

**Somebody's Good.**  
To make our own troubles the means of helping the troubles of others is a noble effort for good. A well illustrated instance of this kindly sympathy is shown in a letter from Mr. Enoch L. Hanson, School Agent, Marshall, Me., an old Union Soldier. He says: "It may do somebody some good to state, I am a man of 69 and when 40 had a bad knee and rheumatism set in. I was lame three years and very bad most of the time. I got St. Jacobs Oil and put it on three times and it made a cure. I am now in good health."

**When Nature**  
Needs assistance it may be best to render it promptly, but one should remember to use even the most perfect remedies only when needed. The best and most simple and gentle remedy is the Syrup of Figs manufactured by the California Fig Syrup Co.

**Excelled by None**  
"For some years I have been a severe sufferer from Rheumatism. I tried all the medicines I could get, but they did me no good. I was advised to try Hood's Sarsaparilla and have constantly improved since I commenced to take the medicine. I am now well and strong again. Hood's Sarsaparilla is truly 'excels' in its use. I am, C. F. King, Verona, N. J. Remember."

**Hood's Sarsaparilla**  
Be Sure to get Hood's Cures  
Hood's Pills cure all liver ills. 25 cents.

**Deafness Cannot be Cured**  
Local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional treatment. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or impediment in hearing, and when it becomes chronic you are deaf. It is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be forever lost. Hood's Sarsaparilla cures deafness by its action on the mucous surfaces. We give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

**What Hissing Signifies.**  
Hissing means different things according to where you happen to be at the time. In West Africa the natives hiss when they are astonished; in the New Hebrides when they see anything beautiful. The Basutos applaud a popular orator in their assemblies by hissing at him. The Japanese, again, show their reverence by a hiss, which has probably somewhat the force of the "hush" with which we command silence.

You won't make a home run by striking at every ball.

**ASSIST NATURE**  
A little now and then in removing offending matter from the stomach and bowels and you thereby avoid a multitude of distressing derangements and diseases, and will have less frequent need of your doctor's service.

Of all known agents for this purpose, Dr. Pierce's Pleasant Pellets are the best. Once used, they are always in favor.

Their secondary effect is to keep the bowels open and regular, not to further constipate, as is the case with other pills. Hence, their great popularity with sufferers from habitual constipation, and their attendant discomfort and painful derangements. The "Pellets" are purely vegetable and perfectly harmless in any condition of the system. No care is required while using them; they do not interfere with the diet, habits or occupation, and produce no pain, griping or shock to the system. They act in a mild, easy and natural way and there is no reaction afterward. Their help is:

The Pellets cure biliousness, sick and bloated headache, dizziness, constiveness, or indigestion, sour stomach, loss of appetite, coated tongue, indigestion, or dyspepsia, windy belchings, "heartburn," pain and distress after eating, and kindred derangements of the liver, stomach and bowels. Proof of their superior excellence, it can truthfully said, that they are always accepted as a household remedy after the trial. Put up in sealed, glass vials, before always fresh and reliable. One "Pellet" is a laxative, two are mildly purgative. As a "dinner pill," to promote digestion, or to relieve distress from over-eating, take one after dinner. They are sugar-coated granules; any child will readily take them.

Accept no substitute that may be recommended to be "just as good." It may be better for the dealer, because of paying him better profit, but he is not the one who needs help.

This Country Declines to Join the Alliance in Stopping the Chinese-Japanese War.  
The United States has been invited by the quadruple alliance—Great Britain, France, Germany and Russia—to join it in a friendly intervention in the war between China and Japan. The invitation has been declined. The declaration is based on the time honored policy of this government to avoid any entangling alliances with foreign powers. It is rumored that the Chinese government has opened negotiations with Japan for the settlement of the war between them. China has refused to acknowledge the independence of Korea and to pay a war indemnity to Japan.  
Korea being cleared of Chinese, the opportunity has arrived for Japan to undertake a thorough internal reform of the government of that country.

**GEN. SCHOFIELD'S REPORT.**  
Advocates a Heavy Increase in the Regular Army Force.  
The annual report of Major General Schofield, commanding the United States army, discusses widely the use of the military forces in maintaining the Federal laws against domestic resistance, and the necessity of coast fortifications for defense against foreign attack. Referring to national dangers, General Schofield alludes to the recent employment of the army in suppressing domestic violence and to the necessity of concentrating at Chicago for all that purpose of nearly all of the forces that could be made available from all parts of the country. General Schofield says he thinks the active force of the army should be largely increased.

**THE BUSINESS SITUATION.**

**NO MARKED CHANGE.**

**Not Much Reliance in the Government Crop Report.**

R. G. Dun & Co.'s Weekly Review of Trade says: Business is still waiting for the development of retail trade. There is a little better demand in some industries but not so good in others. Wholesale dealers in nearly all branches are halting because business does not yet show distinctly what it is to be. Lower prices for the great farm staples and lower wages in some establishments hinder purchase for consumption, while political unrest and uncertainty also have some retarding influence.

Meanwhile, large imports and small exports of merchandise, with inadequate employment for money here, are raising the rates of foreign exchange, so that possibilities of gold exports somewhat affect the stock market. The halting attitude for the moment is disturbing to those who have looked for continued gain, though, rightly considered, it is the natural consequence of conditions which were to be expected at this season.

