THEY NOW SAY THEY LIED GALLAGHER AND DAVIDSON SAY HUGH F. DEMPSEY 18

INNOCENT. Gallagher Writes and Swears to a Re-

markable Confession in Which He Bays the Conviction of Dempsey and Beatty in the Homestand Poisoning Case Was the Re-

Patrick J. Gallagher and J. M. Davidson. who are now serving terms in the Western Pennsylvania Penitentiary at Pittsburg, Pa., for self-confessed complicity in the alleged poisoning of the non-union workmen in the Homestead, Pa., mill, have made another confession in which they say they were paid to swear away the liberty of Hugh F. Dempsey and Robert J. Beatty, both of whom, they now assert, are innocent of the crime of which they were convicted. They further state, so far as they know, there was no poison administered to the men in the Homestead mill. Gallagher's confession was written by himself and sworn to before a 'Squire. Davidson's was given verbally in the presence of witness

L. K. Porter, who was Dempsey's attorney, is one man who never believed him guilty, and ever since the trial he has been gathering evidence in his favor. About six weeks ago he got a letter from Gallagher in which he asked Mr. Porter to call at the prison, as he desired to make a statement. Mr. Porter called a week or so later and in the presence of Warden Edward S. Wright and Squire White, Gallagher and Davidson told their stories.

PR.

Gallagher said the secret was killing him. Gallagher said the secret was killing him, and to relieve his own mind he wanted to make a full confession. He had it written out and Squire White swore him to it, Davidson's vertial statement was simply a corroboration of Galagher's. Mr. Porter, with the consent of Thomas M. Marshall and W. J. Brennen, who were associated with him in the constant the substance of W.J. Brennen, who were associated with him in the case, gave out the substance of the contession, suppressing only the names of the men who Gallagher says were in the plot to send Dempacy to prison. Mr. Porter read, in substance, as follows from Galla-gher's written confession, which he showed was properly signed and attested: "Dempsey and Beatty are entirely inno-cen". I never got any powder or miso-cent.

cen'. I never got any powder or poise from them and I never administered any from them and I never administered any in the mill. I was arrested by Pinkerton de tectives and was told that if I did not a what they wanted me to do they would in dict me for nurder and have me hanged. They got me drunk and prepared a confes sion for me. I was kept supplied with money and whisky for 12 days, and a detective was shadowing meal it the time. I was told that if I attempted to get away I would be shot After the story got into the newspapers was given a revolver and was told that would be justified in shooting any one who would be justified in shooting any one who molested me. "They told me that they wereafter Demp

"They told me that they were after Demp sey because he was at the head of the Knights of Labor, and that organization was no good and ought to be broken up. They said if I would testify against Dempsey and Beatty they would not push a murdee charge against me, and that I would go free At the most, I would only get 60 days to satisfy the public. They kept telling me not to get mixed in my story, but to sweat to what they said and stick to it. They mad me rehearse the story frequently until they were satisfied that I had it off by heart. Ther were other witnesses, who were to take thei were other witnesses, who were to take the

What Dempsky swore to war true. At hired us to make re orts of the number of men in the mill. That \$25 I got from him was borrowed money and was used to pre-vent my furniture from being taken from me. That E. W. Robinson, the prisoner in jail who testified that I told him Dempsey was uncerned that this was a mit up to was innecent and that this was a put up jot told the truth. I did tell him that. I was kept supplied with money. provisions and clothes while I was in the jail, the same as when I was out when I was out. "They kept continually telling me to wear this case through and stick to it so as they could not swear out of it like in the Critchiow case. If they got this case through they said that would settle the Homestead people. I was told they had 25 witnesses ready to bolster up my story. They had me so badly frightened and kept me drunk so long, i aid not know whether I was living or dead half of the time." Davidson's statement was about the same as Gallagher s. as Gallagher s. If the two stick to the statements they If the two stick to the statements they have made, the papers will be prepared and an appeal to the Board of Pardons will be made at the earliest meeting possible. Be-sides this, something may be done to prose-cute the detectives whose names are con-nected with the alleged plot. The Pardon Board alone can free Des.psey and Beatty, because the matter has passed beyond the jurisdiction of the courts, the Supreme court having retused the appeal made when a new trial was not granted by the lower court. lower court.

