EIGHTEEN MEN KILLED AND BERNED.

An Awful Railroad Accident at Hamilton, Ontario,

The Limited Express on the Grand Trunk Rajiway, due at Hamilton, Ontario, at 7:50 a.m., me; with an accident when about two miles west of that city, the result of which was the loss of many lives. The train was composed of an engine, two baggage cars, a smoker, a Chicago & Grand Trunk through passenger coach, a Wabash coach, a Wagner first-class coach, Pullman car and two Wagner sleeping cars in the order named. Conducter Poole was in charge of the train, with J. Watson, of London engineer, and E. Chapman, of London, fireman. The accident occurred at the junction where a 'Y' is built. This 'Y' is used to switch through trains for Toronto on to the Toronto branch from the main line. The train was 15 minutes late when the ac-

cident happened. Steam was shut off and they were making but about twenty miles an hour on a down grade. On jumping the track, the engine plunged into a huge tank, There it came to a dead stand, and the ears in the rear telescoped. A baggage car went right over the top of the engine and lit on the track about one hundred yards further on. The beggage man and expressman in the car were unburt,

There were 115 people on the train besides the 10 tra umen. Of these 12 were in the day cosch, 35 in one sleeper, 5 in another sleeper and 11 in a third sleeper, leaving 50 persons in the smoker and two couches. Thirty or 35 of th so were in the smoker. This car and the second baggage ar were telescopal completely and took fire immediately, The wrecking of the tank cut off the supply of water, and the 30 or 35 passengers were at the mercy of the flames, Of this number, 13, as far as can be learned, got cut safely. Two men were killed instantly. One of these, L. S. Gurney, of Chicago, had his head taken off and his body thrown clear of the wreck, and the other, an Italian on his way to Italy, was crushed to death. The remains of from sixteen to eighteen men were taken out of the wreck an hour or two later. They were cut to pieces almost to a man and burned beyond all possibility of recognition. They were huddled together in a heap in the end of the smoker and were pinned in by timbers, which made impossible for them to extricate themselves. Nothing could be done for them, or the fierceness of the flames made it out of the question for man to rescue them. The only way in which it could be ascertained that from 16 to 18 bodies had been taken out was from the fact that legs and arms corress eding to about that number were found. The remains were taken to the morgue. It will likely be some days before the dead are

# LATE NEWS IN BRIEF.

The treasure which was aboard the U. S war bip Trenton, when she was wrecked at Apia during the recent hurricane there, has been recovered. The Nipsic, which was damsged in the same hurricane, will be brought to Auckland by the U. S. steamer Alert.

Special freight train No. 856 on the Penns sylvania Railroad, in a heavy fog about 2 clock Friday morning, ran into freight train No. 638 within 100 yards of the Delaware river bridge. Both trains were going towards Philadelphia. The engineer and fireman on No. 856 jumped in time to save their lives. A man in the caboose of No. 638 was killed outright.

A peculiarly horrifying case of the burial of a person not yet dead is reported at Syra cuce, N. Y. A protty 17-year-old German girl was supposed to be dead and her own father, the sexton of the cemetery, dug the grave, which a few weeks later he opened and was driven nearly insane by the awful discovery that his beloved daughter had died a terrible death, in great agony, after her in-

The Minnesota State Legislature has passed a capital punishment law, similar in some respects to the New York law. Under its provisions the prisoner is to be kept in solitary confinement, and see no one but his famly, his lawyers and his spiritual advisers. He is to be executed before suurise, and may invite three persons to be present. The sheriff invites six persons beside the sargeon. It is made a misdemeanor for any newspaper to publish anything more about the execution than the mere fact.

In accordance with his own request, the Rev. Henry Truro Bray, of St. Louis, was deposed from the Episcopal ministry by Bishop Tuttle. Dr. Bray's case is a celebrated one in church circles. After serving several years in the ministry, a spirit of disbelief took possession of him, and he became an agnostic. He wrote a letter to the Bahop, in which he outlined his religious platform. In this letter he set forth that he did not believe that Christ was God, nordid he believe in revealed religion or the Gol of the Bible. In an interview he asserts that disbelief is wide. spread in the pulpit, and that a Bishop told him that he did not believe in the Bible, but thought Plato was better than the Bible.

The stopping of freight trains on Sunday by the Pennsylvania Company is working successfully, and a number of other railroads are following suit. This movement was started by the Pennsylvania Company, and it was believed that it would not prove a success; it has gone far beyond the expectation of the officiats.

