

FIRST YEAR OF WAR REVIEWED

Achievements of United States Recounted in Official Statements.

GREAT ARMY IN TRAINING

Land Forces Now Aggregate 123,801 Officers and 1,528,924 Enlisted Men—Navy Personnel Is Tripled.

The United States is now entering upon its second year of war. On the first anniversary of the beginning of hostilities between this country and Germany, the people are interested in knowing what has been done by the United States in waging and preparing to wage war upon the forces of Prussian autocracy. The committee on public information of the United States government, in a review of the first year of the war, gives a resume of the activities of the various departments of the government as they are concerned with prosecution of the war. The committee announces that all statements made are authorized by the war department, the navy department, the United States shipping board and the treasury department.

The outstanding feature of the first year of war, it is pointed out in the review, has been the transformation of the standing army and National Guard, composed of 9,524 officers and 202,510 men into a fighting force that now aggregates 123,801 officers and 1,528,924 enlisted men.

A statement of the adjutant general shows that the regular army which in April, 1917, comprised 5,791 officers and 121,797 men, now is made up of 10,028 officers and 603,142 men. The National Guard in April, 1917, included 3,733 officers and 76,713 men, while now it comprises 16,833 officers and 431,583 men. The reserve corps in service one year ago included 4,000 men. Now it includes 96,210 officers and 77,360 men. The National army, which did not exist one year ago, now includes 516,839 men.

A substantial vanguard (military expediency prohibiting publication of actual numbers) of this army is meeting the enemy in France today or is encamped there awaiting the call to the trenches; in 16 cantonments and 16 camps; and on numerous aviation fields and in a variety of other schools in all parts of the United States the men of the remaining army are hardening and training for their part in the great contest overseas.

Behind the activities of this vast force lies a great industry organized to produce an adequate supply of munitions, equipment, and provisions, and to provide transportation to the firing line, almost every branch of essential industry of the country having been drawn upon to produce these material requirements.

Expeditionary Forces. Military necessity particularly forbids a detailed review of the activities of the American expeditionary forces.

General Pershing and his staff arrived in Paris on June 14, 1917, 69 days after the declaration of war. The first American troops arrived in France on June 26. On July 4, in celebration of our natal day and a new fight for liberty, American troops paraded the streets of Paris and were greeted as the forerunners of great American armies and vast quantities of supplies and munitions.

On October 10, 1917, 187 days after the war was declared, American soldiers went on the firing line. In January American soldiers took over permanently a part of the line as an American sector, and this line is gradually lengthening.

Behind the fighting line in France the American forces have scientifically prepared a groundwork of camps, communications, supply bases, and works in anticipation of operations by the full force of the army. They are building and have built railroads, hospitals, ordnance bases, and docks in France. They have constructed immense barracks, erected sawmills, reclaimed agricultural lands, and carried forward many incidental enterprises.

The construction of an ordnance base in France, costing \$25,000,000, is now well under way. Great quantities of material used in the foreign construction work have been shipped from the United States—from fabricated ironwork for an ordnance shop to nails and cross-ties for railroads, and even the piles to build docks.

All the while there has been a fairly even flow of men and materials from the United States to France. The men in the trenches, back of the lines, on the construction projects, and in the hospitals have been steadily supplied. Our losses at sea, in men and materials, have been gratifyingly small. The greatest single loss occurred on

February 5, when the British ship *Tuscania* was torpedoed and sunk. The bodies of 144 soldiers, en route to France, have been found and 55 others were still missing on March 16.

To secure an adequate number of competent officers to lead the new armies various plans were devised. Two classes at West Point were graduated in advance of the usual graduating dates and special examinations were held in various parts of the country for appointments from civil life. Three series of officers' training camps have been held. Of 63,203 candidates in the first two series of camps 44,578 qualified and were awarded commissions. In the third series of camps, opened January 5, 1918, about 18,000 candidates, consisting largely of enlisted men, have been in attendance.

