TEXT.—"The people that do know their od sha'l be strong, and do exploits."-

Antiochus Epiphanes, the old sinner, came wu three times with his army to desolate e Jews, advancing one time with a hungi and two trained elephants swinging eir trunks this way and that, and sixty-to thousand infantry, and six thousand realry troops, and they were driven back, ben the second time he advanced with seveny thousand armed men and had been again teated. But the third time he laid successive in seguntii the navy of Rome came in with a flash of their long banks of oars and manded that the siege be lifted. And attochus Epiphanes said he wanted time rousuit with his friends about it, and Popies, one of the Roman embassadors, took a consuit with his friends about it and Popt-s, one of the Roman embassadors, took a aff and made a circle on the ground around atlochus Epiphanes, and compelled him to cide before he came out of that circle; berspon he lifted the siege. Some of the ws had submitted to the invader, but some ws had submitted to the invader, but some them resisted valorously, as did Eleaver, en he had swine's flesh forced into her, enth, spit it out, although he knew he must for it, and did die for it, and others, as test and the second define to be a heroic

An exploit I would define to be a heroic a brave feat, a great achievement. Vell," you say, "I admire such things but see is no chance for me; mine is a sort of mirum life. If I had?an Antiochus Epiphes to fight I also could do exploits." You eright so far as great wars are concerned, ere will probably be no opportunity to disguish yourself in battle. The most the brigadier-generals of this country and never have been heard of had not been for the war. General ant would have remained in the out work of tanning bides at Galena, and newall Jackson would have continued the let college professor in Virginia. And jet college professor in Virginia. And activer military talents you have will obably lie dormant forever. Neither will u probably become a great inventor, neteen hundred and ninety-nine out of ery two thousand inventions found in the ery two thousand inventions found in the tent office at Washington never yielded eir authors enough money to pay for the transes of securing the patent. So you will olishly never be a Morse or an Edin, or a Humphrey Davy or an Edin, or a Humphrey Davy or an Edinitory. There is not much probability at you will be the one out of the hundred at achieves extraordinary success in comercial or legal or medical or literary theres. What then! Can you have no opertunity to do exploits! I am going to low you to day that there are three opporartimity to do exploits? I am going to ow you to-day that there are three oppor-nation open that are grand, thrilling, far-sching, stupendous and overwhelming, sey are before you now. In one, if not all ree of their, you may do exploits. The ree greatest things on earth to do are to

Why did not some one long in the case understand that we was an opportunity for the exploit the would be famous in heaven a quadrill-of year after the earth has become n of years after the earth has become attered ashes in the last whirlwind: Why d not the District Attorney take that young an into his private office and say "My n, I see that you are the victim of circumn, I see that you are the victim of circum-ances. And devils make a banquet of fire and fill their cups of gall and drink deep to the health of the old merchant who swallowed up the young merchant who got stuck on spring goods and went down. That is one way and some of you have tried it.

But there is another way. That young merchant who found that he had miscalculated in laying in too many goods of one kind and been flung of the unusual season, is standing behind the counter feeling very blue and biting his finger nails or looking over his account books, which read darker and worse every time he looks at them, and thinks how his young wife will have to be put in a plainer house than she ever! exceed to live in, or go to a taird rate boarding-house where they have tough liver and sour bread five or go to a taird rate boarding-house where they have tough liver and sour bread five mornings out of the seven. An old merchant comes in and says: "Well, Joe, this has been a hard season for young merchants, and this prolonged cool weather has put many in the doldrums, and I have been thinking of you a good deal of late, for just after I started in business I once got into the same scrape. Now if there is anything I can do to help you out I will gladly do it. Better just put these goods. will gladly do it. Better just put those goods out of sight for the present and next season we will plan something about them. I will help you to some goods that you can sell for me on commission, and I will go down to one of the wholesale houses and tell them that I know you and will back you up, and if you want a few dollars to bridge over the present Lean let you have them. Be assessment is a want a few dollars to bridge over the present I can let you have them. Be as economical as you can, keep a stiff upper lin, and remember that you have two friends, God and myself. Good morning? The old merchant goes away and the young man goes behind his desk and the tears roll down his cheeks. It is the first time he has cried. Disaster made him mad at everything and mad at man and mad at God. But this kindness melts him, and the tears seem to relieve his brain, and his spirits rise from ten below zero to eighty in the shade, and he comes out of the crists. And about three years after, this young merchant goes into the old merchant's store and says: "Well, my old friend. I was this morning thinking over what you did for me three years ago. You helped me out of an awful crisis in my commercial history. I learned wisdom and prosecults has come and the relief has mercial history. I learned wisdom and pros-perity has come, and the patier has gone out of my wife's cheeks, and the roses that were there when I courted her in her father's house have bloomed again, and my business is splendld, and I thought I ought to let you know that and I thought I ought to let you know that you saved a man?" In a short time after, the old merchant who had been a good while shaky in his limbs and had poor spells is called to leave the world, and one morning after he had read the twenty third Psalm about. "The Lord is may Shecherd," he closes his eyes on this world, and an angel who had been for many years appointed to watch the old man's dwelling, cries upward the news that the patriarch's spirit is about ascending. And the twelve angels who keep the twelve gates of heaven unite in crying down to this approaching spirit of the old man; "Come in at any of the twelve gates you choose! Come in and welcome, for it has been told all over these Calestial neighborhoods that you saved a man."

