

TO ALL WOMEN WHO ARE ILL

This Woman Recommends Lydia E. Pinkham's Vegetable Compound—Her Personal Experience.

McLean, Neb.—"I want to recommend Lydia E. Pinkham's Vegetable Compound to all women who suffer from any functional disturbance, as it has done me more good than all the doctor's medicine. Since taking it I have a fine healthy baby girl and have gained in health and strength. My husband and I both praise your medicine to all suffering women."—Mrs. JOHN KOPPELMANN, R. No. 1, McLean, Nebraska.

This famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, has been restoring women of America to health for more than forty years and it will well pay any woman who suffers from displacements, inflammation, ulceration, irregularities, backache, headaches, nervousness or "the blues" to give this successful remedy a trial.

For special suggestions in regard to your ailment write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of its long experience is at your service.

W. N. U., BALTIMORE, NO. 33-1918.

its Fault.

"Is your new automobile all right?" "It's pretty fair, but it will shy at horses."

CAVALRY PLAYS A BIG PART NOW

General Foch Used French Horsemen to Advantage in Big Drive.

PROVE GOOD FIGHTERS AFOOT

Rides 80 Miles in Day and Relieves Hard-Pressed British in Flanders—Makes New Place for Self in Warfare.

Washington.—Skillful use of French cavalry has marked General Foch's tactics ever since he took over control of the allied armies as supreme commander, according to information reaching military circles here. The horsemen have played an important role in the whole battle of 1918, as the struggle which began March 21 with the first German drive has come to be known.

The employment of swift-moving columns in the present counter-stroke from the Aisne-Marne line has been noted in the dispatches. Again General Foch took advantage of the great mobility of the mounted arm to throw it in wherever his advancing infantry units threatened to lose touch with each other in the heat and confusion of the contest. No gaps have been left where the enemy might strike back, for always the horsemen came up to fill the hole until the infantry line could be rectified and connected in a solid front.

The same tactics marked the first use of French cavalry in the battle of Picardy, when the French took over 55 miles of front from the British to permit the latter to mass reserves at seriously threatened points of the line farther north.

Cavalry Fights Afoot. A French cavalry corps complete with light artillery, armored cars and cyclists arrived first on the scene in Picardy and relieved the British. They fought it out afoot until the heavy French infantry arrived and took over the task.

Three days later the horsemen were on the move again, this time hurrying to the front, where the enemy was hitting hard at the Lys line. The cavalry rode hard as the advance guard of the French infantry columns marched toward St. Omar. In the first 24 hours, despite the long strain of fighting in Picardy, they covered 80 miles without losing a man or a horse on the way. In 66 hours they had transferred their whole corps over 125 miles and arrived east of Mont Cassel.

"It was a wonderful sight," writes the chief of staff of a division. "The horses were in fine condition; the men were cheerful and went singing, in spite of the sufferings and privations they had to endure.

"In truth, our boys looked a little tired, but they were all very proud

FIDO'S BATH AND 3 MEALS ASSURED

Spokane, Wash.—One thousand dollars to provide three meals a day, a bath and a bed for her pet dog is a provision of the will of Mrs. Quincy Burgess, recently admitted to probate. When the dog dies she will provide that it shall be buried beside its late owner. A "nice casket" is to be used and the dog's grave is to be properly cared for.

MUSTARD GAS WORST

Most Horrible Invention Huns Use in War.

It Brings Tears and Causes Painful Skin Diseases Among Soldiers.

Washington.—The most dangerous kind of poison gas used by the Germans is "mustard gas," or dichlorodithiophosphide.

Mustard gas has a distinctive but not altogether unpleasant smell, more like garlic than mustard. It is heavy and oily as a liquid. It boils at 217 degrees centigrade, and thus has properties whereby it can be distributed in the form of a spray on the impact of a shell.

Mustard gas is a powerful producer of tears. After several hours the eyes become itchy and blister, causing intense pain. The nose discharges freely,

CASTOR OIL IS NOW SCARCE

Reduced Importation and Needs of War Have Cut Down Civilian Supply.