Corps of Engineers. At the beginning of the war the engineer troops consisted of three regiments of pioneer engineers, with trains, one mounted company, one engineer detachment at West Point. The aggregate strength was approximately 4,125 officers and enlisted men. At present the aggregate authorized strength is over 200,000, with an actual strength of approximately 120,000.

Of the special engineer units recruited for service on railroads and in the maintenance of lines of communication, many are already in France and others are awaiting recruitment to full strength in order to be ready for overseas service. The first engineer troops, 1,100 strong, to be sent abroad, arrived in France about three months after war was declared. Since that time the number has been greatly augmented. These troops have been constantly engaged in general engineering work, including the construction of railroads, docks, wharves, cantonments, and hospitals for the use of the American expeditionary forces. They have, in some instances, in the performance of their duties, engaged in active combat with the enemy.

Ordnance Department. Since the outbreak of the war the commissioned personnel of the ordnance department has expanded from 97 officers, operating with yearly appropriations of about \$14,000,000 and with manufacture largely confined to government arsenals, to 5,000 officers in this country and abroad, transacting an unprecedented war program for the supply of ordnance, the total direct appropriations and contract authorizations for one year having been \$4,756,503,185.

While building the foundation for greater production, the ordnance department has provided 1,400,000 rifles; has brought the rate of rifle production up to 45,000 per week, sufficient to equip three army divisions; secured deliveries on more than 17,000 machine guns; brought the rate of production of machine guns from 20,000 to 225,000 per year; increased the rate of production of 3½-inch to 9-inch caliber guns from 1,500 to 15,000 per year; and has arranged for the manufacture of some 35,000 motortrucks and tractors for hauling heavy guns and ammunition, which are being delivered almost as fast as they can be shipped.

One billion rounds of ammunition have been purchased for the training of troops in the cantonments alone. An idea of the extent of the ordnance program may be gained from the following few items of purchase: Twenty-three million hand grenades, 725,000 automatic pistols, 250,000 revolvers, 23,000,000 projectiles for all calibers of heavy artillery, 427,246,000 pounds of explosives, 240,000 machine guns, and 2,484,000 rifles.

Quartermaster Corps. The magnitude of the work of the quartermaster corps is indicated by the operation of the subsistence division, which is charged with the responsibility of seeing that food supplies for the army are available at all stations from the Philippines to Lorraine. Purchases recently made included 40,000,000 pounds dried beans, 116,000,000 cans baked beans of the 1917 crop, 65,184,475 cans of tomatoes, 91,000,000 cans of condensed milk, and 20,287,000 pounds of prunes.

The establishment of the subsistence division centralized the purchases of foodstuffs for the army, previous to which such products were distributed through the depot quartermaster. Effective January 1, the central control system has resulted in greater efficiency and a big saving. In January, for instance, \$100,000 was saved under this system as compared with the prices obtained by depot quartermasters, and in February a saving of \$39,740 was made on potatoes alone. The central control system is still being perfected.

Production of 10,000 new automobile trucks is in progress for the army, in addition to purchases of 3,320 passenger cars, 6,126 motorcycles, and 5,040 bicycles, with appropriate repair and replacement equipment.

In three months the cantonment division of the quartermaster general's department built 16 cantonments, each one practically a small city, comprising about 1,400 separate buildings and providing quarters for 47,000 men.

Air Service. The air service has been called upon in the past 12 months to build an enormous structure of the most highly trained personnel and the most intricate equipment with practically no foundation to start from.

Three large appropriations, including the \$90,000,000 act passed through a roll call, made a total of \$997,000,000 available for the first year. All of this has since been obligated.

Last April the air service had an almost negligible force of 65 officers and 1,120 men, 3 small flying fields, less than 300 second-rate planes, practically no aviation industry, and only the most scanty knowledge of the kaleidoscopic development abroad. The first two months of war were required to secure information, establish a staff, and work out the program finally adopted. The problem was twofold—first, personnel; and, second, equipment.

Today the personnel is over 100 times that of a year ago, practically every member a skilled man who has gone through an intensive course of training. Schools of 11 different kinds have been instituted, courses of instruction laid out, and instructors secured, including foreign experts in a score of lines.

