PATTISON ON LABOR TROUBLE

The Governor Charges Immigration as the Cause. In explaining the labor situation in Penn-

sylvania Gov. Pattison in an interview said the most dissatisfied class was the miners. They were kept down in wages because a number of unmarried miners in Virginia were working for 30 cents per ton.

"The present commercial and financial de-"The present commercial and financial depression," he said, "is not as bad as others that we have had. The country has been plunged into a financial panic and trade stagnation about every twenty years. It comes as a natural consequence, W2 are 1, the midst of a migration of labor. Mon who have been willing to work for reduced wages in all trades have forced out men who were employed, and employers have been compelled to make the change."

"Now, what will become of the men who were thrown out? They will have to go hungry or work for the reduced wages which the men who pushed them out get. People

the men who pushed them out get. People talk about our immigration laws and the influx of foreigners who come here and work for little or nothing, but they do not consider the business side of the question. The steam-ship companies has placarded Europe with their announcements to carry passengers to the United States, and their agents are work-ing industriously to drum up trade. When the man who makes the trip arrives in New York the railroads are ready to carry him to York the railroads are ready to carry him to any part of the United States, and the newspapers lend aid to the transaction by publish-ing the rates and time cards—of—both steamship and railroad lines.

"All these concerns are connected with the emigration of foreigners from the business there is in it, and the only way we can keep out people who do not come here with the expectation of making good citizens of them-selves is to impose fines and penalties upon the corporations which make money out of the passenger traffic. Until we separate business interests from the exactions of good government we will have labor troubles like the present."

Petrifying a Humau Body.

The authorities at the county morgue in Pittsburg are trying to petrify a body to pre-serve it until word is received from the friends of the deceased, who live in Cuba, The body is that of Ernest Schwab, who was killed on July 26, at Brushton. The experi-ment was begun last week and in two days it was noticed that the hands and feet, upon which work had been commenced, were very

British Steamer Ashore.

The British steamer Empress of China, Capt. Archibald, which sailed from Van-couver on July 16, is ashore at the entrance to the port of Shanghai, China. All attempts to float her have proven futile. It is thought that she must discharge much of her cargo and then wait for the full tide to float her. Apparently she is no danger.

Coke Strike Over

So far as the English-speaking coke workers of the region are concerned the strike is ended and it is said that within a week all the old employes who can secure work will have taken it at the Frick scale. The men who will return to work are ready to accept it on the terms of the Frick scale, 78 cents a hun-dred for mining and 42 cents for drawing an oven charged with 100 bushels of coal.

Took Charge of Him.

It is often said that a benefit conferred does more to promote friendship than a favor received. If you would cultivate a friendly feeling toward another, do him a kindness; if you would secure his lasting friendship, get him to do you a kindness. There is some truth, at any rate, in this view of the case; and it applies even to dogs, as is shown strikingly by a story related in "Gold. Sport and Coffee-Planting in Mysore," by Mr.

R. H. Elliot. Mr. A. told me that he once wounded a tiger which afterward sprang on him, knocked h m down, and seized him by the hand and a m. With Mr. A. was a large dog, which at once attacked the tiger, and diverted him from Mr. A. After driving off the dog, the tiger returned to Mr. A., and commenced worrying him, but was again attacked by the

The dog was driven off three or four times, but the tiger was all the while losing strength, and finally The dog was uninjured. Now

comes the curious part of the story. The dog, which was not affectionate, belonged to Mr. A 's brother, and previou-ly had taken no interest in any one but his master. Now, however, he refused to go home with his master, but stuck closely to the wounded man, and when some carbolic acid, which caused pain, was applied by Mr. A.'s brother to the wound, the dog began to growl and show other signs of displeasure.

He would not allow anyone to come near Mr. A. except his own special servant, and lay under the bed with his nose sticking out, keeping close

When Mr. A. was carried to the doctor, some thirty-five miles away, the dog went, too, and on the dector's applying carbonic acid and setting the bones, which caused the patient to cry out, the dog at once seized the

doctor by the leg. In about three months Mr. A. was quite cured. After that the dog lost all interest in him, and returned to his master; and if he met Mr. A. by chance, merely acknowledged his recognition of him by the faintest wag of his tail.

A year afterward, happening to meet the doctor, whom he had not seen in the meantime, he at once new at h m and sei ed him by the
