"It is not every owner of canary birds who knows how to properly feed and care for one," said a Sixth Avenue bird fancier to me yesterday. "Their singing qualities, and even their lives, depend to a great extent on healthy surrounding. The first requisite is a suitable cage. Many will buy a painted one, and after the bird dies they will wonder at the cause. If they would look at the wires of the cage the paint would be found to have been pecked off. The white lead in it is sufficient to kill any bird. Nothing but plain brass or iron wire cages should be used, and in no case should paint be employed. The brass cage is only dangerous when not kept clean, as verdigris will collect in the crevices. The best article for cleaning this cage is paste composed of ammonia and whiting, which must, after application, be thoroughly rubbed off with a soft, dry cloth. The inside of any bird cage should be kept as clean as possible, in no case allowed to go more than one day without being thoroughly renovated. Fresh drinking water should be given every day, taking care to keep the cup clean. Some birds at first evince a reluctance to bathe. They must be trained to do this by sprinkling water over them until a liking for it is acquired for without a daily bath cleanliness and health cannot be had. In feeding a bird nothing is better than plain canary seed. Many people use mixed seed, but a too liberal use of this is likely to cause the bird to grow fat, and unless the cage is large enough to permit of free exercise death will result. Sugar, cake or other sweets are very injurious. Neither conduces to health, while everything of a saccharine character tends to weaken the voice. Almost anything green is excellent besides delighting the bird. No cage is perfectly equipped without a piece of cuttlefish. If these simple requisites are faithfully observed and the cage kept in a dry corner of the room where no draft will ever strike it, the trouble will be amply repaid by having a healthy, songful bird.—Ex.

LETTER FROM THE EX-SHERIFF OF CHAUTAUQUE COUNTY, N. Y.

Maryville, N. Y., Dec. 2, 1885.
I am glad to say, from a long personal experience with Alcock's Porous Plasters, that I am able to endorse all the things that have ever been said about them, and supplement these by saying that I frankly believed their value cannot be estimated. Their breadth of usefulness is unlimited, and for prompt and sure relief to almost every ache and pain that flesh is heir to, no other remedy, in my opinion, either external or internal, equals them in certainty and rapidity. I have used them at one time for rheumatism, another for backache, again for bronchitis, always with the same result—a speedy cure.

Reducing the Surplus.
The disposition of the Surplus in the U. S. Treasury engages the attention of our Statesmen, but a more vital question has our attention, and that is the reduction of the Surplus Consumptives. Since the discovery and introduction of Dr. King's New Discovery for consumption, there has been a marked decrease in the mortality from this dreaded disease, and it is possible to still turn the surplus into the number of Consumptives. How? By keeping constantly at hand a bottle of Dr. King's New Discovery and using according to directions, upon the appearance of the first symptoms, such as a Cough, a Cold, a Sore Throat, a Chest, or Side Pain. Taken Trial bottles free at G. M. Shindel's Drug Store.

Dr. Theel, the great Specialist, has cured more cases of special, kidney, blood and nervous diseases than all others combined. The power of healing that the Doctor possesses is no doubt due to his complete, practical knowledge of the allopathic, homeopathic and eclectic system of medicine.