Indianapolis.—Castor oil, the public's one unfailing remedy for all ills, is about to go off the market. At least this is the prediction of Indianapolis wholesale druggists, who say that it is only a matter of a few months until the oil will be dropped from druggists' price lists.

Again the war is to blame. The oil is made from the castor bean, which for years has been imported by the United States from the East Indies by the thousands of pounds. Now the war not only has curtailed the importation of the bean enormously but has created a demand for the oil derived from it that would have taxed the capacity of manufacturers had they been able to secure the normal supply of the raw product.

The government has found, drug dealers say, that no other oil is as perfect a lubricant for the type of

that such an effort had been asked of them and all were bearing it cheerfully.

The cavalry corps stood in support of the British for ten days in April after the enemy had forced the line held by the Portuguese division. It maintained communication between two British armies and organized the ground from Mont Cassel to Mont Kemmel, while the French army moved up behind it. As the French infantry came into line the cavalry was drawn off to the left in the Mont Kemmel region, and for five days the horsemen, fighting afoot with two infantry divisions, withstood the terrific assaults of the Germans who sought to hammer a way through behind Ypres at any cost.

They stood steady bombardment for days, and when the infantry was hemmed in on top of Mont Kemmel, the cavalry drove forward in counter-attack and held off the shock divisions of the enemy while the French gunners got their pieces away.

Later, at the battle of Loere, the cavalry also shared fully with the in-

DEFECTS SPELL DEATH IN FLYING

New York.—Considerable concern has been expressed at the large number of fatal accidents reported from our American military and naval aviation training camps. Considering the risks the novice necessarily takes and the very special physiological and psychological factors that enter into the science of flying, these fatal accidents are few in proportion to the number of men undergoing training, and they are not more numerous than those on the training fields of Great Britain, France and Italy.

A perfect knowledge of all the rules of the game of flying will not save a man who lacks confidence in himself and is inclined to hesitate. A half-second of indecision may be fatal. Initiative, the sporting instinct and a certain irresponsibility, qualities inherent in American youth, have been found of far greater value in the air than the logical, scientific, severely disciplined character of the Germans, and account for the superiority of the allied aviators in general.

The most eminent of British scientists have devoted special study to the psychological and physiological aspects of flying. One authority says that good eyesight, normal hearing, good "muscle sense" and equilibrium are indispensable qualifications. But most important of all is the right temperament—not an easy thing for a medical board to examine. Of the types—the imaginative and the unimaginative—the imaginative youth is said to make the better pilot if he can keep his imagination under control.

Surgical Operations No Bar.

In the British air service previous history of wounds and disease is thoroughly investigated. Persistent headaches, vertigo and easily induced fatigue are serious defects. But sometimes even a serious surgical operation is not regarded as important. Thus a doctor recently passed as fit for flying a man who had quite a large piece missing from the frontal region of the skull. It is much more important that a man should have both arms intact than both legs. A clever pilot who was killed on the western front was Lord Lucas, who had an artificial leg.

Considerable importance is attached to the respiratory system. In addition

fantry, blocking gaps in the line, and the final definite occupation of the town for the allies was accomplished by a cavalry battalion. A sergeant and a handful of dragoons drove 40 Germans out of the town, and at another point a cavalry officer and 20 men backed up the infantry at a critical moment, the officer waving a pistol in one hand and a shovel in the other as he led the dash which restored the situation.

Defend Compeigne. A few days later the same cavalry, after another long ride, met the enemy advance against Villers-Cotterets woods in the Aisne sector, where the fighting today is waging fiercely, and where the horsemen again are engaged. When the Germans drove forward in their effort to get around the forest to Compeigne, the horsemen blocked the road between the wooded region and the River Oureq.

In view of this record for swift and dashing attack afoot, the cavalry appears to have established a new place for itself in modern warfare. They are the light reserves; the men who are always hurled first into the point of danger to hold until the slow-moving infantry arrives. They have learned trench warfare completely, and General Foch is making use of them in any move that insures them a glorious chance when the day comes for the allies to drive back all along the line.