Development of Navy. The development of the navy during the first year of war has given the greatest satisfaction. Its growth and achievements during this period may be epitomized in the following paragraphs: Strength of the navy today is nearly 21,000 officers and 230,000 enlisted men; strength a year ago was 4,792 officers and 77,946 enlisted men. Estimated total expenditures of the navy during first year of war: Disbursements and outstanding obligations, \$1,881,000,000.

Total naval appropriations, real and pending, \$3,333,171,665.04. American destroyers arrived at a British port to assist in patrolling European waters 28 days after the declaration of war.

There are now four times as many vessels in the naval service as a year ago.

Nearly 73,000 mechanics and other civilian employees are working at navy yards and stations.

When war was declared, 123 naval vessels were building or authorized, and contracts have been placed since that time for 949 vessels.

More than 700 privately owned vessels have been purchased or chartered by the navy.

Six new authorized battleships are designed to be of 41,600 tons, the largest battleships in the world.

Our 35,000-ton cruisers, 35 knots, will be the fastest in the world, their speed equalling the fastest destroyers.

Prompt repairs of 107 interned German ships, partially wrecked by their crews, added more than 700,000 tons to our available naval and merchant tonnage.

The navy has developed an American mine believed to combine all the good points of various types of mines, and is manufacturing them in quantities.

During the year the latest type of naval 16-inch gun was completed for our new battleships; it throws a projectile weighing 2,100 pounds.

Navy has in its possession now a stock of supplies sufficient for the average requirements for at least one year.

Several hundred submarine chasers, built since the war, have been delivered to the navy by 31 private concerns and six navy yards; many of these boats have crossed the Atlantic, some in severe weather.

Naval training camps have a capacity of 102,000 in summer, 94,000 men in winter.

Shipping Board's Progress. Up to date congress has authorized \$2,034,000,000, of which \$1,135,000,000 has been appropriated, for the United States Shipping board and Emergency Fleet corporation; on March 1, \$323,247,935.37 of this sum had been expended.

The Emergency Fleet corporation had requisitioned March 1, 425 steel vessels and contracted for 720 steel vessels, making a total of 1,145 steel ships, of an aggregate dead-weight tonnage of 8,164,508 tons; it had let contracts for 490 wooden vessels, aggregating approximately 1,715,000 dead-weight tons; it had repaired and put in operation 788,000 dead-weight tonnage seized from Germany and Austria.

On March 5 the building program of the Emergency Fleet corporation was being carried on in 151 plants.

First Year's War Cost. Total estimated expense of the United States government in the first year of war, without loans to the allies, is \$12,067,278,879.07.

To help meet this expense, the treasury department floated \$6,616,532,300 subscriptions to Liberty Bonds.

Bonds, certificates of indebtedness, War Savings certificates, and Thrift stamps issued by the treasury up to March 12, totaled \$8,590,802,032.96.

The United States government had loaned to foreign governments associated in the war on March 12, 1918, \$4,436,329,750.

To March 12 the war risk insurance bureau had issued policies for a total of \$12,465,116,500 to the armed forces.

A large number stepped out; and now nearly all the thermometers for use in France are made by these German prisoners. Their workshop is one of the old dismantled forts near Paris, and apparently they are most happy in their work. Possibly this is in part due to the fact that they are teaching their art to a number of French women.—Joseph S. Ames, in the Atlantic.

These are days when it is not meet for man to live by wheat alone.

Into 15 feet of water. John P. Smith, a fireman second class, attached to the United States receiving ship, jumped overboard after him. The man in the water was in a semi-conscious condition when Smith reached him, but he made his rescue complete. For this gallantry he has been commended by Secretary Daniels. Smith enlisted in the navy at St. Louis in March, 1914.

The latest mother-in-law joke is on the man who married his to escape the draft, and didn't.

Attorneys for Swift & Co., and Zinn & Co. appealed against the recommendation of the New York Food Administrator that the license of the New York branches of the firms be suspended for thirty days for alleged profiteering in eggs.

A publicity campaign to protect the soldiers and the general public against spread of respiratory diseases caused by promiscuous coughing, sneezing and spitting was announced by Surgeon General Gorgas.

