The editor is changing residences this week in order to give Seibold & Runkle an opportunity to convert the house he occupied into a store room by the 1st of April. We could not devote the usual amount of time to the Post this week, and any omissions in it must be accredited to this cause.

Worms are the scourge of childhood. Thousands of children die or grow up weak and sickly, with disordered nerves and stunted minds, the food necessary to their growth having been eaten up by these disgusting parasites. DR. WALKER'S CALIFORNIA VINEGAR BITTERS not only expels worms, but frees the stomach from the unhealthy secretions in which they breed.

Rev. Spangler's lecture on "Cranks" in the Court House on Wednesday evening of last week, was not as largely attended as the occasion merited, owing to the very unpleasant weather, which, however, did not detract from the merits of the lecture, as it was by general consent admitted to have been the richest literary treat Middleburgh has had for years. It would be useless to endeavor to portray the richness and beauty of the lecture, for, in order to appreciate it, it must be heard.

We have not gone to the trouble and expense to bill the county with our rates for printing sale bills as we have not been enabled to enlist an auctioneer in our behalf. We did not deem it necessary to assure our patrons with a promise of fair dealing, as they always got it before. We would just say, however, that the Post will print bills as cheap as any paper in the county—and cheaper if any throat-cutting is to be indulged in.

WE ENDORSE THEM.—Messrs Mohr and Houser, the Republican Commissioners, have very considerably granted the Sons of Veterans the use of the Court House at Middleburgh, to hold a lecture in for the benefit of Lt. George K. Hackenberg Camp. We are among the number that believe that the Court House should be given to the use of the public for Lectures and entertainments, and most especially to the Grand Army and the Sons of Veterans. Had it not been for the men who took their lives in their hands, the fathers of the Sons of Veterans, when red visaged and threatened to disrupt this country of ours, in all probability there would be a different state of affairs, and whilst there may be some propriety in preventing everything from being exhibited in the Court House, although we fail to see a good and valid reason, as a change should be made, and the money thus earned be paid into the County Treasury; there certainly can be no reason why the Sons of Veterans, and their fathers, members of the G. A. R., should not be allowed the Court House for public entertainments. We congratulate Messrs Mohr and Houser upon the patriotic stand they have taken in the matter, and we believe that the community at large, irrespective of politics will endorse them.—Tribune.

ADAMSBURG NEWS.—On the 25th, our telegram, J. E. Honeycutt, received a telegram from Saxton, Bradford county, Pa., announcing the fatal accident which had happened to Andrew Helfer a former resident of this place. While Mr. H. was at work in the coal mines at that place, the coal caved in on him, crushing his skull and otherwise injuring him so that he died on the 25th. He was brought to his father-in-law, Mr. Michael Ewing, in Adams township, and was buried at Troxville on the 31st. The company for which he worked, furnished him with a handsome coffin. He was aged 43 years and 4 months, and leaves a wife and four children. The bereaved widow extends her thanks to the citizens of Saxton for the many acts of kindness she received at their hands.

On Tuesday as J. C. Specht was working with a chisel he accidentally cut an ugly gash in his knee.

The Kennshall Bell Ringers had billed the town for an entertainment recently but failed to make their appearance.

Mr. S. C. Bachman is on the sick list.

Among the visitors to our burg this week were Judge Bucher, Dr. Rook, Green and Getis of Lewisburg, J. A. Romig of Millin, Isaac Smith of Philadelphia and Miss Bickel of Indiana.

THE SELINGS GROVE WATER WORKS.

There seems to be an undue haste to announce publicly that the Selingsgrove Water Works are completed and in successful operation. One of the papers here is of course expected to do the bidding of Herdie and his local satellites—the same as it did for the Selingsgrove and North Branch railroad project, the Snyder County Bank, the graveyard insurance companies, etc., as this water-works business is managed by about the same party—minus Meeker. The people who were "skinned" by the above schemes upon the recommendations so persistently published by this "organ" of Meeker and the other ringleaders associated with him, will probably be somewhat slow in again appreciating his advice. They will probably scratch their heads and study a good while, before investing in any new scheme recommended by this "organ." The other paper published here, as early as Jan. 21, 1886, announced as follows: "The Selingsgrove water works are in successful operation." Again: "The water works do noble work so far." This announcement can be attributed to recklessness, inebriety, or something worse, for there is not a word of truth in the statement. Last week the publisher of the Sunbury American was down here one day, and no doubt was "seen" and interviewed. At any rate he went home and published the following: "Down at Selingsgrove the people are delighted over the success of the water works just completed. Since the addition of this improvement fire insurance rates have gone down wonderfully." A more bare faced falsehood was never published. The water works are by no means completed nor in successful operation. Are these false statements put out to deceive the public into purchasing water works bonds? They could not have been published, undesignated, as they are not true. There is no basin yet made, and until that is done the water works are not completed. There is no doubt these false publications emanated from an interested source. Falsehood, deception and misrepresentation are the three elements that constitute the atmosphere that surrounds this whole water-works business. It yet remains to be said further, that so far as these water works have been tested by the power of the engine only they have proved a failure and have not come up to the contract. It remains to be seen what the basin will do, should one ever be made; and until then how can it honestly be said the works are completed and work successfully and that the people are delighted.