WEEVILIN THE WHEAT. Western New York Devastated by the Devouring Worm.

The weevil has appeared among the wheat fields of Western New York for the first time in 10 years and is doing untold damage to the crops. Almost half a century ago the pest swept through the wheat fields of this section of the state and devastated them. There is hardly a field in Orleans county which is not affected and in many instances the heads of grain is fairly alive with the little worm.

with the little worm. The appearance of the weevil has about paralyzed the farmers, for while a good por tion of this year's crop will be marketable it is a certainty that next year's crop will be almost entirely demolished. A great many of the farmers are already beginning to make preparations to put in rye this fall in preference to wheat. This is their only alwaiten. maivation.

ealvation. The weevil is a worm about the size of a pin and varies in length from 1 to 3-16 of an inch. When it begins to feed on the kernels of grain it is of a dull green. Later it changer to a bright yellow. It burrows into the grain when it is in a milky state and con-sumes the interior, leaving nothing but the shell. shell

WEEKLY CROP REPORTS.

Harvesting of the Winter Wheat Favored By Good Weather.

Following is the official weekly crop report: The weather has been favorable for barvesting throughout the winter wheat belt. Rye harvesting is progressing in Minnsota and Nebraska and the corn crep is reported as much improved and in excellent condition in the principal corn producing States.

PERNSYLVANIA.-Harvesting progressing favorably: corn. potatoes, tobacco and truck doing well.

WEST VINGINIA-Wheat mostly stacked in gool condition; oats, maturing; corn clean and of fine color; buck wheat doing well; tobacco in good condition; clover fair timothy

Ouro-Fine growing weather wheat, clos-er and barley harvested over the middle and southern sections: wheat threshing in prog-ress: quality good: oats turning fast; corn advancing rapidly, early potatoes instared.

- Tur German Federal Council is discuss ing a scheme for taxing advertisements and making obligatory the placing of stamps upon receipts, to cover in part the increased expense entailed by the new army bill.

Arestance Bast and We The only surprising thing about reduction of the time between New York and Chicago is that it has come so late. 'Twenty hours are ample for a little less than a thousand miles The waste of time that has deferred antil so late a day the arrangement of this new table between the lakes and the seaboard has been at stations where the switching of rolling Hock, the transfer of baggage and mails and the appointing of coaches have been done without that dis patch that has characterized the running of the fast expresses. An average of fifty miles an hour is fairly rood, but it is not phenomenal. In fact, the American railway system has scarcely kept pace with the derelopment of the ocean steamship service. Passengers arrived in Chi tago Saturday who took ship at Queenstown the previous Sunday. All the difficulties of ocean trave taken into account, this is more impressive than making 1,000 miles in twenty hours without a mountain range to cross and with no engineering problems of any perplexing nature. The railroads throughout the coun try are likely to be stimulated to im-

provement of their schedules by the new express trains between the lakes and the Atlantic. The Southern serrice, so far as it is controlled in Southern centers, is in urgent need of speeding. The Southern planters ought to insist on better time for the valuable but perishable freights they sond to Northern markets. Southerr business men have everything to gair by bringing South and North more closely together. There has been considerable improvement during the past year in means of communication between Chicago and the Gulf; but the manipulation of neither passenger nor fast freight trains is yet what intelligence, energy and a little more putlay of money would easily make it. The next step for Northern and Eastern, as well as Western and Southern railway management, ough: to be popularize the improved service by lowering the rates. Travel is like postal service-the cheaper the stamt the greater the number of letters The lower the railroad ticket the

Woman's Influence in China.