The Federal Trade Commission ordered ninety-seven lumber companies in the West to desist from unfair methods of competition.

Debate on the \$19,000,000 Rivers and Harbors Appropriation Bill began in the House.

PEACE BY FORCE WITHOUT LIMIT

Is President Wilson's Answer to Germany

ACCEPTS HUN CHALLENGE

Draws Fine Distinction Between People and Statesmen, as Compared to Their Real Rulers, the Dominion-Seeking Militarists—Measures Liberty Evenly With Challenge—Liberty Loan Drive Begins—Parade a Revelation.

Baltimore, April 6.—To every part of the civilized world there went out from Baltimore tonight the final determination of America as voiced by Woodrow Wilson, its President and spokesman of a united people.

It was that this war, as far as America is concerned, is to be settled by FORCE. And it is to be "Force to the utmost. Force without stint or limit, the righteous and triumphant Force which shall make Right the law of the world."

For the President has seen there is no other way. The time for temporizing has passed, the time for peace by negotiation has gone, we cannot trust Germany, we have seen what she has done in Russia, have seen that her statesmen have said one thing and her real rulers, the military, do another, that the only thing she recognizes is her own god—Force. She herself has chosen it. We accept the challenge, and with force we shall deal with her to the end.

That, in substance, was the message to the world from the American people, voiced by their President, a message which the American people themselves have longed to have uttered, and to which they and all the Allies will respond.

And delivered in the wonderfully beautiful setting of "Over There," in the presence of more than 12,000 people, on the first anniversary of America's entrance into the great conflict, it was virtually a new declaration of war.

The President spoke as follows: Fellow Citizens: This is the anniversary of our acceptance of Germany's challenge to fight for our rights to live and be free men everywhere. The nation is awake. There is no need to call to it. We know what the war must cost, out of our sacrifice, the lives of our finest men and, if need be, all that we possess. The loan we are met to discuss is one of the least parts of what we are called upon to give and do, though in itself imperative. The people of the whole country are alive to the necessity of it, and are ready to lend to the utmost, even where it involves a sharp skipping and daily sacrifice to lend out of meagre earnings. They will look with reprobation and contempt upon those who can and will not, upon those who demand a higher rate of interest, upon those who think of it as a mere commercial transaction. I have not come, therefore, to urge the loan. I have come only to give you, if I can, a more vivid conception of what it is for.

The reasons for this great war, the reason why it had to come, the need to fight it through, and the issues that hang upon its outcome, are more clearly disclosed now than ever before. It is easy to see just what this particular loan means because the cause we are fighting for stands more sharply revealed than at any previous crisis of the momentous struggle.

The man who knows least can now see plainly how the cause of justice stands, and what the imperishable thing he is asked to invest in. Men in America may be more sure than they ever were before that the cause is their own, and that, if it should be lost, their own great nation's place and mission in the world would be lost with it.

Sought to Learn Objects of Germany. I call you to witness, my fellow-countrymen, that at no stage of this terrible business have I judged the purposes of Germany intemperately. I should be ashamed in the presence of affairs so grave, so fraught with the destinies of mankind throughout all the world, to speak with truculence, to use the weak language of hatred and vindictive purpose. We must judge as we would be judged. I have sought to learn the objects Germany has in this war from the mouths of her own spokesmen, and to deal as frankly with them as I wished them to deal with me. I have laid bare our own ideals, our own purposes, without reserve or doubtful phrase, and have asked them to say as plainly what it is that they seek.

We have ourselves proposed no injustice, no aggression. We are ready, whenever the final reckoning is made, to be just to the German people, deal fairly with the German power, as with all others. There can be no difference between peoples in the final judgment, if it is indeed to be a righteous judgment. To propose anything but justice, even-handed and dispassionate justice, to Germany at any time, whatever the outcome of the

war, would be to renounce and dishonor our own cause. For we ask nothing that we are not willing to accord.