The Government crop reports are not greatly trusted, and yet have an influence, and actually exaggerate the tendency toward low prices, because they are supposed to put all the crops too low. Men calmly reckon that if the Government report indicates over 400,000,000 bushels of wheat, the crop must be over 500,000,000 bushels. The price is slightly lower. Corn has been stronger, for receipts are hardly a quarter as reported. Whether the actual yield, if above the Government estimate, may not prove lower than had been supposed. The cotton returns are more confusing, but all point to a yield so far above that indicated by the Government that its statement has been followed by a further decline for the week of one-quarter. The receipts thus far hardly encourage extremely large estimates, and yet it is to be considered that the crop was later than usual.

The iron industry records larger production in September than in any other month this year; but as prices are gradually weakening, because of insufficient demand for finished products, some works are preparing to close or shorten time.

The woolen mills still have numerous belated orders for all goods, but the demand for spring does not increase, though in nearly all the lower priced products domestic makers appear able to command most of the business that exists. Sales of wool have been 4,877,200 pounds, against 2,500,432 last year, and 7,000,000 in 1893, and prices are a shade weaker for fine fleeces.

Failures for the week ending October 4, show liabilities of \$1,714,276, of which \$805,885 are of manufacturing and \$892,391 of trading concerns. There have been 231 in the United States against 393 last year; and 43 in Canada against 42 last year.

An accumulation of favorable features is revealed in the telegraph reports to Bradstreet's this week. While advances as to the most marked improvement come from the West and South, there are some encouraging features also reported from the East, and the net result of last week's business has been further progress in the direction of enlarged distribution.

Exports of wheat, including flour as wheat from both coasts of the United States and Canada for six business days ending with Thursday of this week, aggregate 3,317,400 bushels, which compared with 3,243,000 bushels sent abroad last week, 2,862,000 bushels in the second week of October last year; 3,625,000 bushels in 1892, and 4,093,000 bushels in 1891.

**CROP REPORTS.**  
**General Condition Shows Improvement Over Earlier Estimates.**  
The October returns to the statistician of the department of agriculture make the general condition of corn as not materially differing from that of last month. It being 64.2 against 63.4 in September, a gain of eight-tenths of one point. In most of the southern states the condition of corn has fallen since the last report, but in some of the western states there has been slight gains in condition.

The returns of yield of oats per acre indicate a yield of 24.5 bushels, being one bushel more than the estimate for last October. The average yield of rye according to the correspondents' returns of yield per acre is 13.7 bushels, against 13.3 bushels in 1893, and 12.7 bushels 1892. According to the returns on yield per acre the general average for barley is 19.3 bushels against 21.7 bushels in 1893, and 23.7 bushels in 1892.

The condition of Buckwheat, as reported is 72.0, against 69.2 last month and 73.5 October 1, 1893. The October condition of potatoes is given as 64.3, against 62.1 last month and 71.2 at the same time last year. The condition of tobacco, as reported, is 8.45, against 74.5 last month, and 74.1 October 1, 1893.

**POTATOES FROM SCOTLAND.**  
Nearly 32,000 Tons Imported During the Last Nine Months.  
Considerably more than half a million dollars' worth of potatoes, weighing 31,745 tons, were brought from Scotland to the United States in nine months ended last June, and this, notwithstanding a protective duty of 25 cents per bushel on imported potatoes. This fact is set out in a report to the State Department by United States Consul Savage at Dundee, Scotland.

The great bulk of the shipments go to New York with occasional shipments to Boston and at rare intervals to Philadelphia and Baltimore. Nothing but the best potatoes are shipped to America. The price at the beginning of the season was \$11.55 per ton, i. e., exclusive of the cost of sacks 13 cents each. The freight from Dundee to New York was \$2.85.

**THE WOOLEN SCHEDULE.**  
A Disputed Point Decided by the Acting Attorney General.  
Secretary Carlisle received from Acting Attorney General Maxwell an opinion, in which he holds that the word "wool," as used in the woolen schedule of the new tariff act, refers to the hair of the sheep only, and that the new and lower duties on goods made of the hair of other animals went into effect on the signing of the act.

Immediately on receipt of this opinion, Secretary Carlisle sent the following telegram to all collectors of customs:

The Attorney General has rendered an opinion that the word "wool," as used in paragraph 297 of the new tariff act, refers to hair of sheep only, and that the new duties under schedule K, upon articles made of the hair of the other animals, went into effect when the act took effect. Customs officers will be governed accordingly. Instructions of August 27 should be adhered to. Collectors will relinquish all entries covering goods, classified contrary to above instructions.

**ROBINSON'S CONFESSION.**

**He Says While He and Gibb's Fought His Wife Fired the Shot.**

Clarence Robinson, who is under arrest at Cleveland, together with his wife, for the murder of Attorney Gibb on the streets of Buffalo last April, made a complete confession. He said that while the two were fighting Mrs. Robinson fired the shot which killed Gibb.

Robinson's story is that when he and his wife arrived in Buffalo last spring they were in want. The night of the murder Mrs. Robinson wore men's clothes and both carried revolvers. Gibb when attacked fought hard and after Robinson had shot him in his left arm Mrs. Robinson shot him in the head, killing him. They then escaped, but returned to see the body loaded into a wagon.

Elevators in Chicago and its tributary roads are so stocked as almost to put an entire stop to railways hauling grain all floor.

**Killing Field Mice.**  
An ingenious method was recently employed in France of ridding the country of small rodents which had become so numerous and destructive that it was impossible to produce any crop. Ever acre of land furnished a home for thousands of these pests. The method adopted was to dissolve some gelatine cultures of pathogenic bacteria capable of producing an infectious disease in mice, then soaking bread in this solution, and placing the bread near the holes every day for three days in succession. Within two weeks from the time when this treatment was begun, scarcely a live mouse was to be found in the district. When the burrows were opened, their galleries were found to be filled with dead mice.—Literary Digest.

A FACT is something that will keep going straight on forever.