saved a man. There sometimes come exigencies in the life of a woman. One moraing about two years ago I saw in the newspaper that there was a young woman in New York whose pocketbook containing thirty-seven dollars pocketbook containing thirty-seven dollars and thirty-three cents had been stolen and she had been left without a farthing at the beginning of winter in a strange city, and no work. And although she was a stranger, I did not allow the nine o'clock mail to leave the lampest on our corner without carrying the thirty-seven dollars and thirty-three cents; and the case was reveal convine. Now I and the case was proved genuine. Now I have read all Shakespeare's tragedies, and all have read all Shakespeure's tragedies, and all Victor Hugo's tragedies, and all Alexander Smith's tragedies, but I never read a tragedy more thrilling than that case, and similar cases by the bundreds and thousands in all our large cities; young women without money and without home and without work in these great masteroms of metropolitan life. When such a case comes under your observation, how do you treat it? "Get out of my way, we have ne room in our establishment for my more hands. I don't be lieve in women any way, they are a lazy, ide, worthless set. John, please show this person out worthless set, John, please show this person on of the door." Or do you compliment her per-sonal appearance and say things to her which if any man said to your sister or daughter you would kill him on the spot! That is one way, and it is tried every day in these large cities, and many of those who advertise for female hands in factories and for governesses in families have proved themselves unfit to But there is another way, and I saw it the

other day in the Methodist Book Concern in New York, where a young woman applied for work, and the gentleman in tone and for work, and the gentleman in tone and manner said in substance; "My daughter, we employ women here, but I do not know of any vacant place in our department. You had better inquire at such and such a place, and I hope you will be successful in getting something to do." The embarrassed and humiliated woman seemed to give way to Christian confidence. Sha started out with a hopeful look that I think must have won for her a place in which to earn her bread. I rather think that considerate and Christian gentlemen saved a earn her bread. I rather think that considerate and Christian gentlemen saved a woman. New York and Brooklyn ground up last year about thirty thousand young women, and would like to grind up about as many this year. Out of all that long procession of women who march on with no hope for this world or the next, battered, bruised, scoffed at and flung of the precipics not one but make the the precipice, not one but might have been saved for home and God and heaven. But good men and good women are not in that good men and good women are not in the kind of business. Alas for that poor thing! nothing but the thread of that evening girls needle held her, and the thread broke. I have needle held her, and the thread broke. heard men tell in public discourse what a man is, but what is a woman! Until some one shall give a better definition I will tell you what a woman is. Direct from God, a sacred and delicate gift with affections as great that no measuring line short of that of the infinite God can tell their bound. Fash ioned to refine and soothe and lift and irradiate bome and society and the world. Of such value that no one can appreciate it, unless his mother lived length enough to let him understand it. or who in some great crisis of life when all else failed him, had a wife to reinforce him with a faith in God that nothing could dis turb. Speak out, ye cradles, and tell of the feet that rocked you and the anxions faces that hovered over you! Speak out, ye murseries of all Christendom, and ye homes, whether desolate or still in full bloom with the faces of wife, mother and deutyler, and help me to deline what woman is. If a more help me to define what woman is. If a man-during all his life accomplish nothing else except to win the love and confidence and belp and companionship of a good woman, he is a garlanded victor and ought to have the hands of all the people between here and the grave stretched out to him in con-

