Be Thankful.

Now that the great war has ended and nations are once more at peace, it is fitting and proper that we should celebrate our holidays this year in a different manner from that of former years.

Thanksgiving this year has a double meaning, in that we should be doubly thankful that the carnage and destruction of this terrible war have ended, and that we will soon have our boys home again. We should be thankful especially to our heroes, who so gallantly gave their lives that democracy may live. We should be thankful that we have had sufficient food to supply us during these four long and terrible years, and that while we have had to be conservative in our use of it, we have not been deprived of it or suffered the pangs or starvation and hunger that have been felt across the sea by many countries, especially Belgium.

American Losses 69,420.

America's casualties in the war made public up to the hour of the cessation of hostilities totaled 69,420. Of these 12,460 were killed in action.

Thousands more have been killed, wounded or captured, and it probably will be many weeks before the last list is compiled.

ROBUSTNESS

Nature has not been prodigal with everybody in the matter of robustness. Many, all through life, must stand guard and combat colds, coughs, bronchitis or perhaps more serious pulmonary ailments. For nearly five decades

SCOTT'S EMULSION

has been helping to turn weakness into strength. For those who are delicate, with tender lungs, weak throats and a proneness to debility and anemia, the definite nourishing and tonic qualities of Scott's are of special value.

THANKSGIVING

Liberty loving America pauses in this war wasted world for a day, to observe the custom inaugurated by our pilgrim forefathers. It warmly can welcome the promise of peace, because that shall mean right rather than might, kindness rather than kultur, brotherhood rather than barbarism, democracy rather than autocracy, humanity rather than brutality.

Truly all of us are thankful that a better order of things shall be left a heritage to following generations, and are sincere in that thanks for the opportunity each has been given, to make his personal sacrifice on the high altar of civilization. Inspired by such thoughts, America pledges its power for a permanent peace on this feast day of freedom.

Flu More Deadly Than War.

The recent epidemic of influenza in the United States caused more deaths than occurred among the American expeditionary forces from all causes from the time the first unit landed in France until hostilities ceased.

This announcement by the census bureau was made on the official estimates of the total casualties of the overseas reports and reports from forty-six cities, having combined a population of 23,000,000 which showed 82,306 deaths from flu and pneumonia from September 9 to November 9.

The total of deaths due to the flu epidemic in this country is not known, the announcement said, as only the forty-six cities, for which figures were given, report vital statistics to the census bureau.

The greatest mortality due to the epidemic in proportion to population was 7.04 per thousand in Philadelphia and the next 6.07 was reported from Baltimore.

Two To One.

If you want to know how it feels to be a candidate for Governor of Pennsylvania on a wet platform in the year 1918 ask John Bonniwell of Philadelphia. He knows all about it. A few days previous to the election he announced that his majority would be 100,000. The results have been tabulated and the voters of the state have informed the Judge that they do not care either for him or his platform. His defeat by a vote of almost two to one ought to mean the ratification of the Prohibition Amendment when the Legislature meets in Harrisburg in January.

Interesting Facts.

China is much larger than the whole of Europe.

Twenty cents per week per capita, or \$250,000,000 per year is what Protestant America is giving to the church work.

Africa is as large as the British empire; four times the size of the United States, and ten thousand times as large as Rhode Island.

There is a region in North Africa almost as large as the United States, with a population of many millions, that is practically unoccupied.

The interior of South America, inside of about five hundred miles from the coast, has an area of 3,000,000 square miles, and in this vast territory there are only forty Protestant missionaries.

In the United States, 17 per cent of the entire population is in school; in Brazil only three per cent; in Chili 5 per cent; in Uruguay 7 per cent; in the Argentine Republic, 9 per cent.

Card of Thanks.

As it seems the mighty events of the day have brought the world war to a close, we desire to extend to the citizens of Fulton County our hearty thanks for their loyal support.

Our duty has been an unpleasant task. Regardless of our personal feelings, we tried to the best of our ability to follow the rules laid down by the Selective Service Regulations.

We desire to congratulate the registrants of our county in their prompt response to all calls, some of which caused inconvenience and expense; but we were only carrying out the duty imposed upon us by the war department. There was never a call made for our boys that they did not respond and filled the quota called for. In their prompt response all honor is due the boys of Fulton County.

To our boys we extend our personal congratulations upon their truly great achievements.

The living will come back; but the dead, who we believe are few, will remain where they fell in defense of their country's rights. They must not be forgotten.

The work has taxed us to the uttermost—at times being compelled to neglect our personal business.

In a large measure credit for having given civilization to the world must be given those who went to the front, to the camps, and those who remained ready for the call and were anxious to go.

It is true all could not go, for it was necessary to increase the food production to feed the Army.

In continuing the completion of our work, we extend to those who have assisted in any way our sincere thanks.

With our deepest appreciation and thanks for your loyalty and patriotism, we wait for the return and prosperity of those who will come back; and for those who have been unfortunate and died for their country's cause, we extend to the parents and friends our sympathy.

We are, Local Draft Board Fulton County.

Sportsmen, Take Notice!

For the better protection, preservation and propagation of wild game, birds, game mammals, and game fish, the Red-Wolf Rod and Gun Club, and Game Protective Association, has recently been formed—sociable and inoffensive in time of peace, but revengeful, and relentless when goaded to anger.

The object and purpose of this organization is the propagation and protection of the wild game in our forests, and the fish in our streams. The conflict in Europe, clearly demonstrated to us the consequences which follow a disregard of law and the rights of those who would abide by the laws of the land.

All spirituous malt or brewed liquors are being legislated out of public use—not because of its being useless and unnecessary, but on account of its abuse and the flagrant violations of regarding its use. So, likewise, is our game and fish laws being violated.

But a few years since our streams abounded with fish, our forests and hills here alive to the call of the Quail, and the fluff of the Pheasant—and the strut of that grand game and noble bird the Turkey Gobbler, but now all, almost extinct. Why, because of the disregard of the law.

Thousands of dollars are contributed annually by the sportsmen of the country for the protection propagation, and liberation of game and as Compensation of game wardens, game protectors and deputy game protectors, all of whom are sworn to perform certain duties, relative to their each and every official position. Some of which beyond a doubt are true to the trust imposed, while we have good reason to believe that others either through bigotedness, ignorance, or intentionally, greatly exceed their authority, and to the full knowledge of their superiors and greatly to the detriment of a well intended project, and yet the gamehog and the sack-season hunter is abroad in the land with us and roam the forests at will, and their number is legion, and there in lies much cause for our trouble, intentional violation of the law.

Thousands of domestic turkeys are raised annually in almost every county in this commonwealth. And it is the opinion and belief of this organization—that with but a fractional part of the annual cost of the maintenance of our present well intended game protective system, and through a more judicious system of feeding, and care through the more difficult winter months, and by the liberation for a limited time of wild game birds and game mammals, and with the restocking of our streams with fish suited thereto—combined with a Vigilant and relentless prosecution and enforcement of the game laws, regardless of person or persons, or place of residence. That in the near future thousands of wild game of all kinds (native) would abound in our forests and hills, the natural habitation of all wild game, as well as the fish in our streams—and in this our present combining in unison together for the protection and propagation of game in our forests and fish in our streams.

We ask and solicit the co-operation of all interested in the protection, preservation and liberation of wild game.
