The editor of the Middleburgh Post started on Tuesday on a deer and bear hunt. He was well provided with rifles and "ammunition" in jug. Happy is Bro. Harter. An exchange very sensibly remarks that always at this time we hear of more conflagrations than at any other time of the year. Stoves are set up and a rousing fire started, when perhaps the chimney has not received any attention at all, and the house "goes up the flue" on account of its defectiveness. Exercise care in this particular.

A parent who has no idea where his children spend their evenings, need not be surprised if those children bring his gray hairs in sorrow to the grave. Nor can he escape responsibility for their misdoings if their lives are ruined. There are a great many parents in this town, judging from the appearance of the streets after nightfall, who have but slight jurisdiction over the younger members of their families.

At all events if there are any deer in the region of Booney's shanty, we feel certain that the editor of the Post will give them a good chase during the 25th day of the month."

During the past week or two several cases have appeared in the newspapers of incendiary fires at the hands of tramps, who have been refused lodging or money by those upon whom they have revenged themselves. This is a warning to the proper authorities that they should enforce the law against these wandering incendiaries. It is a long time since we have heard of a tramp case of conviction. The law is both definite and adequate, and if farmers would take the proper measures there would be no difficulty in bringing these vagrants to justice.

DANIEL S. BOYER, Co. Supt. At a meeting held in Salem, Penn twp., Snyder county, Pa., Nov. 9th, 1886, to take action upon the "Wheat Question" the following resolutions were unanimously adopted.

First, That the great portion of people now engaged in agriculture throughout the county recognizing the deficiency existing in many departments into which the farmer is drawn demand that certain existent evils be remedied, that all men, particularly the husbandmen, may reap just reward for just labor.

Second, That the present prices paid the farmer for his products, especially wheat, is altogether too low in comparison with other marketable products, that it is totally disproportionate in relation to the price universally charged the farmer and other buyers of relative goods and is unfair and unreasonable.

Third, That we say that wheat should at no time be sold for less than one dollar per bushel and that we believe that all classes of people, farmers, laborers, manufacturers, merchants, artisans and all persons engaged in any honorable business pursuit would be immeasurably aided in honest endeavors to gain an honest livelihood, by the adoption of the above and that the thrift, general industry and morals of the people would be largely augmented and invigorated by such measures.

Fourth, That we call upon all honorable men engaged in the high calling of Agriculture in whatever branch or form, to use legitimate means to bring about this result of \$1.00 per bushel.

Fifth, That we urge the convocation of meetings in each township in the county for the purpose of discussing these questions in point and that we diligently strive to give strength and breadth to our actions, believing that it be for the welfare of all working-men to do so.
