With a marine at the head of each one of these searchlights, it will be practically impossible for any foreigner to pass our shores at night undetected. The crews of these batteries are put through a strenuous course of training and know the minute an alarm is sounded just what to do. The commanding officer and two government officials may be seen in the foreground.

## MILITARY DOGS HELP THE ALPINE FIGHTERS OF ITALY

The dog, above all other animals, has proven itself to be of invaluable service to the Italian fighting forces in the Alps. Whereas the horse and the mule are practically useless when it comes to climbing narrow snow-covered roads at dizzy heights, the dog has shown its strength and power of enduring hardships. These military dogs are used extensively to carry food and water to the outposts, which are at times inaccessible to humans. ## ARE STRINGING BARBED WIRE

Prisoners Gave Information That It Was Being Employed By Troops At Rest And Was Large Enough To Conceal Two Regiments.

American Army on the Vesle.—Allied aviators have reported that the Germans are digging in opposite the Franco-American line along the Vesle. The observers also have reported that the enemy is stringing barbed wire along the hills northwest of Pines. Allied officers express the belief that the Germans will not give ground here unless they are deliberately pushed off the plateaus.

The Americans learned from German prisoners that the enemy was using an old rock quarry cave in the region of Longueval, large enough to conceal two regiments. He employed it as a refuge for troops at rest. The Franco-American heavy artillery shelled the cave all day Saturday and the Germans were finally compelled to abandon it as a hiding place.

The guns of the Franco-Americans got the range of the entrance to the cave and kept up a continuous fire all day. Observers reported that the cave had been considerably damaged and was rendered virtually untenable.

The Germans are digging trenches along the line west and east of Longueval and also in the Valley of the Perles.

Allied aviators on Saturday did not observe the Germans building any big gun emplacements, but here and there they were installing batteries. Most of these were of light calibre, which the Germans will be able to move to other positions when the French and Americans discover their locations.