Temperance Notes

(Conducted by the National Woman's Christian Temperance Union.)

NATIONAL PROHIBITION WOULD CONTRIBUTE TO CHILD WELFARE.

In the interest of child welfare, Superintendent Clarence H. Dempsey of the Haverhill, Mass., schools, thinks national prohibition should prevail, and the welfare of the children would immediately contribute to the welfare of the nation. Professor Dempsey says:

"I believe there is nothing that would contribute more to our national welfare than precisely this thing. I have found, in my experience, that the presence of licensed saloons prevents many children from getting as much out of school as they should on account of the lack of proper food and clothing, and the cases of destitution that come to my attention as a direct result of the use of liquor in the homes form one of the most convincing arguments to me for the abolition of the liquor traffic.

"Further than this, many children, as soon as they are of legal age to go to work, are forced to lose all schooling thereafter on account of the use of liquor at home, and in many such instances these children have the further misfortune to have made poor progress while they were in school. Inherited weakness, feeble-mindedness, and poor food and clothing, are very common accompaniments to the drink habit. I have no doubt, furthermore, that my own experiences would be duplicated and corroborated by superintendents and teachers the country over."

CHILDREN PROFIT BY DECREASE IN HOURS OF DRINK TRAFFIC.

The children in Great Britain have gained, even under such measures of restriction of the liquor traffic as have been introduced by the board of control. A recent book written by Henry Carter, a member of the board, states that the number of deaths of infants from overlying decreased by 40 per cent in 1916 as compared with 1914. The number steadily declined with the decrease in arrests for drunkenness.

Cases of cruelty and neglect of children due to drunkenness dealt with by the National Society for the Prevention of Cruelty to Children decreased from 40.2 per cent in 1914-15 to 31.2 per cent in 1916-17. With it went a general improvement in the homes and nutrition of children, better rest because the streets became quiet earlier due to the earlier closing hour of the public house. The long evenings in Great Britain, coupled with late closing of the saloons, tended to keep the children on the streets often until midnight, while the streets would not grow quiet until one o'clock or later. Such conditions were, of course, detrimental to children's health and moral welfare. So much gain Great Britain has won for her children merely by diminishing the hours of the drink trade.

BEER NOT A TEMPERANCE DRINK

Alcohol is alcohol, either in whisky or beer. It is nonsense to claim that beer is a hygienic drink. It is drunk chiefly for its alcoholic effect, and if the alcoholic effect is produced, the danger of alcohol exists. Any one who doubts that beer can produce a certain form of intoxication need only visit the saloon and watch the beer-drinker in various stages of befuddlement or excitement. If beer does not intoxicate or produce any alcoholic effect, what becomes of the "racial craving of stimulants" which it is said to satisfy? Furthermore, heavy beer-drinking, as in the case of brewery employees, adds the danger of excessive fluid intake, entirely apart from alcohol. The heavy mortality of brewery employees is sufficient evidence that beer, so far as its effect on masses of men is concerned, is not a hygienic drink.—Eugene Lyman Fisk, M. D., in Atlantic Monthly.

A CATHOLIC PASTOR'S OPINION OF THE SALOON.

"The modern American saloon, with its gambling den, wine room, and back parlors, is nothing more or less than a living part of hell. It is the 'hang-out' for all loafers, toughs, sapsheads, and would-be sports in town. The policeman in every town will tell you that murders, suicides, robberies, thefts, and all crimes, originate at the saloon bar, and any lawyer can tell you that the bought perjurers who crowd courts and make justice impossible, can be secured from any near-by saloon. The up-to-date barroom, whether we like to admit it or not, saps the vitality of our manhood, steals the blood money from the laboring man, starves the innocent, drives women to despair, makes beasts out of men, and sends countless souls to eternal perdition."—Father Henry McGuire, Joliet, Ill.

WHY HE OBJECTS TO THE SALOON

Recently a well-known congressman gave the following as a reason why he objected to the institution known as a saloon: "A man and a dog will go into a saloon together, perfectly sober, and in 20 minutes they will come out. The man will be drunk; he will stagger and fall into the gutter and lie there like a hog, while the dog will walk away like a gentleman. I object to an institution that works such a difference in 20 minutes between a man and a dog."