But as geographers tell us that the depths of the sea correspond with the heights of the mountains, I have to tell you that good womanbood is not higher up than bad womanhood is deep down. The grander the palace, the more awful the conflagration that destroys it. The grander the steamer Oregon, the it. The grander the steamer Oregon, the more terrible her going down just off the coast. Now I should not wonder if you trembled a little with a sense of responsibility when I say that there is harrily a person in this house but may have an opportunity to save a woman. It may, in your case, bo done by good advice, or by financial help, or by trying to bring to bear some one of a thousand Christian influences. You would not have to go far. If, for instance, you know among your acquaintances a young woman who is apt to appear on the streets about the hour when gentlemen return from business and you find her responding to the smile of entire you find her responding to the smile of entire strangers, hogs that lift their hat, go to her and plainly tell her that nearly all the destroyed womanbood of the world began the downward path with that very kind of be

Yea, if you are a woman favored of fortune and all kindly surroundings, finding in the hollow flatteries of the world her chief regalement, living for herself and for time as if there were no eternity, strive to bring her into the kingdom of God, as did the other day a Sabbath school teacher who was the means of the conversion of the daughter of a man of immense wealth, and the daughter resolved to join the church, and she went home and said: "Father, I am going to join the church and I want you to come." "Oh, no," he said, "I never go to church."

"Well," said the daughter, "if I were to be married, would you not go to see me married?" And he said: "Oh. yes." "Weil," ried!" And he said: "Oh. yes." "Well," said she, "this is of more importance than that." So he went and has gone ever since, and loves to go. I do not know but that faithful Sabbath-school teacher not only saved a woman but saved a man. There may be in this audience gathering from all parts of the world, the most cosmopolitan assembly in all the earth, there may be a man whosy behavior toward womanhood has been perfidious. Repent! Stand up, thou masterpiece of sin and death, that I may charge you! As far as possible, make reparation terpiece of sin and death, make reparation you! As far as possible, make reparation be not beast that you have her in your power and that she cannot belo herself. When er and that she cannot help berseif. When that fine collar and cravat and that elegant suit of clothes comes off and your uncovered soul stands in judgment and before God, you

soul stands in judgment and before God, you will be better off if you save that woman. There is another exploit that you can do, and that is to save a child. A child does not seem to amount to much, it is nearly a year old before it can walk at all. For the first year and a half it cannot speak a word. For the first ten years it would starve if it had to earn its own food. For the first fifteen years its opinion on any subject is absolutely valueless. And then there are so many of them. My! what lots of children! And some people have exact anyt for children. They are good for nothing but to wear out the carpets and break things and wear out the carpets and break things and keep you awake nights crying. Well your estimate of a child is quite different from that mother's estimate who lost her child this summer. They took it to the sait air of the session and to the sait air of the seasone and to the tonic air of the mountains, but no help came, and the brief paragraph of its life is ended. Suppose that life could be re-stored by purchase, how much would take all bereaved mother give! She would take all the jewels from her largers and neck and bureau and put them down. And it told that that was not enough, she would take her house and make over the deed for it, and if that were not enough she would call in all that were not enough she would call in all her investments and put down all her mort-gages and bonds; and if told that were not enough, she would say: "Thave made over all my property, and if I can have that child back I will now pledge that I will toil with my own hands and carry with my own shoul-ders in any kint of hard work, and live in a cellar and die in a curret. Only give me back that lost darling." I am glad that me back that lost daring." I am guad that there are those who know something of the value of a child, its possibilities are tremendous. What will those hands yet do? Where will those feet yet walk? Toward what destiny will that never dying soul be-take itself; Shall those lips be the throne of blasphemy or benediction; Come, all ye surveyors of the earth, and bring link and chain and measure if you can its possible possessions. Come all ye astronomers of the earth, with your telescopes, and tell us if you can see the range of its eternal flight. Come, all ye chronologists, and calculate the decades on decades, the centuries on centuries, cades on decades, the centuries on centuries, the cycles on cycles, the eternities on eternities of its lifetime. Oh, to save a child! Am I not right in putting that are ong the great exploits? Yes, it heads the other two, for if you save the child you save the condition of the first twenty years of that hoy or girlall right and I guess you have got manheed or womanhood all right, and their entire earthly madeternal career all right. But what are you going to do with those children who are worse off than if their father or mether had died the day they were born! There are tens of thousands of such. Their parentage was against them. Their name is against them. Their name is against them. Their nerves and muscles contaminated by Their nerves and muscles contaminated by the inebriety or dissoluteness of their parents, they are practically at their birth laid out on a plank in the middle of the Atlantic Ocean in an equinoctial gale and told to make for shore. The first greeting they get from for shore. The first greeting they are the world is to be called a best or a ragamuthin or a wharf-rat. What to do with them is or a wharf-rat. or a wharf-rat. What to do with them is the question often asked. There is another question often asset. There is another question quite as pertinent, and that is, what are they going to do with us? They will ten or eleven years from now have as many votes as the same number of well-born children, and they will hand this lan lover to anarchy and political damnation just as sure as we neglect them. Suppose we each one of us save a boy or a girl. You can do it. Will you? I will. Take a cake of perfumed soap and a fine-toothed comb, and a New Testament and a

