

# SPRINGS OF JOY.

## GATES OF HEAVEN AJAR.

Angels Tell of the Pleasures of a Real Christian Life.

"Thou hast given me a south land; the also springs of water. And he gave the upper springs, and the nether springs."—Job xxv. 19.

City of Debris was the Boston of antiquity—a great place for brain and books. She wanted it, and she offered her daughter in marriage to any one who would capture that city. It was a strange thing for her to do; and yet the man who could take the city would have, at any rate, two cities worth his while. He would have the city of Debris, and he would have the city of Heaven. He would have the pleasures of a real Christian life, and he would have the pleasures of a real Christian life.

It is a strange thing for her to do; and yet the man who could take the city would have, at any rate, two cities worth his while. He would have the city of Debris, and he would have the city of Heaven. He would have the pleasures of a real Christian life, and he would have the pleasures of a real Christian life.

## TRADE STILL IN THE DUMPS.

### Dun Finds Affairs Less Encouraging Than Ever.

Business reports this week are rather less encouraging, in spite of most satisfactory crop prospects at the West and the encouragement thereby given to all branches of trade. The actual transactions at present appear to be a little larger than last year at the same time, but the depression in some important branches of business is more seriously felt. Thus the accounts from iron manufacturing regions are not encouraging, and the report of 10 failures during the week at Lynn, Mass., is an unfavorable sign. Reports from most Western cities except Omaha show no improvement.

A decrease of about 1,000 tons weekly occurred during April in the output of charcoal iron furnaces, and the reduction in Eastern prices has not yet improved the situation. Southern and Western iron is still crowded upon the market, the attempt to establish better prices for rails resulted in nothing, and the market for bar iron is low and unattractive. The window glass trade is better, with factories all in operation.

The unfavorable results of the open winter still affect the coal trade, in which, however, there is claimed to be some improvement.

The general condition of railroad property does not appear to have improved. Money is not lacking, while foreign exchange is a shade lower. The exports of principal products for April show an increase of 21 per cent over last year, which, taken in connection with the small increase in imports at New York, points to a probable excess of imports over exports not half as great as the excess last year, which was nearly \$12,000,000.

The failure during seven days: United States, 217; Canada, 55; total, 272, as compared with 227 last year. For the corresponding week of last year the total was 129.

Blown to Pieces.

By an explosion of dynamite at Ocoola mine, at Lapeer, Mich., four Austrian miners were terribly injured. Joseph Basset had his skull fractured, John Turk had his right arm blown off and was otherwise mangled, Antoine Zaaruzak had his left arm partly blown off and the fourth man was painfully wounded. The first two may die. The accident occurred through the carelessness of the men injured.

LIVE-STOCK MARKS.

Central Yards, East Liberty.

CATTLE.

Market quiet with little or no change in prices. Fair to prime, 4 to 4.50; common, 3 to 3.50; bulls and stags, 1.50 to 3.50, according to quality and condition.

SHEEP AND LAMBS.

Some 7 or 8 carloads came, and they were all disposed of readily at fair prices. We quote at 4 to 4.50 for good to prime, at 3 to 3.50 for common to fair; sale of 1 car prime Washington county sheep averaging 62 lbs. at 4.50; common spring lambs sold at 60, but good to prime would have brought 7 to 8.

HOES.

Market continues overcast and considerably dull; prices still further depressed, and there were quite a number left over unsold; sold at 4 1/2 to 4.60.

# A Common-Sense Letter.

To the Editor—I see that newspaper calling attention to matters pertaining to health as well as to the means whereby disease may be removed and good health preserved. I am thereby reminded that I have received from time to time pamphlet publications issued by the well-known firm of H. H. Warner & Co., which dwell upon the history and growth of kidney disease; showing how such is the cause of consumption, heart, brain and nervous disorders, which can only be successfully treated by removing the primary disease from the kidneys. At the same time care is taken to remind the reader that Warner's Safe Cure is the only means whereby the physician or the individual can successfully prevent and cure this class of disease.

