There has been a decrease in the number of beas on the farm of almost twelve per cent. as compared with last sent and there is a shortage of about eleven per cent. of chicks hatched as compared with the average years.

The average of corn in Pennsylvania this season has been increased by 4 per cent. over last

Farmers have lost some interest in the breeding of colts, reports showing that this year there were only 86 per cent. of the number raised as in average years.

There has been a decrease of four per cent. in the average planted to potatoes on the farms this season and the condition is not quite up to normal.

Americans Good Fighters.

The life of the average German native is one of slavish obedience to the military powers. This makes the so-called German "efficiency" when the army is fighting in regular orders from officers who may accompany the men and practically point their weapons but they are woefully "at sea" when hand-to hand separates them.

On the other hand, the Ameriernment. can army is made up of men whose individuality has not been 'bnrned out" of them by arbitrary rulers and when they enter a fight they not only equal the Germans as "wave" fighters, but every man is equal to the occasion and he virtally becomea a complete fighting machine" capable of caring for himself for the time. It is said that the German fears nothing like bandof revenue illegally withheld. to hand righting with the re-

Potato Tip Burn And Blight.

Many professional potato growers as well as an army of the war garden enthusaists have comin town. They said Sunday was ments, and machinery, hay, duce a bumper crop of wheat plained to the Pennsylvania Department of Agriculture of the The Bureau of Zoology of the condition of their potato fields Pennsylvania Department of which are being destroyed by Agriculture is conducting a cam- potato tip burn and the early

The dry weather conditions have aggravated the tip burn and On account of being in Huntingas it works in conjunction with the blight the condition of many potato patches are far from promsing. Tip burn is distinguished by the drying and rolling of the leaves at the margins and the growing crop is seriously hindered. Spraying with bordeaux mixture will prevent both tip burn and blight, but the spraying must be done regularly and it must be mist spray instead of the too common sprinkling.

Both late and early blight are quite prevalent this season and are caused by the unusal attack of the flex beetle which eats tiny round holes in the foliage. Blight is controlled by the bordeau and arsenate of lead spray. Reports of the potato aphis are not near as numerous as last year when much of the crop in some sections was damaged by this sucking inset.

Unitee Stutes Revenues.

The internal revenue collections for the fiscal year ending June 30 last totaled \$3,672,000,000 The collections for the preceding year were \$800,000,000. nearly \$500.000,000 the estimates made when the var revenue measures were passed by Congress last year.

Four thousand persons were employed in the work and the total cost of the collections was only \$12,000,000. The patriotism roused by the war contributed largely to the success of the work, and the taxpayers assisted and cooperated with the Gov-