gin this afternoon. But how shall we get really for one or all of these three exploits: We shall make a of these three exploits? We shall make a dead failure if in our own strength we try to save a man or woman or child. But my text suggests where we are to get equipment. "The people that do know their God shall be strong, and do exploits." We must know Him through Jesus Christ in our own salva-Him through Jesus Christ in our own salva-tion, and then we shall have his help in the salvation of others. And while you are saving strangers you may save some of your own kin. You think your brothers and sis-ters and children and grandchildren all safe, but they are not dead, and no one is safe till he is dead. On the English coast there was a wild storm and a wreek in the colling and the wild storm and a wrock in the offing, and the ery was: "Man the lifeboat." But Harry.

the usual leader of the sailors' crew, was not to be found, and they went without him and brought back all the shipwrecked people By this time Harry, the leader and brought back all the shipwrecked people except one. By this time Harry, the leader of the crew, appeared and said: "Why did you leave that one?" The answer was: "He could not help himself at all and we could not get him into the boat." "Man the lifeboat," shouted Harry, "and we will go for that one." "No." said his aged mother standing by, "you must not go. I lost your father in a storm like this, and your brother Will went off six years ago and I have not heard a word from Will since he left, and I don't know where he is, and what has happened to him, poor Will, and I cannot let you also go for I am old and detendent on you." His reply was: "Mother, I must go and save that one man, "Mother, I must go and save that one man, and if I am lost God will take care of you in your old days." The lifeheat put out, and after an awful straggle with the sea they picked the poor fellow out of the rigging picked the poor fellow out of the rigging just in time to save his life, and started for the shore. And as they came within speaking distance, Harry, just before he fainted from the over-exertion, cried out: "We saved him, and tell mother it was brother Will." Oh, yes, my friends, let us start out to save some one for time and for eternity, some man, and some woman, and some child. And who knows but it may, directly or indirectly, be the salvation of one of our own kindred, and the salvation of one of our own kindred, and that will be an exploit worthy of celebration when the world itself is shipwrecked and the sun has gone out like a spark from a smitter anvil and all the stars are dead!

Severe pains in the bowels and stomach are often speedily relieved by the application of a bag of hot salt. A weak solution of salt and water is recommended by good physicians as a remedy for imperfect digestion, and for a cold in the head it is a complete cure snuffed up from the hollow of the hand. We have known severe chronic cases of catarrh entirely cured by persistent use of this simple remedy every night and morning for several months, when the best efforts of the physicians failed to do any good. It should be used milk warm. A good handful of rock salt added to the bath is the next best thing after an "ocean dip," and a gargle of a weak solution is a good and every-ready remedy for a sore throat, As a dentifrice, salt and water is very cleansing, and also hardens the gums. It will also prevent the hair from fall-ing out. When broiling steak throw a little salt on the coals and the blaze from the dripping fat will not aunoy.

