## Potato Acreage Decreased.

only five counties of th State has there been an increain the acreage of potatoes this season, and from present indi cation the crop will fall from aix to ten miliion bushels short of the record breaking production of 80 653,209 bushels on the farms last year.

The low price offered for potatoes this spring affected the acreage a iversely, though not to the extent that was generally anticipated. It appears that the decline has been largely am mg the small growers as potato growing is a regular rotation with large growers who follow out their app opriated acreage each year.

The total area planted to potatoes this year is 294 935 acres as compared with 308,140 acres las

### I Saw in the Paper.

"I have just learned of a new wa to remove a scorch from linen," said the woman who studies the papers. "I'm always scorching mine; tell me about it," requested the woman who did not know. "It is a little troublesome at first.

You put two ounces of fuller's earth into a pan, add half an ounce of white soap, the juice of two large onlons and half a pint of vinegar. You boll this together for a few minutes, then you put in a covered vessel for future use. When you have a scorch, you spread this mixture on it with a knife. Let it dry on the cloth and the stain will disappear."

#### 1-2-1 Business Courtesy.

A business man rises to welcome his wife or a woman friend or a woman relative who visits him at his office, but he does not rise to greet his stenographer or other woman employees. No business woman is justified in resenting this distinction. The custom cannot be construed to mean that the duct and so he can never know what man does not respect his women employees highly. It simply means that in the business world, as nowhere else, women and men are all human beings working together, and on much ne plane of courtesy.

## **STOPS CRACKS IN CONCRETE** Application of Floor Dressing Paint Will Keep Surface

Unscarred. One of the chief causes of cracking in concrete surfaces is the presence of moisture in the surrounding atmosphere, says a large manufacturer. In the warm months this moisture has no detrimental effect, but in winter it collects in the tiny pores of the concrete and freezes. With its concurrent expansion this exerts a pressure on the surrounding concrete and causes tiny cracks to appear. These cracks in turn fill with moisture and the chipping action continues until spring comes with its higher temperature. This chipping and cracking of the surface of the concrete detracis both from the appearance and strength of the concrete. A sure way to prevent this de-

structive action is to coat the concrete surface with a floor dressing paint. This preserves the texture and individuality of the concrete and prevents moisture penetrating the surface. If new concrete floors are covered with two coats of this paint and recoated at intervals of about six months, the concrete surface will remain unscarred and without cracks.

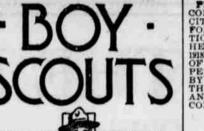

TALK IT OVER WITH CHILD Discussion of Problems of Conduct Is Best Method of Gov-

## ernment.

A parent who has not tried to solve problems of conduct by discussion with his children has not governed them in the best way. Again, a parent who has not learned to restrain his own views on question affecting the members of the family while he listens to the views of his children has missed the greatest pleasure to be derived from being a parent. Anyone who is not an autocrat will find only delight in observing how his children's minds work on the difficulties which are encountered in the management of the home. He will be exhilarated when he sees how their views enlarge every day as they develop, and how they gradually get their selfish desires under control so that they can appreciate and observe principles of right and justice and fair play themselves and insist upon others observing them. A parent who is a bully never can get an insight intc his children's thoughts about con-

SCOUTS LEARN LIFE'S FIGHT

Every parent who has been con demned by his offspring to read out long disguisitions from "The Swiss Family Robinson" on the simple and satisfactory pastime of being cast away is entitled to a grim appreciation of the tale of the lost souls of Cliperton island. These poor Mexicans did not find life on a lonely strand as gay and comfortable as did those marvelous Swiss, says an editorial in the New York Tribune,

Set face to face with nature, unas sisted by any tools of civilization, they failed to make a living, quite as you and I would probably fail. Most of them died of scurvy or starvation.

Given paradise, precious few moderns could do more than skimp along. We are highly educated by comparison with "less learned centuries, but not educated at all in the raw business of squeezing life out of a reluctant Mother Nature. The farmer's boy would do better than some on a desert island. The plainsman would do best of all. Most of us would die of starvation before we could remember how to

make a fire with sticks or invent a fishline or plant a last peck of potatoes so they would grow. The Boy Scouts are putting some

rudimentary sense back into coming generations. Perhaps, also, universal military training may help. All modern education is based on the notion that actual contact with the hard facts of life has been neglected and is both interesting and useful. A little practical training in how to wrestle with the world with bare hands would be equally good for both hands and souls.

## MINERS PRAISE BOY SCOUTS.

Following an address by H. W Wester, the new executive at Birmingham, Ala., of the Boy Scouts of America, the United Mine Workers of Alabama passed the following resolution: "Be it resolved. That the convention

of United Mine Workers union delegates do hereby heartily indorse the scheme of the Boy Scouts of America as laid down by the national headquarters of the organization, and urge that our members encourage their boys to join this movement, which has for its purpose the making of men and for its creed the upbuilding of good citizenship, good-fellowship and pure democracy.

All of the hundreds of thousands interested in the Boy Scouts will be glad to know that the Mine Workers have come to realize that there is and can be no antagonism between the ideals of organized labor and those of the Scout movement.

This change of attitude is revealed in a letter which was sent to the officers and members of the organization

## An Aphorism Falls Down.

Genius has not yet been able to utter an aphorism that would hold good in every instance. "Familiarity breeds contempt," they say. Every notable poet, essayist or artist whatsoever has left a tribute to his mother, either by personal tribute, or dedication or through symbolism, of love for his mother. Yet no other man has ever found such expression, however sublime, that could measure up to his own idea of his mother's virtues. And where is familiarity so pronounced as between mother and son?-Seattle Post Intelligencer.

Population of the warning In 1787 the population of the earth according to Busching, was about 1 000,000,000; in 1800, according to Fabri and Stein, only 900,000,000; in 1833, according to Stein and Horschelman, 872,000,000. In 1858 Dietricl estimated it at 1,266,000,000 and Kolb, in 1865, at 1,220,000,000. According to

the latest calculations the earth is inhabited by 1,400,000,000 human beings.

#### **Ornamental Trees.**

As ornamental trees the Japanese and Chinese persimmons are entitled to high rank. When the trees are in full leaf they are handsome without other adornment. The trees loaded with orange and orange-red fruits are among the most striking objects in the garden. All thrive in California, and not elsewhere except in some southern states.