ANOTHER BREWERY CONVERTED.

The statement is made that the Mount Penn Brewery Co. of Reading, Pa., is arranging to turn its plant into a compressed yeast factory. Being deprived of the privilege of concocting their so-called "liquid bread," it is well that the company should turn its attention toward helping to manufacture the real thing—the bread that is better than beer and does not carry a kick.

The liquor traffic pumps poison into the arteries of the republic.

SAVING WHEAT is only one good point for POST TOASTIES (MADE OF CORN) —says Bobby

Decentful Biddies. Fogg is rather disgusted with poultry farming. He says that when he left home yesterday morning forty of his hens were bragging about what they were going to do; but on his return he found that only eight had laid—the rest of the bunch had simply lied.—Boston Evening Transcript.

That's the Question. Mr. Oldboy—Marry me and I could die happy.

Miss Bright—Yes, you could—but would you?

Disastrous. "How is your son getting along in the army?"

"First rate now. But in his ignorance the poor boy made a mistake when he first reached the cantonment that came very near spoiling his career as a soldier."

"He didn't commit an offense involving moral turpitude?"

"No. He called his colonel, 'Old Top.'"—Birmingham Age-Herald.

Germany limits clothing purchases by civilians.

Don't Poison Baby. FORTY YEARS AGO almost every mother thought her child must have PAREGORIC or laudanum to make it sleep. These drugs will produce sleep, and a FEW DROPS TOO MANY will produce the SLEEP FROM WHICH THERE IS NO WAKING. Many are the children who have been killed or whose health has been ruined for life by paregoric, laudanum and morphine, each of which is a narcotic product of opium. Druggists are prohibited from selling either of the narcotics named to children at all, or to anybody without labeling them "poison." The definition of "narcotic" is: "A medicine which relieves pain and produces sleep, but which in poisonous doses produces stupor, coma, convulsions and death." The taste and smell of medicines containing opium are disguised, and sold under the names of "Drops," "Cordials," "Soothing Syrups," etc. You should not permit any medicine to be given to your children without you or your physician know of what it is composed. CASTORIA DOES NOT CONTAIN NARCOTICS, if it bears the signature of Chas. H. Fletcher. Genuine Castoria always bears the signature of Chas. H. Fletcher.

Watch Your Stomach In Hot Weather

A Cool, Sweet, Strong Stomach Your Best Safeguard Against Summer Sickness

"Keep your stomach in good working order during the hot summer months and you will have little to fear in the way of sickness" is the advice many physicians give as hot weather approaches.

Good, sound, common sense advice, too. For very frequently, and especially in hot weather, these common stomach disorders which so many people seem to regard as of minor importance, do open the way for serious illness.

So keep your stomach sweet, cool and comfortable all summer long. The extra work—change of diet—poisons that come with hot weather—all lie in the stomach. The strongest stomach will need help this summer as never before.

The one easy way if you have the right remedy is to rid the stomach of too much acid. Because it's superacidity that interferes with digestion and assimilation, and this causes about all those stomach miseries you are so familiar with—heartburn, food-repeat-

ing, indigestion, sour, gassy stomach and that miserable, bloated, puffed-up condition after eating.

Now here is good news. An easy sure relief has been found to get rid of the harmful acidity and gases in the stomach. It is called EATONIC, a good tasting compound that you eat just like candy. A tablet or two of EATONIC after meals will work wonders. You can have no idea of what sure, quick comfort EATONIC brings until you do try it. Use EATONIC after your meals, enjoy a good appetite and get full strength from the food you eat. At the same time protect yourself from summer stomach and bowel miseries.

Get a big box of EATONIC from your druggist today. He will tell you that people who have used EATONIC say that they never dreamed that anything could give such quick and wonderful results. It costs only 50c a box and if it fails in any way, your druggist, who you know and trust, will return your money.

A Good Method. "There's nobody," said a government official, "who can get rid of an important caller so quickly and at the same time so smoothly as the president."

