain them at any drug store in vials for twenty-five cents. Ask for Dr. Pierce's Pleasant Pellets-and get no other

when your child child an introduction of the second second

"Why, sir, I never believed in it from the first, and I believe in it still less now. It's all a dream, sir. There never was no monsters."

"But you've seen them, Clouts. You've been under the sea with them !" I expect that German cruiser torpedoed us, instead of us torpedoing her; or maybe she sank us with her guns, and we're going to wake up in a German hospital in Hamburg in a moment. You haven't pinched yourself, sir?" Davies was shaken. He looked at Clouts, blandly smiling at him, opennouthed. He almost believed his theory. Clouts, unequal to the strain upon his limited mentality, had adopted a solution which seemed, under the eircumstances, fensible.

"I think we'd better pinch each other, sir," said Clouts. "Mrs. Clouts always used to say, when in doubt-"

But, breaking off at this juncture, he pulled his mouth organ from his pocket and blew the most discordant medley of dissonants that ever issued from the apertures of that muchabused instrument.

To their amazement, the water was instantaneously churned into foam all Ida faded from his mind. He stared round them. The F55 tossed like a at her like a man bewitched. cork upon the waves. A fleeting mist began to rise from the surface of the the most conspicuous part, was fjord.

"Hatches on !" gasped Davies, and they ran to save the F55 from submersion.

Hardly had they succeeded in this shrouded figure. and reached the couning tower when Donald appeared at the head of the meeting. Neither did Clouts. They indder below. His eyes were clear started at full speed toward MacBeard, again; it seemed as if his half-hour of who, already having launched his mosleep had recreated him.

"What's happened, Davies?" he asked.

"The monsters! They're all about us!" cried the middy.

"Well, of course," said Donald. "You don't suppose I came here on a wild-goose chase, do you?"

"But you said we were beaten, sir, and_"

"Nonsense !" said Donald angrily, "They've been with us all the time. You don't expect that they can keep on condensing hydrogen forever without taking a rest, do you? Muscular fatigue, Davies. Hello !"

port, and, about a mile to port of them, in it. The beauty that had dazzled they saw the motorboat, bobbing upon him was gone. A milky pallor, spreadthe agitated waves.

"We've got him, Davies," said Donald. "I knew it. I knew it all in my eleep-the solution and-and-it's go- the dying monster in the house in Baling to be all right."

They were amnzed at his resolution. He uttered his orders in a firm volce; he seemed now absolutely sure of his success. Through the port they watched the motorboat tossing toward them over the waves. They could an aged woman. make out MacBeard's figure beside the cabin.

"Davies, take the engines again."

Presently the mabmarine began to nald's command, they drew toward evolves into something higher than the motorbeat

lost mouth organ. "Look, sir!" said Davies, when the three stood together once more. Two hundred yards away Mac-

Beard and Ida were standing beside the motorboat. MacBeard's light craft, "Ah, I know, sir, that's what we built upon scientific principles of his both think," answered Clouts with a own devising, had once again estabwise smile. "But it's just a dream, sir. lished its worth. The waves-and luck -had driven it ashore uninjured. And MacBeard seemed to be inviting Ida to re-enter it.

The game seemed in MacBeard's hands once more. "Come !" shouted Donald, starting

forward. But before he had broken into a run

Clouts stood barring his way. "I've found her, sir!" he shouted "Look, sir !"

Donald was on the point of knockhad become a justification for homi- a call for more of them. In each case cide.

But Clouts was not making reference to his mouth organ just then. A cry from Davies stopped Donald upon ven also is conducting experiments the verge of delivering his blow.

Donald started and saw, close to his number of dogs and cats. side, the evanescent, nebulous out-

lines of the queen of the swarm. And in that moment the memory of Her face, which had always been

strangely clouded. It was, indeed, as the matter of little importance once if a veil of vapor had been drawn over demonstrate to himself the difference it. It seemed to cover her, like a long bridal vell, giving her the aspect of a

Davies did not stay to watch that torboat upon the waves, was holding out his hand to Ida.

She hesitated and drew back. They were only fifty paces away. And, torn between her pledge and the desire to see Donald for one last moment on earth, the girl stood waiting. Donald, alone with the queen, looked

into her face and was aware of nothing else. She raised her arms, slowly she

threw off the draperies of clinging mist that covered her head. She stretched her arms out toward him. She fell upon her knees.

Her face was visible now, and Don-He pointed through the observation and was aware of a startling change

ing along the veins and arteries, suffused the flesh. The same change was passing over her that had passed over

Light From the Left Side.

The well-known fact that, when using the eyes for any near work, the illumination should come from the left side rather than the right is often disregarded. Let anyone who considers and he will never forget it. Take a pencil and paper and try to write while

in such a position that the light will fall from the right side. The shadow of the hand or pencil or both is thrown on the paper in such a way as partly to cover the characters one is making. This necessitates a closer viewpoint and a conscious strain on the eyes. Now let the position of the writer be reversed so that the light falls on the

work from the left side. He will notice that the shadows fall away from the work he is doing and leave the field unobscured. In making the furs, growing always rarer, are to be made up. change he cannot help but notice the feeling of ease that immediately is expertenced by the eyes. This applies which the fingers work under the guidance of the eyes. This fact should

be remembered in planning schoolrooms, workrooms, offices and any en who own wonderfully embroidered places where steady close work is to mandurin coats would not consider be performed.