It has been with this thought that I have sought to learn from those who spoke for Germany whether it was justice or dominion and the execution of their own will upon the other nations of the world that the German leaders were seeking. They have answered, in unmistakable terms. They have avowed that it was not justice, but dominion, and the unhindered execution of their own will.

Statesmen vs. Military Leaders. The avowal has not come from Germany's statesmen. It has come from her military leaders, who are her real rulers. Her statesmen have said that they wished peace, and were ready to discuss its terms, whenever their opponents were willing to sit down at the conference table with them. Her present Chancellor has said—in indefinite and uncertain terms, indeed, and in phrases that often seem to deny their own meaning, but with as much plainness as he thought proper—that he believed that peace should be based upon the principles which we had declared would be our own in the final settlement. At Brest-Litovsk her civilian delegates spoke in similar terms; professed their desire to conclude a fair peace and accord to the people with whose fortunes they were dealing the right to choose their own allegiances. But action accompanied and followed the profession. Their military masters, the men who act for Germany and exhibit her purpose in execution, proclaimed a very different conclusion. We cannot mistake what they have done—in Russia, in Finland, in the Ukraine, in Rumania. The real test of their justice and fair play has come. From this we may judge the rest. They are enjoying in Russia a cheap triumph in which no brave or gallant nation can long take pride. A great people, helpless by their own act, lies for the time at their mercy. Their fair professions are forgotten. They nowhere set up justice, but everywhere impose their power and exploit everything for their own use and aggrandizement; and the peoples of conquered provinces are invited to be free under their dominion!

Are we not justified in believing that they would do the same things at their western front if they were not there face to face with armies whom even their countless divisions cannot overcome? If, when they have felt their check to be final, they should propose favorable and equitable terms with regard to Belgium and France and Italy, could they blame us if we concluded that they did so only to assure themselves of a free hand in Russia and the East?

The objects of Germany in Plain Words. Their purpose is undoubtedly to make all the Slavic peoples, all the free and ambitious nations of the Baltic peninsula, all the lands that Turkey has dominated and misruled, subject to their will and ambition, and build upon that dominion an empire of force upon which they fancy that they can then erect an empire of gain and commercial supremacy—an empire as hostile to the Americans as to the Europe which it will overawe—an empire which will ultimately master Persia, India and the peoples of the Far East. In such a program our ideals of justice and humanity and liberty, the principle of the free self-determination of nations upon which all the modern world insists, can play no part. They are rejected for the ideals of power for the principle that the strong must rule the weak, that trade must follow the flag, whether those to whom it is taken welcome it or not, that the peoples of the world are to be subject to the patronage and overlordship of those who have the power to enforce it.

That program, once carried out, American and all who care or dare to stand with her must arm and prepare themselves to contest the mastery of the world, a mastery in which the rights of common men, the rights of women and of all who are weak, must for the time being be trodden under foot and disregarded, and the old, age-long struggle for freedom and right begin at its beginning. Everything that America has lived for and loved and grown great to vindicate and bring to a glorious realization will have fallen in utter ruin, and the gates of mercy once more pitilessly shut upon mankind!

The thing is preposterous and impossible, and yet it is not that what the whole course and action of the German armies has meant wherever they have moved? I do not wish, even in this moment of utter disillusionment, to judge harshly or unrighteously. I judge only what the German arms have accomplished with unspitting thoroughness throughout every fair region they have touched.

Still Ready to Discuss Honest Peace. What, then, are we to do? For myself I am ready, ready still, ready even now, to discuss a fair and just and honest peace at any time that it is sincerely proposed—a peace in which the strong and the weak shall fare alike. But the answer, when I proposed such a peace, came from the German commanders in Russia, and I cannot mistake the meaning of the answer.

I accept the challenge. I know that you accept it. All the world shall know that you accept it. It shall appear in the utter sacrifice and self-

denial of the German leaders, and in the sacrifice of the German people.

WASHINGTON. Attorneys for Swift & Co., and Zinn & Co. appealed against the recommendation of the New York Food Administrator that the license of the New York branches of the firms be suspended for thirty days for alleged profiteering in eggs.