#### A Find ay Wom in Forced to Give Her Savings to a Quartette of Bullies.

At eleven o'clock four masked burglars entered the boarding house of Mrs. Sartell, rast of the Lipping at lamp chimney works at Findl . y, Ohio.

At the mouth of two revolvers they compelled the old lady to give up three hundred dollars, all her savings.

They took their departure after warning the woman that if she raised any alarm within an hour her life would pay the forfeit. Thit she faithfully observed, although a half-dozen or more male boarders were asleep in the rooms above.

The whole job was done in less than fifteen minutes, and no clew left by which the burg lars could be followed or apprehended.

#### MASHED INTO A PULP.

An Old Man Commits Suicide by Dropping From a Hotel Roof

James Hogan, aged sixty-five years, committed suicide at Chicago. The old man had been drinking hard all day. He was living at a hotel on North Clark street.

Shortly after ten o'clock he climbed to the roof of the four-story building through the sky-light, with the avowed intention of committing suicide, His friends in the hotel used every means in their power to him to come down, persuade but without avail, Every anyone would start after him he would run to the edge of the building and swing himself over. There he would hang by his hands until his pursuers would retreat. Then he would draw himself back and walk up and down the roof.

Finally a patrol wagon, manned by Officers Cook and Murphy, arrived. The former erawled up through the skylight to attract the old man's attention, while Officer Murphy climbed the fire escape from the outside. As soon as Hogan saw Officer Cook he ran to the edge of the building, and without saying a word awung himself over, holding to the edge of the building by his hands. The crowd stood below in breathless silence. In a moment the old man loosened his hold and dropped backward. His feet struck a sign over the third-story window, and his body turned a complete somersault, his head strike ing the pavement with a sickening noise that

could be heard a block away. The man's brains were scattered for ten feet in every direction. His head and body were mashed into a pulp and the crowd stood back awe stricken. The mangled body was taken to the morgue.

## Medical Monopoly Not Wanted.

"In the Legislature of Massachusetts a bill now pending whose object is to prohibit, inder penalty of fine and imprisonment, the practice of "medicine, surgery or midwifery" by any other than the "regular" physicians. The attempt to pass such a bill has been made before, but it falled. It is a measure which sught not to pass, because it invades the personal liberty of the citizen; not the personal steriy of the "irregular" physician only, but of the patient.

"Only yesterday Dr. Holt, in a paper read before the Massachusetts Medico-Legal Society, an organization of "regular" physicians, somplained of the ignerance of his professional brethren as shown in the notorious Robinson poisoning cases.

"This crime," said the dector, 'one of the greatest in our medical history, would never have been discovered but for the suspicions aroused outside the profession.' And he called attention to the fact that in five of the pulsoning cases the regular physician certified the case of death to be measured to the poisoning cases the regular physician certified the case of death to be an expension to the death of the profession.

"This shows how far the 'regular' physi-

"This shows how far the 'regular' physicians are from being infallible.
"It would seem to be more in accordance with justice and common sense were they to perfect their own knowledge before they appeal to law to prohibit others from bealing.
"Net long ago a Globe reporter called upon ten 'regular' physicians on the same day, and described his symptoms in exactly the same language to each. The ten physicians

"The implied claim that there is any cer-

The imputed claim that there is any cer-tainty in Tegular' medicine, as at present practiced, is absurd. All medical practice, outside of the simplest complaints, is more or less guess-work and experiment, whether regular or irregular.

"When Garfield was shot five of the most

When Garfield was shot five of the most famous regular physicians in the country spent three months probing for the bullet in the region of his left hip, and after his death it was found under his right shoulder-blade." We have but a word to add, which is that the above is the doctrine Mesers. H. H. Warner & Co., proprietors of Warner's Safe Cure, have fought for and promulgated for the past ten years. We know of scores of cases, and so does the reader, where doctors have treated the wrong disease. They say afvanced Kidney Disease cannot be cured, yet thousands of cases have been cured with thousands of cases have been cured with Warner's Safe Cure; yet so bigoted are the medical profession that the majority of them will not use it, although they know they could thereby save many valuable lives, because, for sooth, it is against their fossilized code. Out upon such bigotry. Every method to prolong life should be utilized, method to prolong life should be utilized, and the regular modical profession should be the first to welcome it instead of encompassing themselves in self-conceit and bigotry, doctoring symptoms instead of disease, and sending their patients to the cemetery, poisoned with drugs, but on the death certificate that they died from typhoid fever, meningitis, pneumonia, or some other equally foreign cause.