"Once, at a reception, a man held up the long line of guests waiting to shake the president's hand while he recounted at great length some tedious yarn or other.

"The president stood about four minutes of this. Then he smiled and gave a start.

"But, my dear sir, I am monopolizing you," he said."

Dad's Great Scheme. Father noticed that his rather obstreperous young son had the quality of thriftiness, and he resolved to appeal to it.

"Sonny," said he, "I'm going to give you a nickel every day if you're a good boy, on condition that every day you are naughty you give me a nickel. Is it a go?"

"I'd like to do it, dad," answered the little fellow. "But I can't afford it. I've only got \$1.25 in my bank to start on."—People's Home Journal.

Britain's war debt is \$27,636,000,000.

What Makes You Feel Tired?

If it isn't hard work or exercise, then it's your blood. Your blood has been poisoned by the bite of a malarial mosquito or by stomach and liver disorders. In some cases low vitality and lack of energy is due to thin, weak blood.

Grove's Tasteless chill Tonic

Enriches the Blood and Purifies the Blood; by this means it Strengthens the body from head to toe and you can soon feel its Strengthening, Invigorating Effect. It contains just what the blood needs, Iron and Quinine, in a form acceptable to the most delicate stomach.

GROVE'S TASTELESS chill TONIC is an exceptionally Good General Strengthening Tonic for the Child, for the Mother or any of the Family, young or old. Pleasant to take. Price 60c.

Perfectly Harmless. Contains no Nux-Vomica or other Poisonous Drugs.

Grove's chill Tonic Tablets

You can now get Grove's Tasteless chill Tonic in Tablet form as well as in Syrup, the kind you have always bought. The Tablets are intended for those who prefer to swallow a tablet rather than a syrup, and as a convenience for those who travel. The tablets are called "GROVE'S chill TONIC TABLETS" and contain exactly the same medicinal properties and produce exactly the same results as Grove's Tasteless chill Tonic which is put up in bottles. The price of either is 60c.

160 ACRE FARM IN WESTERN CANADA. Get under the Shower of Gold. coming to farmers from the rich wheat fields of Western Canada. Where you can buy good farm land at \$15 to \$30 per acre and raise from 20 to 45 bushels of \$2 wheat to the acre it's easy to make money. Canada offers in her provinces of Manitoba, Saskatchewan and Alberta 160 Acre Homesteads Free to Settlers and other land at very low prices. Thousands of farmers from the U. S. or their sons are yearly taking advantage of this great opportunity. Wonderful yields also of Oats, Barley and Flax. Mixed Farming is fully as profitable an industry as grain raising. Good schools, markets, convenient climate, excellent. Write for literature and particulars as to reduced railway rates to Supt. Immigration, Ottawa, Canada, or to J. P. JAFFRAY, Cor. Walnut & Broad Sts., Philadelphia, Pa. Canadian Government Agent

SEEKS ELECTION TO PLACE LEFT BY HUSBAND

Plattsburg, Mo.—Mrs. Laura Stone, wife of Lieutenant Clark, former county clerk of Platt county and now in the National army, has decided to become a candidate for the office which she holds by appointment. When her husband was called Mrs. Clark was appointed to his place. Now she will try for the honor in the election.

It is estimated that less than 2,000,000 acres of land in British East Africa are cultivated out of a total acreage of more than 150,000,000.

NEW JOB FOUND FOR ACTOR

Too Delicate for Soldiering, So English Comedian Is Put to Painting Buckets.

London.—Miss Ena Moore, a talented actress, told a new story of the "vag" they have in the army" at a meeting held in aid of the Theater Girls' club at the Mansion house.

She said that recently the leading comedian of a revue was called up, being of the new military age, the revue could not go on until his place was filled. The revue girls were stranded for weeks, at the end of which it was found that the comedian was too delicate for an active soldier—so he was put to painting buckets.

Want Italian Shoemakers.

Washington.—A recruiting campaign for Italian shoemakers in America is being conducted by the Italian government. Those offering their services will be sent back to Italy, where they will be employed to help eliminate the shortage of footwear.