A publicity campaign to protect the soldiers and the general public against spread of respiratory diseases caused by promiscuous coughing, sneezing and spitting was announced by Surgeon General Gorgas.

war, would be to renounce and dishonor our own cause. For we ask nothing that we are not willing to accord.

It has been with this thought that I have sought to learn from those who spoke for Germany whether it was justice or dominion and the execution of their own will upon the other nations of the world that the German leaders were seeking. BERGER BURNED IN EFFIGY. His Adherents Threatened With Tar and Feathers.

Janesville, Wis.—Victor Berger, Socialist aspirant for the nomination for the United States senatorship, was burned in effigy in Edgerton, after more than 1,000 citizens had paraded the streets bearing banners inscribed: "Be all American and back our soldiers." Berger adherents were threatened with tar and feathers, but were saved from violence by the intercession of the leaders of the paraders.

President Wilson appointed Edward Stettinius and Fred P. Keppel Secretaries of War.

Elizabeth City, N. C.—Five men were killed and wreckage and cargo buried over adjacent buildings when the little coasting steamer *Annie* blew up at her dock here just after arriving from Norfolk. The vessel was loaded with flour and sugar. The men killed were First Mate Manus Kinsey, of Norfolk; Assistant Engineer James Nordey, of Edenton, N. C., and two negro deckhands. Two other negro deckhands were seriously injured, one of them dying shortly after the explosion.

CUNARD VALERIA SUNK. Goes Down in Irish Sea, Insurance Interests Learn.

New York.—The Cunard Line steamer ship *Valeria*, a vessel of 5,895 gross register, has been sunk in the Irish Sea, according to word received here by insurance interests. The *Valeria* left here March 4 with cargo for a British port. At the office of the Cunard Line it was said instructions had been received recently that reports of loss of steamers of the line must not be confirmed or denied.

Washington, April 6.—Four hundred thousand persons sat down to their dinner tables in Baltimore tonight with one exclamation ringing through their minds—"Good Night, Kaiser Bill!"

Even the President of the United States must have had such a thought uppermost in his mind as he pondered over the scenes which he and Mrs. Wilson and 399,998 other spectators had witnessed in this town on the first anniversary of this country's entry into war.

There were that many persons, and more, who saw the 12,000 soldiers of the Liberty Division of Camp Meade go marching through the streets this afternoon—soldiers, every one of them, and every inch of them—going forward eagerly and confidently and determinedly on their way to meet the Boches.

Never has Baltimore seen such a pageant, never has this city been so stirred to its depths, never has patriotic fever leaped so high and so gladly, and so courageously as it did, when these men of Baltimore, of Maryland, of Philadelphia, of Pennsylvania and of the District of Columbia went by in review before their commander-in-chief—the leader of them, and of this nation.

Those 12,000 soldiers were bearing with them a message. This message was clear and convincing. It told a story to every American among the hundreds of thousands of Americans who choked the city streets and who went into a delirium of pride and enthusiasm as they read the tale. The message was stamped on the tanned, alert, cheerful faces of that moving host of khaki-clad men. The President peered at it and studied it, and a glow of satisfaction came over his face, hope and joy and gratitude radiating vibrantly in his heart, and the eyes became the mirror of his soul. Those eyes which have seen so much and studied so much, knew that the things which they had received were true.

12,000 TROOPS PASS IN REVIEW

Fighting Machine From Meade Stirs Patriotism

CLIMAX TO GLORIOUS DAY

Every Man Marches Like Veteran—Most Notable Spectacle Ever Seen in Baltimore.

Baltimore, April 6.—Four hundred thousand persons sat down to their dinner tables in Baltimore tonight with one exclamation ringing through their minds—"Good Night, Kaiser Bill!"

Even the President of the United States must have had such a thought uppermost in his mind as he pondered over the scenes which he and Mrs. Wilson and 399,998 other spectators had witnessed in this town on the first anniversary of this country's entry into war.

There were that many persons, and more, who saw the 12,000 soldiers of the Liberty Division of Camp Meade go marching through the streets this afternoon—soldiers, every one of them, and every inch of them—going forward eagerly and confidently and determinedly on their way to meet the Boches.
