#### Walnut Timber Wanted.

The bureau of Aircraft Production of the War Department has requested the Red Cross to give the widest possible publicity to walnut wood for use in making aeroplane propeller blades and gun stocks.

Only part of the lumber produced from each tree can be used by the Government and no sale can be made direct to the Government. Persons having walnut timber for sale can write direct to the Ordnance Department, Procurement Divison, Small Arms Section, Washington D. C., giving number of trees and their location.

# Your Own Judgment

Nine times out of ten it pays to back your own judgment, especially in financial affairs. It's your money you spend and if you fail, you will have learned a lesson, and will profit by the experience.

When you permit other people to invest your money for you, you usually pay dearly for their service. Our bank does not invest your funds for you. We merely safeguard your money until you are ready to invest it yourself. Then if you want our advice, we will give it cheerfully and to the best of our ability, but our first care is to safeguard our depositors' funds and to offer all other accommodations of modern banking. Can we be of any service to you?

The public should understand that the profits of the packers have been limited by the Food Administration since November 1, 1917. For this purpose, the business of Swift & Company is now divided into three classes:

Class 1 includes such products as beef, pork, mutton, oleomargarine and others that are essentially animal products. Profits are limited to 9 per cent of the capital employed in these departments, (including surplus and borrowed money), or not to exceed two and a half cents on each dollar of sales.

Class 2 includes the soap, glue, fertilizer, and other departments more or less associated with the meat business. Many of these departments are in competition with outside businesses whose profits are not limited. Profits in this class are restricted to 15 per cent of the capital employed.

Class 3 includes outside investments, such as those in stock yards, and the operation of packing plants in foreign countries. Profits in this class are not limited.

Total profits for all departments together in 1918 will probably be between three and four per cent on an increased volume of sales.

The restrictions absolutely guarantee a reasonable relation between live stock prices and wholesale meat prices, because the packer's profit cannot possibly average more than a fraction of a cent per pound of product.

Since the profits on meat (Class 1) are running only about 2 cents on each dollar of sales, we have to depend on the profits from soap, glue, fertilizer (Class 2, also limited) and other departments, (Class 3) to obtain reasonable earnings on capital.

Swift & Company is conducting its business so as to come within these limitations.
