Mr. and Mrs. Robert Mellott desires to express their gratitude to the kind friends and neighbors for help and sympathy during the illness and death of their daughter Lena.

The Tod township auxiliary of the Red Cross cleaned up 84 good dollars at their festival in Dan Trout's woods last Saturday evening.

Tire Conservation.

Conservation and preparedness are two watchwords which exemplify the spirit of the times, and which should be of special meaning to the tire user, according to a Fisk Rubber Company official. Curb rubbing, rut driving, and driving in the car tracks should be avoided as far as possible, thus preventing unnecessary bruises and fabric cuts which shorten the life of the tire. Proper inflation, and correct alignment of the front wheels, should also be carefully watched, for these factors have considerable effect on mileage.

As a matter of preparedness, a small sundry kit should be in every automobile. If a driver is unlucky enough to suffer a second puncture, after having applied his spare tire, he will be in an unfortunate predicament without a kit. Quick repairs can be made with even a small kit. With a few patches, a blowout boot, cement, valve inside, and a small amount of filler, practically any small repair can be made, and fabric or tread breaks filled so as to prevent sand or pebbles working into the tire. These small details are of prime importance today, when conservation must be practiced to the end that our materials and energies may be applied to the forwarding of war aims.
