Act Quickly.

Do the right thing at the right time

Act quickly in time of danger. In time of kidney danger, Doan's Kidney Pills are most effective.

Plenty of McConnellsburg evidence of their worth.

Mrs. D. Keyser, McConnells burg, says: "My back ached constantly and the pains in my loins were so severe it was almost impossible for me to bend over. I had but little strength and my housework became a burden. One box of Doan's Kidney Pills, procured at Trout's Drug Store, cured me."

A Lasting Effect.-Over two years later, Mrs. Keyser said: "Doan's Kiduey Pills completely cured me of kidney trouble. am in good health now.

Our Individual Part.

Some observers think that the most characteristic thing about the American soldiers in France, something which astounds the enemy and excites the admiration of our allies is the capacity of the American soldiers to do individ ual thinking and fighting. The German fights sucessfully only in mass formation, in organized bodies, while every American soldier has an initiative and independence of action which gives him remarkable efficiency in open fighting. They are not senseless cogs, but each is an individual working unit in a great fighting machine.

Every American at home should feel an individual responsibility and do his or her individual part in winning the war. There is not an American citizen who can not help win the war. The Fourth Liberty Loan drive, which begins September 28. offers a great opportunity for concerted action and for individ ual action, and the loan will be a tremendcus success if esch American will do his or her individual part as each American soldier in France does his part. Our soldiers deserve such support from the people at home.

DECLINE OF JUVENILE BOOKS. A painstaking summary of the production of books for juveniles in the past 28 years shows that in proportion to the total number of all books published there has been a distinct

falling off, while the situation when viewed in relation to our increase in population becomes to the writer a matter of "curious" concern. The total output of books in the United States in 1890 was 4,559, of which 408, or about 9 per cent, were juveniles. In 1917 the total was 10,060, of which there were 504 juveniles, or about 5 per cent. It does not follow, however, that the habit of reading is not growing smong youths of both sexes, says day with his parents have Mr. Portland Oregonian. Ordinary observation and the experience of most librarians would indicate the contrary.

> The fact would seem to be that the young folks are more discriminating in their tastes, that they are reading the same things that their fathers and mothers are reading, and that the practice of "writing down" to them has consequently become unpopular. There is, after all, a great plenty of books made primarily for grownups which also are pleasing, instructive and inspiring to children of various ages, The happy family is the one which has common fireside interests-and there are many such.

If the daring Italians who made their way into an Austrian naval port and torpedoed a battleship have been cuptured, they will very likely pay a heavy price for the fame which will carry their names down to posterity as among the heroes of naval history, for the Huns are not of a caliber to feel such men they would have treated a generous admiration for a courageous enemy. Had the allies captured

them with all the consideration due unusual bravery, but in German hands they are likely to feel all that can be inflicted on them by a mean spirit of spiteful revenge.

Two of the torpedo boat destroyers now under construction are to bear the names of naval officers who lost their lives in acts of heroism since the United States entered the war. These are Lieut, Stanton Frederick Kalk, officer of the deck of the Jacob Jones, and Gunner's Mate Osmond Kelley Ingram of the Cassin, torpedoed in European waters. The policy of Secretary Danlels in thus commemorating naval heroes while their fame is yet fresh in mind is to be commended.

The movement to utilize the boy power of the country on the farms is a good one. It will supply much needed labor now, and the knowledge it will impart will last in usefulness long after the war is over. Furthermore, its effect in morale and health in getting the growing generation next to nature's heart will be a vast gain in

Now and then there is an exception, but as a rule every mean, contemptible act, every unworthy motive or deed, ev-

itself.

SAVED HIS WOUNDED MASTER

French Soldier Dragged to Safety From No Man's Land by His Dog.

Michel had centered his affections on a young Frenchman, named Henri, whom he followed even into the trenches, writes Mrs. Elphinstone Maitland in an article on war dogs, in the People's Home Journal. The feeling, of course, was mutual. Henri loved the dog even to the point of sharing his all with him. Each day at soup time, Michel would carry his can, place it beside Henri's, wait till it was filled and then trot off to eat his meal.

The time came when Henri, who had gone over the top, failed to return after the fight. As man after man stumbled back to safety, Michel eyed each with the eagerness of anxiety, his nostrils quivering with fear. But still Henri failed to appear. Then, as the last of the line clambered back to the trench, the dog could stand his terror no longer. Out he darted over No Man's Land, and presently he returned with a glove that he had torn from the hand of his friend.

Immediately a litter went out, guided by Michel. They found his master far off, lying cold and stiff. Deciding he was dead, they departed without him. Michel, however, was not so easily convinced. Time after time he went back for aid, but none was forthcoming. At last he left alone.

Late that night when comparative quiet had settled on the trenches, an alert sentinel, keeping guard on a listening-post, saw a dim something that brought his rifle sharply to his shoulder. Not twenty fect away and creeping toward the traverse was an object which he could not distin-

guish. Then the moon came out from behind a cloud, and the sentinel recognized Michel.

There he was, breathless and panting, but he was not alone. Behind him, his clothes torn by the faithful dog's teeth, was Henri. Inch by inch, the animal had dragged him from the battlefield, and miracle of miracles! the boy was breaking. How the dog had discovered signs of life in the inert form, which had eluded the trained eye of a field attendant, the doctor would not attempt to explain. Henri recovered. He returned to the trenches, with Michel by his side.

FIRST BALLOON WITH RUDDER.

The first steerable balloon, the forerunner of the once-dreaded Zeppelin, was tried in Berlin 36 years ago, but, like many of its descendants, it suffered an accident and was disabled the second experiment, says the New York Evening World. Helmholtz was the first to suggest, in 1872, that balloons might be steered, if moving slowly. The principle on which balloons are based was first formulated by Albert of Saxony, an Augustine Monk, in the fourteenth century. In 1783 Joseph and Stephen Montgolfler of France made a successful ascent in a fire balloon, and a few months later, in the same year, two Frenchmen made the first ascent in a hydrogen balloon at Paris.
