It matters not how inferior the quality of goods, if a suit fits well it looks well; and "visa versa," if it don't fit you may take whatever goods you please and it looks cheap. Then why buy ready made clothing that fits like a coffee sack on a bean-pole and falls to pieces from looking at it, when you can get a suit of better material, lasts twice as long and fits like the paper on the wall for almost the same money by simply calling on your local tailor and leaving your measure? My rapidly increasing trade convince me that the people are "catching on," and although I have plenty to do, I, with the rest of the world, still want more. Come and see my