A little in starch, boiled or raw, will prevent the irons from sticking. If the rons are rough put a little salt on a thick brown paper, lay a piece of thin muslin over it and rub the iron over it till perfectly smooth. Iak stains are antirely removed by the immediate an plication of dry salt before the ink has fried. When the salt becomes discolored by absorbing the ink, brush it off and apply more; wet slightly. Continue this till the ink is all removed, If new calicoes are allowed to lie in strong salt water for an hour before the first washing the colors are less likely to fade. Damp salt will remove the discoloration of cups and saucers caused by tea and careless washing. A leaspoonful of sait in each kerosene lamp gives a much clearer, better light-Katherine Armstrong.

Modest Noll and Dr. Johnson,

After Goldsmith had written the "Vicar of Wakefield" he rose consider ably in the estimation of blunt old Dr. Johnson, who extelled the book to the skies. Goldsmith's natural modests made the enthusiastic praise of his work exceedingly painful to him, and he invariably did his best in selfdepreciation when his friend began sounding his praises.
Upon one occasion Johnson, Roswell.

and Geldsmith were lunching together in a Fleet street chop-house, when as acquaintance of Johnson's entered, and approaching the group, grasped the Doctor's hand and asked him how he

customed couriesy, "I don't." Then turning toward Goldonith, who was trying to hide behind a bottle of Woreestershire sauce, he roared cut; 'Mr. Robinson, permit me to introduce my friend Goldsmith. Goldsmith is the nutbor of the 'Vicar of Waksheld,' you know."

"Indeed?" cried Robinson, with a pleased smile. "Are you the author of that delightful work?" "N-no, sir, peplease, sir," replied

Goldsmith, overcome with shame.

The effect of this reply upon Dr. Johnson may be better imagined than described, -Harner's.

Mrs. Jansen, of Little Perry, N. J. owns a cat that has formed a curious atsachment for a large tond that has its home in the swampy garden. Pussy evidently enjoys the strange frien ship she has formed, and since the first day she found the teal peacefully sleeping on a stone in the sunshine and joyously took it gently by its shoulder with her teetle and carried it into the house, she has done the same thing every day. She is a very inteligent cat, and she a ways mews loudly to call the children to see the fun. MAYVILLE, N. Y., Dec. 2, 1885.
I am glad to say, from a long personal experience with Allcock's Ponous Plastens, that I am able to endorse all the good things that have ever been said about them, and supplement these by saying that I frankly believe their value cannot be estimated. Their breadth of usefulness is unlimited, and for prompt and sure relief to almost every ache and pain that flesh is heir to, no other remedy, in my opinion, either external or internal, equals them in certainty and rapidity. I have used them at one time for rheumatism, another for backache, again for bronchitis, always with the same result—a speedy cure. L. T. HARRINGTON.

Brawn and Brain!
The powerful engine, with its wonderful propelling power, coupled to the long train full freighted with the richest fabrics of the fine-lactual borns of the centuries—what obstacles can stay the progress of this mighty force, when once under full steam along life's highway?

The American with brawn and brain does not see the necessity for titles of nobility, does not care for elevation by descent, he can reach out and pluck the stars.

does not care for elevation by descent, he can reach out and plack the stars.

But with briwn or brain impaired, a man is badly handicapped in the mai race for success which is the marked characteristic of the present age.

The physical system is a most intricat piece of machinery. It ought to be kept well regulated, so that it will work harmonically in all its parts, then it is capable of an immense amout of work.

It is said that a watch, if expected to keep perfect time, must be wound daily. It will not keep good time unless it "runs regular." More men break down because they don't "run regular" than for any other reason.

It is claimed by physicians that few mon are killed by hard work. It is to the ir regularities of modern social life that the high death rate is dus. Men burn the candle at both ends, then wonder why it burns out so quickly.

The main thing in keeping the human machine in good working ord r is to keep the regulator all right. "The blood is the life, and sound be lift is assured so long as the blood flows through the veins a limple strain of purity.
