We Are Progressing

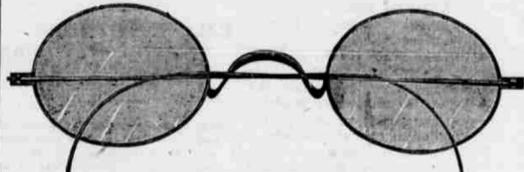

There is an old proverb that a wise man changes his mind, but a fool never does. The wise man has to change his mind to keep up with the times.

Your grandfather thought he was putting on style when he took his best girl-out horseback riding. The young man today would like to have a six-cylinder car for his lady love. The smart man of today will be considered "old fogies" by the next generation. We are progressing, changing, keeping step with the times, that's all. Especially is this true of financial matters, modern banking. Few people keep their money hid about the house or run the risk of carrying it on their person. They follow the modern plan, keep their funds in a reliable bank like ours and pay by check. It's the safe, modern, convenient way.

Sugar Allotment increased.

Owing to the improved condition of the sugar supply, the allotment has been increased to three pounds per person per month. The merchants of the county are hereby authorized to sell to their customers not to exceed three pounds for each member of the family, during the month of November.

One half month's supply may be sold at a time. In other words, each merchant may sell to his customers at one time, if desired enough sugar to make up the full three pounds per member of the customer's family, when added to what the customer has already purchased in November.

The counter record should be kept as before, and such changes made as are necessary to show clearly the increased allotment and the amount sold to each customer.

Don't forget that there is still a great need for saving sugar as well as all other food.

as a reliable means of thwarting the enemies of strength. Scott's is Nature's ally and its rich tonic and strength-supporting properties are known, with satisfaction, to millions. Build up your strength with the nourishing qualities of Scott's Emulsion.

No Mystery in Meat

Some things are so simple that they have to be explained again and again. When things are obvious, people keep looking for mysteries behind them.

So it is with the packing business. The mere size of Swift & Company confuses many. Because their imaginations are not geared up to scale, they believe there must be magic in it somewhere—some weird power.

Swift & Company is just like any other manufacturing business run by human beings like yourself; it takes in raw material on the one hand and turns out a finished product on the other.

Swift & Company keeps down the "spread," or the expense absorbed between raw and finished material, to as low a figure as possible. (If it didn't it would be put out of business by others who do.)

How much Swift & Company pays for the raw material, and how much it gets for the finished product, depends upon conditions which Swift & Company does not control.

It depends entirely upon how much people want the finished product, and how much raw material there is available to make it from.

The profits of Swift & Company amount to less than one cent per pound on all meats and by-products—less than one-fourth of a cent on beef.
