Gift were home from the lumber regions. Gift cut an ugly gash in his foot while working in the woods.... The [illegible] was [illegible] a week. Rev. PORT TREVORTON.

During the period of the great western fires, wild animals as well as human beings, sought safety in flight. Rumor had established that an old she-bear with two cubs was hurking in our vicinity. Page Woodling had seen them; Geo. Flanders saw their tracks in the dust, while Ed. Zeigler and John Stroub, two Herndon sportsmen, armed cap-a-pie, and almost dying for ursine glory, sought to be-labor poor bruin. After a fatiguing tramp through meadow, wood and swamp, they discovered not the bears, but three faithless dogs that coxy-like were bumming the country together. It isn't healthy, even to smell bear-steak in the presence of these disappointed hunters....Amidst all the indications of a rainy day, the Sunday school Union picnic, bound for Clement's Park embarked on a canal boat. Scarcely had the last seven-story cake, and the accompanying spring chicken been packed into the hold, when a few gentle drops of rain fell among the crowd and drew forth numerous words of dissatisfaction, a few more drops suddenly brought umbrellas into fashion and waterproof coats, rain made some decide to remain at home. The more hopeful, however, remained sitting to keep the seats dry. Then the rain maker opened the valve to its fullest extent and down came a shower that occasioned unprecedented stumbling and squawking, and such a hasty disembarkation that must have been a delight to the boatman who desired to move on whether freighted with a picnic or not. The committee will please attend Sunday school next Sunday and receive thanks for their efforts in procuring transportation.

Trial at Sea of a Navigating Tricycle.

Mr. Pinkert is the inventor of an aquatic machine of the tricycle nature. The machine consists of three hollow wheels, air tight, with paddles fixed upon their exteriors. The wheels might be called magnified rubber tires. The wheels are worked by crank pedals after the manner of the bicycle. On this curious contrivance the inventor attempted last month to cross the English Channel, from Cape Grisnez, France, to Folkestone, England. The distance across is only about twenty-five miles; but it is difficult for navigation by small craft. A calm day was chosen, when Mr. Pinkert rolled his queer vehicle down the shore to the water's edge, and then with the assistance of a man to push he worked out through the breakers and headed for old England. It was pretty slow work, but the inventor bravely continued his exertions. After many hours of labor and when half way across the tide turned and Mr. Pinkert became satisfied he would be carried away from land; so he hailed a passing vessel and was taken on board. He will probably make further experiments.

A man can generally laugh over a love affair, however grave, when it is really past. Not so a woman. To her the subject remains sacred; it is dedicated to solemn silence. She regards it as a tender poem unfinished, as a pure romance profaned. Is it because she has less humor or more heart?

HEART DISEASE!
Fluttering, No Appetite, Could Not Sleep, Wind on Stomach.

"For a long time I had a terrible pain at my heart, which fluttered almost incessantly. I had no appetite and could not sleep. I would be compelled to sit up in bed and belch gas from my stomach until I thought that every minute would be my last. There was a feelling of oppression about my heart, and I was afraid to draw a full breath. I could not sweep a room without resting. My husband induced me to try

Dr. Miles' Heart Cure

and am happy to say it has cured me. I now have a splendid appetite and sleep well. Its effect was truly marvelous."