more the thousands that will use it

-Chicago Herald

The laws and social customs of China nake a woman's life a most restricted one in every way; and yet, in spite of all disadvantages, in no country is fenale influence more powerful. women of Chins are the very backhone of the Nation, seeming to be born with a natural sense of honesty which is sonspicuously absent among the men. While the mendacity of Chinamen is proverbial, the women are, as a rule, iruthful, and have great strength of sharacter. They make good wives, struggling bravely to restrain their husbands from ramshu drinking, opium smoking and immoderate gambling, vices for some of which most of them have a propensity. They are dutiful iaughters and devoted mothers. It is only surprising that there are not more good men to be found among their sons. A Chinaman's most redeeming quality, however, is the warm affection and respect he generally feels for his mother. Their filial obedience is indeed remarkable. A mandarin some forty years of age will calmly remark that he must go here, or that he cannot go there, because his mother has bidden or forbudden him to do so And woman's influence is not alone confined to the domest c circle. It is well known that i. - Hung-Chang, the great man of China, consults "Lady Li" on matters of importance, and to her credit let it be said that he is always foremost in favor of progress and a more enlightened way of governing the country. The Empress Dowager is also a woman of great tatelligence; indeed, when the disadvantages of her education and mode of life are taken into consideration, it must be admitted that she is one of the most remarkable women of the age. That she is not, however, quite exempt from feminine vanity is shown by the fact that she was not long since admonshed by the Board of Censors for dressing too

The Vegetarian Theory.

Vegetarians may it is a popular fal-lacy that meat is needed for strength. One prominent exponent of the faith says it is a fact that the strongest animals in the world are vegetarian and not carnivorous. It is the ferocity of th. lion rather than his strength that makes him formidable. An elephant is a match for several lions, and is a vegetarian. The animals with most speed and endurance-- the horse, the reindeer, the antelope and others-are also vegetarians. Dog trainers, says the authority, always feed their trick animals on a strict vegetarian flict, and many hunters do the same thing .-Chicago Herald.

POISONED FOOD.

Danger in Impure Milk, Cheess and Corned Beef, Many Persons Ser. iously Injured.

The poisoning of the entire household o Frederick B. Miles, a wealthy Philadelphian who is a summer cottager at Bay. head, N. J., and the death of his wife in convulsions have caused alarm among their neighbors. Miss Ada Miles and Frederick B. Miles, Jr., a daughter and son of the dead woman, and three servants are in a

critical condition from use of the milk. The poisoning was caused by some chem-ical change in the milk used in making what is known as Bavarian cream. The cream was eaten as dessert at dinner Thurs-day. At midnight, Mrs. Miles was taken ill. She called her daughter, Gertrude, and complained of cramps. Miss Miles went to summon the servants, and found Bridget Duffy, the coos, also ill with cramps. Miss Duffy, the coss, also ill with cramps. Miss Ada Miles and Basil Miles were seized with similar pains early the next morning. Mrs Miles lingered until Wednesday when she

25 FAMILIES FOROMED BY IMPURE CHEESE, Mansfield, O., physicians are dealing with a wholesale case of poisoning. In all 22 families are sick and ten persons at the point of death, the result of eating cheese made by a local cheese company and sole y grocers. The victims suffer intensely. Physician

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleas ant to the taste, the refreshing and truly benchcial properties of a perfect laxntive : effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kid-neys, Liver and Bowels without weakoning them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all drug-gists in 50c and \$1 bottles, but it is man-ufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

Flower

' I am Post Master here and keep a Store. Thave kept August Flower for sale for some time. I think it is a splendid medicine." E. A. Bond, P. M., Pavilion Centre, N. Y.

The stomach is the reservoir. If it fails, everything fails. The liver, the kidneys, the lungs, the heart, the head, the blood, the nerves all go wrong. If you feel wrong, look to the stomach first. Put that right at once by using August Flower. It assures a good appetite and a good digestion. -