Whilst I have personal cause to feel grateful to Warner's Safe Cure, for the benefit which I derived from it when suffering from kidney troubles last spring, I cannot see, since that remedy is already so well known in every household, why the parties interested in its manufacture should continue to expend money in calling attention to what the public already knows so well. I am aware, Mr. Editor, that the members of the medical profession are seldom disposed to give due credit to proprietary remedies, but public confidence is likely to be even more shaken in the learned gentlemen since the startling disclosures in the Robinson poisoning cases were made in Somerville, Mass.

Here, however, I am reminded, through the efforts of an insurance company, that eight cases of death from arsenical poisoning had occurred—seven of them in one family, and within five years, and the other that of a relative—whom the trustees of a will had not been further advertising to what the public already knows so well. I am aware, Mr. Editor, that the members of the medical profession are seldom disposed to give due credit to proprietary remedies, but public confidence is likely to be even more shaken in the learned gentlemen since the startling disclosures in the Robinson poisoning cases were made in Somerville, Mass.

I am aware, Mr. Editor, that the members of the medical profession are seldom disposed to give due credit to proprietary remedies, but public confidence is likely to be even more shaken in the learned gentlemen since the startling disclosures in the Robinson poisoning cases were made in Somerville, Mass.

# CONSUMPTION.

I have a positive remedy for the above disease. By its use thousands of cases of the most stubborn and inveterate kind have been cured. No strong medicine is used, and the patient is able to continue his usual occupation. It is a simple, safe, and effective remedy. It is a simple, safe, and effective remedy. It is a simple, safe, and effective remedy.

After such an evidence of the utter incompetency of those physicians who were regarded as experts in their profession, I cannot conceive why it will be longer necessary for further advertising to what the public already knows so well. I am aware, Mr. Editor, that the members of the medical profession are seldom disposed to give due credit to proprietary remedies, but public confidence is likely to be even more shaken in the learned gentlemen since the startling disclosures in the Robinson poisoning cases were made in Somerville, Mass.

# TOWER'S SLICKER

The Best Waterproof Coat.

Make Your Chickens Earn Money.

They will, if you handle them properly, and to teach you we are now putting forth a 100-PAGE BOOK FOR 25 CENTS.

It embodies the experience of a practical man laboring for 25 years among Poultry as a business—not as a diversion, but for the purpose of making dollars and cents. He made a success, and there is no reason why you should not if you will profit by his labors—and the price of a few eggs will give you this intelligence. Even if you have room for only a few hens you should know how to MAKE THE PAY. This book will show you. Among hundreds of other points about the Poultry it teaches:

- To Induce Hens to Lay,
- To Select a Good Cock,
- To Select a Good Hen,
- Which Eggs to Hatch,
- When to Set for Early Broilers,
- What to Feed Young Chickens,
- How to Arrange Coops, Handling of Eggs,
- About Watering Chickens,
- Arrangement of Perches To Prevent and Cure Roup, Abortions, Cholera, Gapes, &c., &c.
- To Prepare Nests, Judicious Pairing,
- What Hens to Set,
- Care of Brooding Hens, Know Unfruitful Eggs,
- When to Set for Chocho Fowls,
- What to Feed for Eggs, What to Feed to Fatten, To Get Rid of Vermin, About Incubators,
- To Prevent and Cure Pile, Lice, Scaly Legs, Indigestion, &c., &c.

# Here It Is!

Want to learn all about a Horse? Here to pick out the Good One? Know Imperfections and Guard against Fraud? Detect Disease and Effect a Cure when it is possible? Tell you how to breed? What to sell? Different Parts of the Animal? How to shoe a Horse properly? All this and other valuable information can be obtained by reading our 100-PAGE ILLUSTRATED HORSE BOOK, which we will forward, postpaid, on receipt of only 25 cents in stamps.
